24th Annual Preceptorship in Dental Implantology

Our implant program was the first to offer a combined surgery/restorative curriculum and is now the model for programs throughout the world.

33rd Annual James P. Hollers Memorial Lecture

AVAILABLE ONLINE: OPIOIDS CRISIS IN AMERICA
Developed to satisfy the latest Texas Administration Code for Dentists

PLEASE SHARE THIS PUBLICATION WITH THE ENTIRE DENTAL OFFICE
COURSE INFORMATION:
This Preceptorship consists of an annual review and updated curriculum that is clinically focused while incorporating the latest research from the clinical basic sciences. This will provide the participant with an understanding of the rationale and scientific basis for the clinical practice of implantology.

The participants will meet for six weekend sessions which will include didactic sessions and some hands-on training experiences in an interactive learning environment.

UT Health San Antonio
School of Dentistry
Continuing Dental Education
7703 Floyd Curl Drive
San Antonio, Texas 78229-3900
Welcome to the UT Health San Antonio, Continuing Dental Education Program. We are very excited to be able to provide you with opportunities to expand and enhance your dental skills and to aid you as you maintain compliance with local, state and federal licensing agencies.

We have recruited and engaged speakers from across the country to provide up-to-date and timely courses to help you as you work to hone your dental skills. The dental profession is evolving at an incredibly rapid pace and with a variety of topics such as implants, bone grafts, CAD-CAM restoration, 3D-surgical guides, milled porcelain restoration, orthodontics, cosmetic dental materials, endodontic therapies, and the list goes on.

The other important aspect, is bringing your team up-to-speed. While it is necessary for the dentist to stay apprised of new technologies, it is critical that the dental team be equipped and informed on helping you implement the latest and greatest technologies and procedures.

The next time you consider a course… consider bringing the entire team.

We are blessed to have SAN ANTONIO, TX as a great place for us to host our courses. Our new clinic, CENTER FOR ORAL HEALTH CARE AND RESEARCH (COHR), gives us some fantastic spaces to demonstrate, illustrate and teach our programs. Also, besides the “live” courses, we offer other learning opportunities such as on-line learning, study clubs like our LONHORN FOOTBALL DENTAL STUDY CLUB that meets before each UT Austin home game, and travel programs such as “Ski & Learn”.

When you look at the entire program, we have over 230 course offerings. Some topics offered multiple times throughout the year and some as an annual event such as the James P. Hollers Lecture. We have made every attempt to build a program that meets the needs of today’s dental professional.

We look forward to being your Dental Continuing Education provider.

Scott G. Stafford, DDS, MBA

http://smile.uthscsa.edu
Didactic Sessions
- History and future of dental implantology.
- A classroom/cadaver laboratory exercises.
- Biomechanical and biomaterial aspects of dental implantology.
- Physiology of bone with emphasis on cellular, molecular healing, and bone maturation as well as selection of implants with different designs and surfaces relating to bone density and planned implant function.
- Anatomy of the maxilla, mandible and TMJ in terms of available bone and anatomy as related to stress distribution.
- Anatomical structures (muscles, nerves, arteries) of the maxilla, mandible, and adjacent regions as related to surgery.
- Philosophies of implant retention and stabilization.
- Essential treatment planning facets, including patient selection, past dental and medical history, essential diagnostic guides (casts, templates, etc.), documentation, appointment sequencing with laboratory, surgeon, and restorative dentist. Essentials of joint treatment planning, recall principles.
- Surgical and restorative considerations including incision design, fixture and abutment selection, occlusal considerations and force transmission.
- Diagnosis and management of peri-implant mucositis and peri-implantitis.
- Post-restoration responsibilities of staff personnel, hygienist, surgeon and restorative dentist on a recall basis.
- Includes demonstration of instruments, techniques for postimplant placement, and restoration hygiene.
- Principles in troubleshooting, rescue and retrieval procedures.
- Procedures for developing optimum esthetics and the biomechanical loading aspects of implant restorations.
- Component systems will be categorized with specific indications for their use.
- The keys of optimal laboratory support and clinical communication skills to facilitate positive interaction with the dental technician.
- Indications and techniques relating to insertion of implants in single tooth and fresh extraction sites
- Hard and soft tissue grafting, guided soft, hard tissue regeneration in both pre- and post-implant placement, indications including sinus augmentation procedures.
- Repair of the ailing, failing implant with new regenerative procedures and materials.
- A medical-legal review.
- The principles of practice management, marketing, and insurance considerations.

Participation Sessions
- The Preceptorship will feature hands-on and interactive sessions.
- Co-Directors will conduct a two hour diagnostic and treatment planning segment featuring the preceptors’ patient cases at each of the weekend sessions.
- Implant anatomy laboratory will give the preceptors the opportunities to familiarize themselves in implant anatomy through dissection and to actually place implants in cadaver models.

Preceptorship Objectives
The participant will learn:
- The rationale and scientific basis for the successful clinical practice of implantology.
- The current concepts, principles, and clinical methodology used effectively in practice.
- The proper evaluation, diagnosis, and selection of patients for implant placement and restoration.
- To develop and understand specific implant, surgical and prosthodontic skills, and the different modalities available.
- To manage the more difficult clinical situations, such as patients with advanced maxillary or mandibular atrophy.
- The practice management aspects of dental implantology: records, insurance, informed consent, medical-legal and marketing considerations.

curriculum and is now the model for programs throughout the world.

PRECEPTORSHIP DIRECTOR
BRIAN L. MEALEY, D.D.S., M.S., received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1983. He attained his specialty certificate in Periodontics from Wilford Hall Air Force Medical Center, Lackland Air Force Base in 1990 and a Master of Science in Periodontics from UTHSCSA, Dental School. He is an Associate Professor and Head of the Specialist Division in the Department of Periodontics at UT Health San Antonio, School of Dentistry.

PRECEPTORSHIP DIRECTOR
E.MATTHEW LAMB, D.D.S., F.A.C.P., is a board certified prosthodontist and Director of the Residency in Advanced Prosthodontics at UT Health, San Antonio. Dr. Lamb graduated from New York University College of Dentistry. He pursued two years of advanced surgical and restorative training at the Hunter Holmes McGuire VA Medical Center in Richmond, Virginia. He then moved to San Antonio to complete a prosthodontics residency and currently teaches at UT Health San Antonio.

This course has been designed for general dentists and specialists who desire an intense study of various aspects of dental implants.

REGISTER EARLY AND SAVE $750.00

Make a non-refundable $500 deposit before Thursday, May 31, 2018 and then a $1,000 non-refundable payment by Monday, July 9, 2018 (The remaining $6,000 can be paid on a 5 month payment plan)

PRECEPTORSHIP IN DENTAL IMPLANTOLOGY REFUND POLICY
If you must cancel your registration, please notify the Office of Continuing Dental Education as soon as you determine you are unable to attend so that a refund may be considered. Due to commitments to these type of programs, any cancellation made before August 6, 2018 will be subject to an administrative fee assessment of $2,087.50 plus applicable nonrefundable deposits. Any cancellation made after August 6, 2018 does not qualify for a refund. However, participants may choose to place their tuition minus an administrative, applicable nonrefundable deposits, and any direct cost fee assessment’s into a holding account for future use. "No Shows" will not qualify for refunds. Written notification is required within five business days by mail, fax, or e-mail to initiate the refund process. Please allow four to six weeks for all refunds.

OVERVIEW:
This course is designed to aid the restorative dentist in providing more comprehensive diagnostic treatment planning and clinical treatment skills. The future of dentistry is changing. CAD CAM dentistry is on the cutting edge of advanced restorative care.

OBJECTIVES:
Participants Will Understand...

- Digital Impression Systems
- Complete Chair-side Systems
- Milling Centers
- Case Selection
- Tooth wear
  (Abrasion, Erosion, NCCL, Attrition)
- Parafuction and Bruxism
- Occlusal Adjustment
- Parafuction and Bruxism
- CO-CR Slide
- Occlusal Adjustment
- Management of 2 step occlusion
- Virtual Articulation
- Single visit restoration
- Materials (CAD CAM Blocks and Bonding Materials)
- Prep Designs for Veneers, Inlays, Onlays, Crowns and Bridge
- Parameters
- Anterior Guidance and Multiple Anterior Unit Techniques
- Stain, Glaze, Characterization, and Sintering
- Implant Prosthesis
- CBCT and CAD CAM

JUNE 8, 2018 (161838A)

CLINICAL CONSIDERATIONS FOR CAD/CAM GUIDED IMPLANT DENTISTRY

OVERVIEW:
This course will review the concept and limitation of currently available CAD/CAM guided implant surgery systems and corresponding possible clinical complication and solution. Specific surgical protocols for CAD/CAM Guided Implant Surgery will be discussed followed by hands-on session.

OBJECTIVES:
- The concept of CAD/CAM guided implant surgery
- Procedures for the successful CAD/CAM guided implant surgery such as case selection, impression, CBCT taking, and more
- The limitations and possible errors of CAD/CAM guided implant surgery, plus preventive measures.
- Practice the surgical protocol of CAD/CAM Guided Implant Surgery with a model and guides through the hands-on session.

JULY 27, 2018 (161860A)

CAD/CAM DENTISTRY ESTHETICS & OCCLUSION

OVERVIEW: This course is designed to aid the restorative dentist in providing more comprehensive diagnostic treatment planning and clinical treatment skills. The future of dentistry is changing. CAD CAM dentistry is on the cutting edge of advanced restorative care.

OPIOID CRISIS in AMERICA

Developed to satisfy the Tex. Admin. Code, Title 22, Part 5, Chap. 111, Rules 111.1 and 111.2.

COURSE DESCRIPTION:
A presentation of new information on America’s current opioid Epidemic with an emphasis on the history, pharmacology and prescribing practices of opioid analgesics.

COURSE OBJECTIVES:
To fulfill TSBDE recent regulations Title 22, Part 5, Chapter 111 regarding a practitioners’ privileges to write for controlled substances.

2 hours of didactic CE

NOW AVAILABLE ONLINE $65.00

http://smile.uthscsa.edu
OBJECTIVES

The course is designed to help dentists more cost effectively obtain maximal therapeutic benefit with their TMD patients. Participants will:

• Learn to identify patients who generally will not respond well to traditional TMD therapy and how that can be changed.
• Gain new insight of the prevalence of referred pain and the pain interconnection between the teeth, masticatory system, and cervical area.
• Understand which allied health professionals are able to help their TMD patients and when they would be most beneficial.
• Palpate the masticatory and cervical musculature of a fellow participant.
• Practice mandibular manipulation techniques.
• Adjust a splint that a fellow participant brings to the course.

PRESENTER

EDWARD F. WRIGHT, D.D.S., M.S., is a professor at the University of Texas Health Science Center–San Antonio. He completed a 1-year general dentistry residency, a 2-year TMJ and Craniofacial Pain Fellowship, and a 2-year TMD research fellowship. He is the Course Director for the dental school’s TMD Course, Occlusion and TMD Course, and Dental Anatomy and Occlusion Course. Dr. Wright is the primary author of over 50 publications, author of the textbook “Manual of Temporomandibular Disorders” (in its 3rd edition), and Diplomate of the American Board of Orofacial Pain.

TIME

Check-in: TBD, 8:00 AM
Program: Friday, 9:00 AM-5:00 PM

LOCATION

UT Health San Antonio, School of Dentistry

TUITION

Individual: $220.00
KDR Recipient: $198.00

CREDIT

(Course Code: 161857A) AGD Code: 190
Hours: 7

IMPORTANT COURSE INFORMATION:

Participants must bring to the course a splint they provide their patients. The splint needs to be fabricated to either the participants’ maxillary or mandibular arch. The splint may be fabricated with acrylic, soft thermoplastic mouthguard material, or any intermediate material (Flexite, Bruxeze, hard/soft laminate material, etc.). NITI appliances are not recommended and should not be brought. Participants must also bring a long Shank #14 acrylic bur and a long Shank #6 or #8 round bur. If he or she brings a splint made from soft thermoplastic mouthguard material, the participant must also bring the cast it was molded over. The class will be limited to the first 14 dentists to register.

Certification Course for Dentists
Nitrous Oxide Conscious Sedation
Hands-On Training Course
ERNEST E. VALDEZ, D.D.S.

OVERVIEW
The course will provide information to meet the Nitrous Oxide/oxygen inhalation conscious sedation. This is a required course for dentists on the rules and regulations for the Texas State Board of Dental Examiners to qualify for an sedation/anaesthesia permit.

OBJECTIVES
At the end of the didactic and clinical sessions, the participant will be able to:
• Define conscious sedation and be aware of the benefits for the patient and dentist.
• Understand the psychophysiology of pain, anxiety, and sedation.
• Understand the physiology of respiration and of N2O-O2 inhalation.
• Know the advantages, disadvantages, indications, and contraindications to the use of N2O in normal and medically compromised patients.
• Understand the techniques used to administer N2O and monitor patients while they receive it.
• Recognize the complications that may arise as a result of N2O administration, and understand the prevention, early detection, and treatment of these complications.
• Learn the hazards associated with the use of N2O and accepted methods used to reduce exposure to an acceptable level in the dental office.
• Recognize special problems associated with the use of N2O in children and know the proper technique for administering it to them.
• Discuss nitrous oxide equipment, including tanks, regulators, manifolds and machines.
• Understand guidelines for installation and use as issued by the National Fire Protection Association and the American Dental Association.
• Recognize the similarities of N2O sedation and hypnosis, be familiar with the basic concepts of hypnosis and its usefulness as an adjunct to N2O sedation..

PRESENTERS
ERNEST E. VALDEZ, D.D.S., received his DDS degree from The University of Texas Health Science Center at San Antonio, School of Dentistry in 1993. He pursued a two year General Practice Residency at UTHSCSA which he completed in 2001. Dr. Valdez has served as co-investigator of numerous research projects. He has published articles in the Journal of Oral & Maxillofacial Surgery, British Journal of Oral & Maxillofacial Surgery, and the Journal of Periodontal Research.

TIME
Check-in: TBD 8:00 AM
Program: Friday, 9:00 AM-5:00 PM

LOCATION
UT Health San Antonio, School of Dentistry

TUITION
Dentist: $312.00
KDR Recipient: $280.00
Allied Dental Personnel: $210.00

CREDIT (Course Code: 161871A)
AGD Code: 132
Hours: 7

IMPORTANT COURSE INFORMATION
Participants must complete our on-line didactic portion of Nitrous Oxide Conscious Sedation as a prerequisite to attending this clinical session at an additional fee of $247.50. (The course can be found at [http://smile.uthscsa.edu](http://smile.uthscsa.edu)) Visit our website and click on Interactive Web Courses. Participants must also bring a copy of their CPR certification on the day of the course.

NOTE
This course will not certify allied dental personnel.

APRIL 6

TSBDE-Approved Course
Behavior Management Techniques and Protective Stabilization in Pediatric Dentistry
CLAUDIA I. CONTRERAS, D.D.S.
MARIA-JOSE CERVANTES, D.D.S., M.S.

OVERVIEW
This course will satisfy the Texas State Board Dental Examiners adopted new rule 108.14 regarding pediatric stabilization. The new rule requires that a dentist who wishes to utilize pediatric stabilization obtain advanced training by either an accredited post-doctoral program or pediatric dentistry residency program that provides clinical and didactic education in advanced behavior management techniques or an extensive and focused continuing education course of no less than 8 hours in advanced behavior management that includes both didactic and clinical education pertaining to Protective Stabilization.

OBJECTIVES
• Scientific evidence will be discussed for indications and application of commonly used behavior guidance techniques
• Review the objectives, indications, contraindications and precautions for the various modalities of protective stabilization
• Gain an understanding for the application of basic and advanced behavior guidance modalities in the context of today’s parental and societal expectations and limitations

PRESENTERS
CLAUDIA I. CONTRERAS, D.D.S., received her D.D.S. degree from the National University of Mexico City, Mexico City, Mexico in 1993. She continued with her postgraduate training as a Preceptor in Pediatric Dentistry at The University of Texas Health Science Center at San Antonio in 1999. Followed by an Internship in Pediatric Dentistry at the University of Puerto Rico, San Juan, Puerto Rico where she attained her Certificate in Pediatric Dentistry in June, 2004. She currently serves as an Assistant Professor in the Department of Developmental Dentistry at UTHSCSA.

MARIA-JOSE CERVANTES MENDEZ, D.D.S., M.S., obtained her dental degree from Intercontinental University at Mexico City. After working as a general practitioner for a couple of years she continued her training at The University of Texas Health Science Center San Antonio where she completed her Residency in Pediatric Dentistry. She then received her Masters Degree in Orthodontics at the Intercontinental University.

TIME
Check-in: TBD, 7:30 AM
Program: Friday, 8:00 AM-5:00 PM

LOCATION
UT Health San Antonio, School of Dentistry

TUITION
Dentist: $300.00
KDR Recipient: $270.00
Allied Dental Personnel: $210.00

CREDIT (Course Code: 161972A)

The Dental School thanks Specialized Care Co, Inc for its unrestricted educational grant in support of this continuing education program.

(210) 567-3177
Academic Outreach in Carlsbad, CA
Lecture/Hands-On Course
Fully Simulated Comprehensive Implant Placement Course

OVERVIEW
This course is designed for dentists who have a significant surgical background and a basic knowledge of implant dentistry. It is a comprehensive, hands-on experience in implant dentistry. The program will combine multiple surgical and prosthodontic procedures to help enhance the participants' knowledge in both the restorative and surgical aspects of implant dentistry. It will be geared toward dentists who already have a solid didactic and pre-clinical background in implant dentistry.

This impressive facility is focused on training with its sophisticated labs, audiovisual equipment and lecture facilities with the most advanced and realistic patient treatment mannequins in the world.

OBJECTIVES
At the conclusion of the course, participants will be able to understand and develop:
• Basic restorative and surgical treatment planning skills, rationale, and scientific basis for using implant therapy to restore oral function, health and esthetics.
• Surgical skills in soft tissue management and implant placement for single, multiple-unit & full arch cases.
• Treatment planning, scientific rationale and surgical treatment skills in minor bone grafting techniques such as ridge augmentation and ridge preservation techniques
• Techniques in extraction and immediate implant placement
• Gain experience with the latest implant surgery and prosthetic implant instrumentation.
• Impression techniques
• Restorative techniques using advanced mannequin models for single unit, multiple unit, and fully edentulous scenarios with various overdenture attachments.
• Using various treatment options for managing complex prosthodontic needs

PRESENTERS
SIDNEY L. BOURGEOIS, JR., D.D.S., obtained his degree from Louisiana State University School of Dentistry in May 1991. In August 2006, Dr. Bourgeois resigned his Commission in the United States Navy and joined the faculty at The University of Texas Health Sciences Center in San Antonio as a Clinical Assistant Professor.

MICHAEL P. MILLS, D.M.D., M.S., received his degree from the University of Alabama School of Dentistry in 1970. Did a year of General Practice Residency at Eglin USAF Regional Hospital in Florida. Dr. Mills is a Clinical Associate Professor with teaching responsibilities in the Postdoctoral Division of the Department of Periodontics.

IVY S. SCHWARTZ, D.D.S., M.S.Ed., earned her DDS degree from The University of Texas Health Science Center at San Antonio in 1982. She received a certificate in Prosthodontics in 1984 and is a Diplomate of the American Board of Prosthodontics. Dr. Schwartz is familiar with a wide variety of implant restorations as well as surgical aspects of implant dentistry.

RONALD G. VERRETT, D.D.S., M.S., attained both his dental and M.S. degrees from The University of Texas Health Science Center at San Antonio, School of Dentistry in 1979 and 1987. Continuing his postgraduate training with the U.S. Air Force, he completed a General Practice Residency at Barksdale Air Force Base, Louisiana in 1980 followed by a Prosthodontic Residency at Wilford Hall USAF Medical Center at Lackland Air Force Base, Texas in 1987.

TIME
Check-in: Wednesday, 8:30 PM – 9:15 PM (PST)
Program: Thursday, 7:30 AM – 5:00 PM (PST)
Friday, 7:30AM – 5:00 PM (PST)

Lecture Course

The Dental Wear Patient, Diagnosis and Treatment
PAUL A. HANSEN, D.D.S.

OVERVIEW
The severe wear patient has multiple etiologies. We want to know and understand the cause of the wear and how to tailor our restorative efforts to the patient’s needs.

Initial examination of a new patient occasionally reveals a severely worn dentition characterized by extensive wear and loss of tooth structure. Function and esthetics are compromised, and the prognosis for one or several teeth may be jeopardized if the problem is not corrected. The complex nature of this condition, and its multifactorial etiology, often overwhelms the restorative dentist in treating such widespread tooth destruction.

Loss of tooth structure may be a result of mechanical wear (attrition, abrasion) or chemical attack (erosion). We will review the various etiologies and the risks associated with each when we try to reconstruct the patient. A brief review of dental occlusion will be included as a point of orientation.

We will review the new materials on the market for restoring these patients. The use of zirconia or lithium disilicate will be reviewed. We will discuss material properties and how best to use them for the dental wear patient. Concentration on full mouth reconstruction cases.

This program is a clinically oriented program reviewing over 30 years of cases and follow up documented by Dr. Hansen.

OBJECTIVES
Following this unit of instruction, the practitioner should be able to:

• Describe the etiologies for the worn dentition.
• Identify the types of tooth wear.
• Describe how to perform an accurate diagnostic mount to evaluate wear.
• Explain the use of the diagnostic mount in diagnosis and treatment planning.
• Understand the proper sequence for restoring extensive wear cases.
• Understand the various new materials used to restore difficult cases.

PAUL A. HANSEN, D.D.S., obtained his dental degree from the University of Nebraska Medical Center College of Dentistry in 1975. He completed a one-year Prosthodontic residency at the University of Texas Health Science Center in San Antonio, Texas (UTHSC-SA) and a two-year Prosthodontic at Wilford Hall Medical Center. Currently he is Associate Professor at the U of N College of Dentistry Director of Prosthodontics.

Lecture Course

Review Course in Minimal Enteral (Oral) Sedation
( Level 1 Sedation)
ERNEST B. LUCE, D.D.S.

OVERVIEW
This course is designed to satisfy the Texas Dental Board requirement for continuing education in minimal enteral sedation (required every 2 years for level 1 minimal sedation permit holders). This course does not qualify a dentist to apply for a new minimal sedation permit. Individuals who complete the course will receive a certificate, which can be submitted to the TSBDE as documentation of continuing education in minimal sedation.

OBJECTIVES
At the end of this course, the participant will have a renewed understanding of the many elements of the safe administration of enteral conscious sedation including:

• Spectrum of sedation and the limits of enteral sedation.
• Patient evaluation and appropriate patient selection with an emphasis on recognizing patients at high risk of complications.
• Pharmacology of sedative agents including drug interactions and appropriate selection for patients with differing medical conditions.
• Appropriate use, limitations of and interpretation of monitors.
• Management of urgencies and emergencies especially as they pertain to minimal sedation.
• Rules and Regulations of the TSBDE on the administration of minimal enteral sedation

ERNEST B. LUCE, D.D.S., received his DDS degree from the University of Texas Health Science Center at Houston in 1985. In June of 1986, he completed a one year General Practice Residency at The University of Texas Health Science Center at San Antonio. Currently he is a Clinical Associate Professor at the Health Science Center, and he also maintains a part time private practice in general dentistry in San Antonio.

Lecture/Participation Course

Contemporary Trends in Pediatric Dentistry

STEVEN P. HACKMYER, D.D.S.

OVERVIEW

Treatment of the pediatric patient is involves more than approaching them as miniature adults. This course is divided into two parts: lecture and hands-on. The hands-on portion will cover a number of topics that are associated with every day comprehensive treatment of the pediatric patient.

The topics this course will cover are: Primary Pulpal Therapy, Behavior management, prevention, the dental home, anticipatory guidance, fluoride, sealants, diet, nutrition, caries risk assessment and management of dental trauma to both the primary and permanent dentition will be discussed. The new current standards of dental trauma addressing, classification, diagnosis and treatment modalities will be discussed. As part of the entire presentation, examples of various types of treatment and treatment planning will be utilized as part of the different topics covered. The hands on part will cover current pediatric restorations for primary teeth. Integral in this will be a focus on esthetic anterior and posterior restorations.

OBJECTIVES

- Review current basics of essential areas of clinical everyday pediatric dentistry.
- Provide the participant with a better understanding to enable them to provide quality comprehensive care for their pediatric patients.
- An update of current concepts and procedures that can be utilized as part of their everyday pediatric patient care.

PRESENTER

STEVEN P. HACKMYER, D.D.S., earned his dental degree from New York University College of Dentistry. After that, he completed a residency in Pedodontics (Pediatric Dentistry) at Brookdale Hospital University Medical Center in Brooklyn, NY.

A TWO PART PARTICIPATION STUDY GROUP

(PART 1)-CLINICAL OCCLUSION

APRIL 20, 2018

OVERVIEW

The goal of the Clinical Course is to relate the concepts and principles of occlusion learned in the past to the treatment of the normal patient as well as the patient with damaged dentition. The purpose of this course is two-fold. First, the course is a continuation of basic occlusion concepts and their relationship to general dentistry. Second, the course will introduce disorders of the natural dentition. The role of occlusion in the diagnosis and treatment of these disorders will be explained. Techniques include occlusal splint appliance and pre-restorative occlusal adjustment will be presented.

OVERVIEW FOR PART I

The first part of the course is designed to aid the restorative dentist in providing more comprehensive diagnostic, treatment planning and clinical treatment skills. The major emphasis of this part of the course is to introduce the clinical aspects of disorders of the natural dentition and introduce the different concepts of Occlusal Adjustment.

OBJECTIVES FOR PART I

At the completion of the course, the participant will be able to understand:
- Recognize occlusal problems
- Communicate why occlusal adjustment is necessary
- How to modify the occlusion
- The principles of occlusion, muscle function, and TMD
- When functional analysis is and is not necessary
- Why and how to use the facebow
- Materials and techniques for bite registration in restorative dentistry
- How to determine which Centric position to use for anterior esthetic procedures
- How to make accurate Centric Relation records, mountings and adjustments

JACOB G. PARK, D.D.S., is a Professor of Dentistry/ Clinical in the Department of Comprehensive Dentistry at UT Health San Antonio School of Dentistry. Dr. Park holds fellowship with the Academy of Dentistry International, the International Congress of Oral Implantologists and the International College of Dentists. He is the Past President of the American Equilibration Society. Dr. Park serves as a chairman of Subcommittee 9 CAD CAM in Dentistry of the Standards Committee on Dental Products of the ADA.

(Part 2)
TICKET AND PARKING PASS POLICY
Because of the high demand of football tickets, a policy has been established for ordering extra game tickets on a limited basis. All ticket orders are handled on a first-come, first-served basis. Parking passes are limited, we have only enough to provide 1 per family. If more become available, you will be contacted.

PRIORITY TICKETS, PRIORITY SEATING, AND PRIORITY PARKING WILL BE GIVEN TO SEASON SUBSCRIBERS
• Season Subscribers who order the same number of extra ticket(s) for each game will be given priority.
• The Season Subscriber who orders extra ticket(s), but not the same number of tickets for each game, will not be guaranteed that the guest(s) will be seated together.
• Those who register on an individual basis for the series and ordering extra ticket(s), will not be guaranteed that the guest(s) will be seated next to the individual.
CONTINUING DENTAL EDUCATION ONLY

• Please reserve a spot in the CE programs only.
• Please find enclosed $1,325.00
• One parking pass is included in your package

• Already a season ticket holder or you just want the CE only?

CDE SUBSCRIBER A:
Send a nonrefundable deposit of $250.00
by June 1, 2018 and receive a 20% fee reduction for the CE programs only.
• $1,325.00 - $265.00 - $250.00 = $810.00
(Balance due by July 27, 2018)
• One parking pass is included in your package

CDE SUBSCRIBER B:
Send a nonrefundable deposit of $250.00
by July 6, 2018 and receive a 15% fee reduction for the CE programs only.
• $1,325.00 - $198.75 - $250.00 = $876.25
(Balance due by July 27, 2018)
• One parking pass is included in your package

FOOTBALL DENTAL STUDY CLUB REGISTRATION FORM

Please reserve a spot for the entire series. Please find enclosed $2,275.00

I wish to purchase _________ additional season tickets at $460.00 each

I wish to purchase _________ additional series meals at $75.00 each

SEASON UNDERWRITER A: Send a nonrefundable deposit of $500.00, by June 1, 2018 to receive a 15% fee reduction.
• $2,275.00 - $341.00 - $500.00 = $1,434.00 (Balance due by July 27, 2018)
• One parking pass is included in your package
• Receive a complementary seatback for each season ticket reserved

SEASON UNDERWRITER B: Send a nonrefundable deposit of $500.00, by July 6, 2018 to receive a 10% fee reduction.
• $2,275.00 - $227.00 - $500.00 = $1,548.00 (Balance due by July 27, 2018)
• Parking Pass an additional $150.00 (Please check the appropriate box)
• Receive a complementary seatback for each season ticket reserved

Yes, I want parking
No, I do not want parking

FOOTBALL DENTAL STUDY CLUBS Refund Policy:
If you must cancel your registration, please notify the Office of Continuing Dental Education as soon as you determine you are unable to attend so that a refund may be considered. Due to commitments to these special programs, any cancellation made before July 15, 2018 will be subject to an administrative fee assessment of $198.50. Any cancellation made after July 15, 2018 does not qualify for a refund. However, participants may choose to place their tuition minus an administrative and direct cost fee assessment into a holding account for future use. “No Shows” will not qualify for refunds. Written notification is required within five business days by mail, fax, or e-mail to initiate the refund process. Please allow four to six weeks for all refunds. Deposits and the cost of football tickets are nonrefundable.

(210) 567-3177  http://smile.uthscsa.edu
VISIT HEMISFAIR PARK PLAZA
Since its debut in 1968 at the World’s Fair, the downtown park has hosted countless festivals and more recently, the annual New Year’s Eve blast.

RIDE THE RAILS
Take the Amtrak for a quick trip to Austin without the traffic of I-35 (then hop on the Austin Steam Train for a journey through the Hill Country).

TAKE A HILL COUNTRY WINE TOUR
There’s something about a wine tour that inspires sophistication and there is no better way to taste Texas varietals than at the best vineyards guided by a wine expert.

PUB CRAWL THE RIVER WALK
The River Walk is home to the Esquire Tavern, Coyote Ugly, Hard Rock, Howl at the Moon, Pat O’Briens, Durty Nelly’s Irish Pub, and many more.

STRUT YOUR STUFF
Floores Country Store, Gruene Hall, and Cowboys

HIT THE ROAD
Summer is the best time to take a road trip, and Texas has plenty of great destinations within a day’s drive.

Fredericksburg: Third weekends of the month are trade days—shopping, music and plenty of beer. fredericksburgtradedays.com

Kingsville: Visit the legendary King Ranch. king-ranch.com

Gruene: Two-step around Texas’ Oldest Dance Hall and shop antiques in the historic district.

HUNT AND PLAY AT JOSHUA CREEK RANCH
See this 1,200-acre game preserve in the Hill Country that calls itself a sportsman’s paradise.

ADMIRE THE CREATIVITY
Visit getcreativesanantonio.com and get the latest locations of Art exhibits, film, and poetry readings.

GO SOUTH OF THE BEATEN PATH
When you wake up feeling bohemian, try this: have a Sweet Southern Cream Waffle at Guenther House (stop by the gift shop for the recipe). Walk to Robert Hughes Gallery, Inter Artisan and Garcia Art Glass Blowing Studio for a treasure hunt.

EXPLORE THE MISSIONS
Visit the San Antonio missions. A newly designated World Heritage Site.

CONQUER ENCHANTED ROCK
Take a short ride 15 miles north of Fredericksburg to hike the wondrous pink granite dome that rises 425 feet above ground, covers 640 acres and is said to be one of the largest of its kind in the country.

FIRST FRIDAYS
Follow a San Antonio tradition by strolling Southtown’s party of arts, crafts, live music and culture held the first Friday of every month from 6-11 p.m.

NATURAL BRIDGE Caverns
With tours that range from walking to rappeling, Natural Bridge has plenty to experience—and there’s always something new.

ZIP-ITY DO DA
Hang tight as you ride five different zip lines over Lake Travis. Courses range from 250 feet to 2,000 feet, the longest zip line in Texas.

TASTE OF GERMANY
Make your way to New Braunfels to get a taste of German treats. Schnitzel and beer at Friesenhaus are a must. Try the Wiener schnitzel, grilled sausage and homemade German potato salad at Oma’s Haus.
SCHLITTERBAHN
What seems like an endless floating experience, The Falls is the world’s longest water park ride with 3,600 feet of whitewater rapids.

PEARL
Pearl is being celebrated as one of the nation and world’s most thoughtful development spaces alongside many other notable urban developments.

BASK IN TEXAN CULTURES
Get inspired at the Institute of Texan Cultures, a museum affiliated with the Smithsonian Institution and located in a 182,000-square-foot complex on the UTSA Hemisfair Park Campus downtown.

SEAWORLD
Enjoy fabulous, family-friendly, live entertainment. Swim with Dolphins, Belugas & Sea Lions or meet a Penguin.

SIX FLAGS - FIESTA TEXAS
Pulse-pounding roller coasters to gentler options for tots. Cool off at White Water Bay or take a break at one of our entertaining shows. Catch a bite at one of our restaurants and pick up a souvenir.

BE EXOTIC
Take a Texas-style safari at Natural Bridge Wildlife Ranch, the oldest safari park in Texas.

LUNA
The “sit down music nightclub” hosts live jazz, blues, soul, R&B, Latin and funk music. lunalive.com

SEE SA’S SPIRITED SIDE
Hunting ghosts of the Alamo, the Menger Hotel, cemeteries and other historic sites make this type of hunting trip big business—so big that there seems to be a turf war among guides.

PAINTING WITH A TWIST
Grab a bottle of wine, a friend or two ... and join the fun!! Paint your own masterpiece! Discover your inner artist!

SHOP THE VILLAGE
Take a much-needed detour from the city’s busy streets through La Villita, San Antonio’s first neighborhood. Choose the prettiest tree at Bonsai Arbor and take up bonsai trimming.

STAY AT OUR HOST HOTEL
La Quinta Inn & Suites
4431 Horizon Hill
210-525-8090

MAY 11-12

Participation/Certification Course for Dentists and Dental Hygienists

A Standard Proficiency Certification Course in Laser Dentistry

ROBERT A. CONVISSAR, D.D.S., B.S.

OVERVIEW

Has the hoopla surrounding the introduction of lasers to dentistry been more smoke than substance? Since 1990, the USFDA has approved the use of 7 different wavelengths creating a world of difference in how lasers operate, and their usefulness in the oral cavity.

The first day will detail laser use in the following:
- Non-Surgical, Surgical & Regenerative Periodontal Therapy
- Surgical & Restorative Implantology
- Esthetic/Cosmetic Dentistry
- Fixed & Removable Prosthetics
- Practice Management Marketing
- Oral Med/Oroal Surgery/Oral Path
- Pedo/Ortho, Pedo & Adolescent Operative Dentistry, & Endo

The second day will provide each participant hands-on experience with the various wavelengths, performing surgical procedures on in-vitro models. Real-time videos of routine laser procedures will be part of the discussion of specific instrument settings and techniques for laser surgical procedures.

OBJECTIVES

At the conclusion of the course, the participant will be familiar with the various wavelengths, their effects on oral tissues, and their uses for specific oral diseases and pathologies found in everyday practice.

PRESENTER

ROBERT A. CONVISSAR, D.D.S., B.S. obtained his degree from New York University College of Dentistry in 1980. He is a pioneer in the field of laser dentistry and one of the first dentists to incorporate lasers into general practice. He has extensive experience with CO2, Nd.YAG, Diode and Erbium wavelengths.

Lecture Course for The Entire Dental Team

“Grand Slam” Restorative Dentistry

DAVID M. BONNER, D.D.S., M.A.G.D.

OVERVIEW

Today's dentists have more opportunities than ever before to successfully practice esthetic dentistry – providing needed dentistry beautifully. Dr. Bonner has the gift of sorting through the vast array of new materials and techniques to help dentists simplify the complexities of doing excellent restorative dentistry. This presentation empowers dentists and their teams with the use of modern materials and techniques to predictably provide patients with beautiful long lasting restorations. The numerous clinical and business “pearls” presented enhance the ease, joy, and dental team approach to clinical dentistry. This is a course for the entire dental team.

OBJECTIVES

The participant will learn about:
- Creating Life-like Direct Anterior Restorations, including Class IV, direct veneers, and diastema closure
- Porcelain veneers “simplified” from smile design, preparation, beautiful temporization, ease in bonding, to rapid clean-up
- Principles of Full-Mouth Reconstruction
- Eliminating the Problem of Post-op Sensitivity
- Creating Excellent Posterior Esthetic Restorations
- Great posterior contacts through new and improved matrix systems
- Update on the Latest Techniques & Materials in Adhesion Dentistry
- Eliminate the “generation” confusion about bonding agents
- Impressions – How to get them perfect every time
- Clinical Pearls that enhance the Ease & Predictability of Practice
- Business Systems that Enhance Clinical Practice & Profitability
- How a MBA approaches Dental Fees
- Strategic and Financial Planning

PRESENTER

DAVID M. BONNER, D.D.S., M.B.A., M.A.G.D., F.I.C.D., F.I.C.O.I., received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1980. He earned his MBA in Health Care Management from Texas Tech University. His private practice is focused on esthetic dentistry. He is also an adjunct clinical professor at the UTHSCSA dental school. Dr. Bonner is an accomplished dentist, professor, author, researcher, and professional speaker who is passionate about dentistry. Dr. Bonner has served as President of the Panhandle District Dental Society and as a Vice-President for the Texas Academy of General Dentistry.

Lecture Course

Oral Cancer: From Diagnosis to Management

MICHAEL A. HUBER, D.D.S.

OVERVIEW

Successful management of the oral cancer patient requires a multidisciplinary effort, in which the dental professional plays a critical role. An estimated 29,000 new cases of oral and pharyngeal will be diagnosed this year, many as a consequence of an oral screening provided by a dentist. Research over the past decade has produced several advances improving the profession’s ability to diagnose, treat, and manage the short and long-term consequences of oral cancer. Ultimately, however, successful cancer therapy often incurs life-long impairments, which may adversely affect the patient’s quality of life. As many of the impairments directly affect the oral cavity, the dentist will be frequently called upon to manage many of these impairments such as mucositis, xerostomia, increased caries, and disfigurement. This course will provide a review of the most contemporary approaches to manage the oral cancer patient, from diagnosis to management.

OBJECTIVES

- The participants will learn about:
  - Epidemiologic overview
  - Cancer prevention
  - Diagnostic/Screening modalities
  - Contemporary treatment strategies
  - During-treatment care
  - After-treatment care

PRESENTER

MICHAEL A. HUBER, D.D.S., received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1980. He continued with postgraduate training in Oral Medicine and Maxillofacial Radiology at the National Naval Dental Center, Bethesda, Maryland in 1986 and received a Certificate in Oral Medicine in 1989. Upon his retirement from the United States Navy in 2002, Dr. Huber joined the faculty as an Assistant Professor in the Division of Oral Medicine, Department of Comprehensive Dentistry at The University of Texas Health Science Center at San Antonio, Dental School.

Lecture Course

Contemporary Aesthetic Treatment Options: An Overview of Self-Ligating Aesthetic Bracket Systems & A Review of Early Orthodontic Treatment Indications
CARLOS NURKO D.D.S., M.S.

OVERVIEW FOR AESTHETIC BRACKET SYSTEMS
We are confronted to be familiar with these new orthodontic aesthetic treatment options in order to be able to fulfill market demands

- An increasing interest for non-traditional aesthetic orthodontics in both adults & teenagers, to improve facial aesthetics & quality of life
- 1 in 5 people in orthodontic care are adults, up 60% from 10 years ago

OBJECTIVES FOR AESTHETIC BRACKET SYSTEMS
- List the different contemporary orthodontic esthetic treatment options with an emphasis in using self-ligating aesthetic bracket systems
- Introduce the Lingual Minor Tooth Movement, presenting clinical indications, case selection and clinical cases

OVERVIEW FOR EARLY ORTHODONTICS
The “Gold Standard” for initiating orthodontic treatment is known to be during the adolescent growth spurt, and or the late mixed to early permanent dentition, this timing has shown to be the most effective and efficient. Why deviate from this standard and initiate treatment earlier?

OBJECTIVES FOR EARLY ORTHODONTICS
At the completion of this course, participants should understand:

- What orthodontic problems are effectively and efficiently managed early
- Review the literature and the different indications for early orthodontic treatment presenting different clinical cases like: early space loss, sucking habits, crowding, anterior and posterior crossbites, Class II, Class III, anklyosed molars, impactions, supernumerary teeth, and orofacial trauma.
- 3D CBCT imaging technology as a tool for diagnosis, treatment planning and patient education for the cases presented

PRESENTER
CARLOS NURKO D.D.S., M.S., obtained his Doctor of Dental Surgery degree from Universidad Nacional Autonoma de Mexico in 1992. He completed a pediatric dentistry residency at the University of Alabama at Birmingham in 1996. He was faculty at the University of Texas Health Science Center at San Antonio from 1996-2001, and then received his certificate in orthodontics from the University of North Carolina at Chapel Hill in 2004.

OVERVIEW
CAD/CAM guided surgery in implant dentistry can significantly improve the safety and predictability of the outcome of dental implant treatment. However, inadequate understanding and usage of CAD/CAM guided implant surgery system may result in catastrophic surgical failures.

OBJECTIVES
• Understand the concept of CAD/CAM guided implant surgery
• Case selection, impression, CBCT taking, virtual surgical plan, surgical guide design and clinical try in.
• Understand the limitation and errors of CAD/CAM guided implant surgery
• Learn preventive measures and solutions to reduce errors.
• Practice the surgical protocol of CAD/CAM Guided Implant Surgery with a model and guides through the hands-on session.

JACOB G. PARK, D.D.S., is a Professor of Dentistry / Clinical in the Department of Comprehensive Dentistry at UT Health San Antonio, holds fellowships, and serves as a chairman of Subcommittee 9. CAD CAM in Dentistry of the Standards Committee - Dental Products of the ADA.

SIL PARK, D.M.D., is a full time Clinical Associate Professor in the Division of Advanced Prosthodontics at the UCLA School of Dentistry, where he teaches pre-doctoral and post-doctoral conventional and Implant prosthodontics.

Lecture Course for the Entire Dental Team
Management of Dental Trauma in the Pediatric Patient
LINA M. CARDENAS, D.D.S., M.S., Ph.D.

OVERVIEW
Dental trauma is part of the General and Pediatric Dentistry practice. Current research has led to a better understanding of the healing mechanisms that translate into better clinical protocols for the management of trauma. The course will start with an introduction to trauma and the evaluation of the patient with trauma. Then, a review of the classification, diagnosis and treatment of traumatic lesions is presented. Finally, several clinical cases will be presented and discussed.

A review of the current guidelines (from the American Academy of Endodontics, the International Association of Dental Traumatology and the American Academy of Pediatric Dentistry) for the management of dental trauma in the primary and permanent dentition will be presented. Easy-to-use decision analysis and protocols for the emergency treatment as well as follow-up and referral needs will also be discussed.

OBJECTIVES
Present a systematic way of gathering trauma history. Review the classification of traumatic dental injuries. Discuss the diagnosis, emergency treatment and follow-up in primary tooth trauma according to type of injury. Discuss the diagnosis, emergency treatment and follow-up in permanent tooth trauma according to type of injury. Present clinical cases of primary and permanent tooth trauma.

PRESENTERS
LINA M. CARDENAS, D.D.S., M.S., Ph.D., obtained her first dental degree from CES University on Columbia in 1992. She received her second degree at the UTHSCSA, graduating Magna Cum Laude. She traveled to Nagasaki University and received a combined degree in Pediatric Dentistry with a PhD in Dental Science. Following that, she completed a combined three year specialty training in Pediatric Dentistry with a Master of Science at the University of North Carolina at Chapel Hill. She is a Board Certified Pediatric Dentist.

ERNEST B. LUCE, D.D.S., received his DDS degree from the University of Texas Health Science Center at Houston in 1985. In 1986, he completed a one year General Practice Residency at The University of Texas Health Science Center at San Antonio. Upon completion, Dr. Luce joined the Department of Comprehensive Dentistry at The UT Health Science Center at San Antonio. Currently, he is a Clinical Associate Professor at the Health Science Center, and he also maintains a part time private practice in general dentistry in San Antonio.

His teaching duties include didactic presentations as well as clinical supervision of graduate general dentistry residents. Dr. Luce served as Head of the Graduate Division of the Department of General Dentistry and Program Director for the General Practice Residency at UT Health Science Center at San Antonio from 1993 to 1999.

TWO STEP SAVINGS
Register before April 20, 2018 to receive a 15% discount. Register before May 18, 2018 to receive a 12% discount.

Tuition:
- Dentist: $220.00
- Dentist: $220.00 - 15% = $187.00
- Dentist: $220.00 - 12% = $194.00
- Allied Dental Personnel: $180.00
- Allied Dental Personnel: $180.00 -15% = $153.00
- Allied Dental Personnel: $180.00 -12% = $158.00

JUNE 15
TSBDE-Approved Course for Recertification
Review Course in Moderate Sedation & Advanced Emergency Procedures in the Dental Office (Level 2 and Level 3 Sedation review)
ERNEST B. LUCE, D.D.S.

OVERVIEW
The Texas State Board of Dental Examiners (TSBDE) requires level 2 and level 3 sedation permit holders to complete approved continuing education every 2 years to maintain the sedation permit. This must take the form of ACLS, PALS or an approved sedation review course. Individuals who complete the entire course will receive a certificate that can be submitted to the TSBDE to document completion of the approved moderate sedation review course. Level 2 and 3 permit holders must also complete every 2 years an additional 8 hours of medical emergency or sedation related CE separate from the ACLS, PALS or this *approved* course.

OBJECTIVES
- Review the Texas rules and regulations regarding the administration of moderate enteral and moderate parenteral sedation.
- Update the dentist on patient evaluation for the administration of moderate sedation.
- Update the dentist on monitoring techniques for moderate sedation.
- Update the dentist on pharmacology related to moderate sedation.
- Update the dentist on the management of sedation emergencies and common medical emergencies.
- Review basic EKG interpretation.
- Review airway management techniques useful in the administration of moderate sedation.
- Review risk management in moderate conscious sedation.

PRESENTERS
LINA M. CARDENAS, D.D.S., M.S., Ph.D., obtained her first dental degree from CES University on Columbia in 1992. She received her second degree at the UTHSCSA, graduating Magna Cum Laude. She traveled to Nagasaki University and received a combined degree in Pediatric Dentistry with a PhD in Dental Science. Following that, she completed a combined three year specialty training in Pediatric Dentistry with a Master of Science at the University of North Carolina at Chapel Hill. She is a Board Certified Pediatric Dentist.

ERNEST B. LUCE, D.D.S., received his DDS degree from the University of Texas Health Science Center at Houston in 1985. In 1986, he completed a one year General Practice Residency at The University of Texas Health Science Center at San Antonio. Upon completion, Dr. Luce joined the Department of Comprehensive Dentistry at The UT Health Science Center at San Antonio. Currently, he is a Clinical Associate Professor at the Health Science Center, and he also maintains a part time private practice in general dentistry in San Antonio.

His teaching duties include didactic presentations as well as clinical supervision of graduate general dentistry residents. Dr. Luce served as Head of the Graduate Division of the Department of General Dentistry and Program Director for the General Practice Residency at UT Health Science Center at San Antonio from 1993 to 1999.

Dr. KOHNER

JAMES S. KOHNER, D.D.S., received his dental degree from The Ohio State University, University Dental School, and Case Western Reserve University Dental School, and obtained his certification in Periodontics from the Boston University School of Graduate Dentistry. He currently lives in Scottsdale, Arizona. Dr. Kohner is an experienced teacher who has presented courses on Soft Tissue Grafting to a wide range of audiences, including many state associations all over the US and in 8 foreign countries, and has presented at the American Academy of Periodontology meetings for many years. He has been teaching for the Perio Institute since 2003.

TIME
Check-in: TBD, 8:00 AM
Program: Friday, 9:00 AM - 5:00 PM

LOCATION
UT Health San Antonio, School of Dentistry

http://smile.uthscsa.edu
OVERVIEW
This one-day course will focus on recognition and management of medical emergencies in the dental office. Course format will minimize lecture in order to maximize practice time on a sophisticated, computerized human simulator device, SimMan. Only a limited number of participants will be in each class in order to ensure plenty of time for each person to practice on the manikin.

Activities will include basic and advanced ventilation techniques including use of several airway devices, as well as the use of many emergency drugs, including sedation reversal drugs. In addition, intraosseous drug administration on pig feet and cricothyrotomy on pig trachea will be discussed, demonstrated and practiced. Cardiac defibrillation will be part of several of the practice situations.

OBJECTIVES
Upon completion of the course, participants will:

• Recognize an evolving medical or sedation emergency
• Understand the use and placement of basic and advanced airway devices
• Use and administration of emergency medications
• Understand critical thinking and problem solving in medical/sedation emergencies
• Develop leadership skills as they apply to emergency management

PRESENTER
ERNEST B. LUCE, D.D.S., received his DDS degree from the University of Texas Health Science Center at Houston in 1985. In June of 1986, he completed a one year General Practice Residency at The University of Texas Health Science Center at San Antonio. Upon completion of the residency, Dr. Luce joined the Department of Comprehensive Dentistry at The University of Texas Health Science Center at San Antonio. Currently, he is a Clinical Associate Professor at the Health Science Center, and he also maintains a part time private practice in general dentistry in San Antonio.

COURSE DESCRIPTION
“L-PRF (Leukocyte-Platelet Rich Fibrin) Technique Overview to Clinical Applications Hands-on

ROBERT J. MILLER, DDS, FACD, DABO

A program to benefit the Advanced Education in General Dentistry Program

PRESENTER
ROBERT J. MILLER, DDS, FACD, DABO, received his B.A. from New York University and M.A. from Hofstra University, both in biology. He graduated with honors from New York University College of Dentistry where he received the International College of Dentists Award for clinical excellence and then completed his residency at Flushing Medical Center in New York City. He is a board certified Diplomate of the American Board of Oral Implantology.

TIME
Check-in: TBD, 8:00 AM
Program: Friday, 9:00 AM-5:00 PM

LOCATION
UT Health San Antonio, Main Campus

TUITION
Individual: $450.00
Register before May 15, 2018: $350.00

CREDIT (Course Code: 162012A) Hours: 7

The School of Dentistry thanks Intra-Lock International for its unrestricted educational grant in support of this continuing education program.
OVERVIEW
This course will satisfy the Texas State Board Dental Examiners adopted new rule 108.14 regarding pediatric stabilization. The new rule requires that a dentist who wishes to utilize pediatric stabilization obtain advanced training by either an accredited post-doctoral program or pediatric dentistry residency program that provides clinical and didactic education in advanced behavior management techniques or an extensive and focused continuing education course of no less than 8 hours in advanced behavior management that includes both didactic and clinical education pertaining to Protective Stabilization.

OBJECTIVES
• Scientific evidence will be discussed for indications and application of commonly used behavior guidance techniques
• Review the objectives, indications, contraindications and precautions for the various modalities of protective stabilization
• Gain an understanding for the application of basic and advanced behavior guidance modalities in the context of today’s parental and societal expectations and limitations
• This lecture will also include a hands-on demonstration of the proper use of stabilization devices

PRESENTERS
CLAUDIA I. CONTRERAS, D.D.S., received her D.D.S. degree from the National University of Mexico City, Mexico City, Mexico in 1993. She continued with her postgraduate training as a Preceptor in Pediatric Dentistry at The University of Texas Health Science Center at San Antonio in 1999. This was followed by an Internship in Pediatric Dentistry at the University of Puerto Rico, San Juan, Puerto Rico where she attained her Certificate in Pediatric Dentistry in June, 2004. She currently serves as an Assistant Professor in the Department of Developmental Dentistry at UTHealthSA.

MARIA-JOSE CERVANTES MENDEZ D.D.S., M.S., earned her dental degree at the Intercontinental University at Mexico City (UIC). After working as a general practitioner, she completed her pediatric dentistry residency at the UT Health Science Center San Antonio and earned a master’s degree in orthodontics at UIC. She serves as the Postdoctoral Program Director in Pediatric Dentistry. As a full time faculty, she provides didactic and clinical teaching for both pre-doctoral and post-doctoral students.

TIME
Check-in: TBD, 7:30 AM
Program: Friday, 8:00 AM-5:00 PM

LOCATION
UT Health San Antonio, School of Dentistry

TUITION
Dentist: $595.00
Hygienist: $415.00

CREDIT

AGD Code: 430
Hours: 8

The School of Dentistry thanks Sponsored Care Co, Inc for its unrestricted educational grant in support of this continuing education program.

http://smile.uthscsa.edu (210) 567-3177
OVERVIEW
New ultrasonic instruments allow slimmer inserts to be operated at a higher power, and curved inserts for better adaptation. A case based format will be utilized to introduce new techniques for improving calculus removal skills with difficult periodontal patients. Mary has attended and been asked to present at the Ultrasonic Scaling Teaching Institute. This course will bring the latest information in ultrasonic instrumentation in a combined classroom and ‘hand-on’ session.

OBJECTIVES
By attending this workshop participants will:
• Review the evolution of ultrasonic instrumentation
• Review the anatomy of the root surface of teeth
• Develop strategies to accomplish non-surgical periodontal instrumentation
• Practice with slim inserts on specially prepared typodonts
• Practice with curved inserts on specially prepared typodonts.

PRESENTERS
JUDY A. ALVARADO, M.Ed., R.D.H.
holds a full-time Dental Hygiene faculty position at UT Health San Antonio in the Department of Periodontics. She graduated from UTHSCSA Dental Hygiene Program in 1992. In 2014, she completed her Masters in Education from Concordia University, Portland Oregon.

VIRGINIA G. CARRILLIO, R.D.H, M.Ed.
earned her Bachelor of Science from the University of Texas Health Science Center San Antonio in Dental Hygiene in 2004 and earned her Master’s in in Educational Leadership from Concordia University, Portland, Oregon 2014. Carrillio is also a Course Director and a Clinical Instructor at UTHSCSA.

TIME
Check-in: TBD, 8:00 AM
Program: Friday, 9:00 AM-12:00 PM

OFFSITE COURSE

**CAD/CAM Dentistry, Esthetics & Occlusion**

A Partnership between

UT Health San Antonio

SAN ANTONIO INSTITUTE FOR DENTISTRY

**OVERVIEW**

This course is designed to aid the restorative dentist in providing more comprehensive diagnostic treatment planning and clinical treatment skills. CAD CAM dentistry is on the cutting edge of advanced restorative care. Although an increasing number of dentists are interested in offering this treatment to their patient, there is not enough information available, especially regarding occlusion.

**OBJECTIVES**

- Digital Impression Systems
- Complete Chair-side Systems
- Milling Centers
- Case Selection
- Tooth wear
- Parafuction and Bruxism
- CO-CR Slide
- Occlusal Adjustment
- Parafuction and Bruxism
- CO-CR Slide
- Occlusal Adjustment
- Management of two step occlusion
- Virtual Articulation
- Single visit restoration
- Materials
- Prep Designs for Veneers, Inlays, Onlays, Crowns and Bridge

**JACOB G. PARK, D.D.S.,** is a Professor of Dentistry / Clinical in the Department of Comprehensive Dentistry. He teaches TMJ part of Gross Anatomy as a Professor/ Clinical in the department of Cellular and Structural Biology. Both departments at UT Health San Antonio

**TIME:** Check-in: SAID, 8:00 AM
Program: Friday, 9:00 AM-5:00 PM

**OFF-SITE LOCATION**
San Antonio Institute for Dentistry
7434 Louis Pasteur #303
San Antonio, Texas 78229

AGD Code: 780 Hours: 7

(210) 567-3177

AUGUST 3

**OFFSITE COURSE**

**A Lecture/Participation Course**

**Minimally Invasive Implant Dentistry**

**WILLIAM C. RODDY, D.D.S.**

**OVERVIEW**

Every 8 minutes someone in the US turns 60. 25% of Americans over 60 are edentulous, 58% over 50 have less than 21 teeth. Our patients are living longer, but many are plagued with ill-fitting prostheses, dry mouth, and root caries- at the time their access to their trusted dentist is limited. Many of these patients would benefit greatly from dental implants, but who is going to make them affordable and readily available? Modern surgical techniques make it possible to treat the majority of implant patients in the general practice setting, efficiently and with minimal morbidity. Today it is possible to not only lower prices but also make these the most profitable procedures in your office by many-fold. You can also decrease costs to the patient in terms of fewer and shorter duration visits, decreased pain, bleeding and post-op complications, and easier and less costly repair and rework. In addition, recent advances in the dental laboratory industry now make what once were the most advanced and costly implant prostheses routine and very affordable dentistry.

**OBJECTIVES**

- Describe the advantages of flapless implant surgery over conventional placement using a flap.
- Understand the various approaches to interpositional grafting, and indications for each approach.
- Know the techniques and armamentarium for crestal approach sinus grafting.
- Understand the advantages and indications for immediate loading of dental implants.
- Understand the interface between dental laboratory CAD/Cam technology and surgical guide fabrication for immediate load full arch prostheses.
- Hands-on experience using models for implant placement and crestal approach sinus augmentation.

**PRESENTER**

WILLIAM C. RODDY, D.D.S., obtained his dental degree from the University of Iowa in 1979. After he completed dental school, he served in the U.S. Navy from 1979-1999, retiring at the rank of Captain. During his Naval dental career, Dr. Roddy completed a Prosthodontics Fellowship and a Comprehensive Postdoctoral Residency. Other tours included shipboard duty, co-director of a General Practice Residency program, base prosthodontist, base endodontist, service as examining member of the Federal Services Board of Comprehensive Dentistry, and Head of Clinical Investigations at the Naval Dental Research Institute, and Clinic Director. He was also granted two patents.

**TIME**

Check-in: TBD, 8:00 AM
Program: Friday, 9:00 AM-5:00 PM

**LOCATION**

UT Health San Antonio, School of Dentistry

**TUITION**

Dentist: $280.00
Dentist: $290.00 - 15% = $238.00
Dentist: $280.00 - 12% = $246.00

AGD Code: 29 Hours: 3

AUGUST 3

**Lecture Course**

**Achieving Predictable, Clinical Outcomes For Restorative Success Utilizing Conventional & Digital Dentistry**

**ROBERT P. MARBACH, B.A., C.D.T.**

**OVERVIEW**

This lecture will discuss and illustrate the latest in CAD/CAM digital technology relating to you, your assistant, and your lab. Identify the basics of occlusion and how it relates to the success of anterior restorations and full mouth rehabilitation. Facing the esthetic challenges in your practice to decide today what type of restoration is best for your patient. View clinical secrets on preps, temps, impressions, cements, and why is shade selection difficult and how to get it right the first time.

**OBJECTIVES**

- Identify the problems associated with color and lighting and how to improve our shade-taking ability
- Trouble shoot impression techniques and materials to get perfect impressions
- Apply the communication tools needed to achieve optimal results between you and the lab
- Understand the basics of occlusion in restoring anterior teeth.
- Know what questions to ask and tools required to achieve excellent anterior esthetics...
- Apply tools to build a more successful practice through image building and marketing.

**PRESENTER**

ROBERT P. MARBACH, BA, CDT is the founder and owner of Authentic Dental Lab in San Antonio, TX. He is a past Board of Director at The Pankey Institute. Mr. Marbach is a Board Certified Dental Technician currently working on his Masters in dental technology and has over 25 years of dental experience. In 1999 Bob received his Technical Certificate of Completion from the Pankey Institute. Mr. Marbach is a past member of the Advisory Board for The Canadian Journal of Dental Technology.

**TIME**

Check-in: TBD, 8:00 AM
Program: Friday, 9:00 AM-12:00 PM

**LOCATION**

UT Health San Antonio, School of Dentistry

**TUITION**

Dentist: $150.00
Certified Dental Technician: $125.00

GET READY FOR...

The 33rd Annual
James P. HOLLERS MEMORIAL LECTURESHP

Mark your Calendar

Friday, November 9, 2018

NORRIS CONFERENCE CENTER • SAN ANTONIO

Bring the Dental Team. New techniques, new technologies to learn.

Our Speakers are experienced in their choice of topics. Lectures are approved for CE hours.

Visit our vendors in the Exhibit Hall. Learn about their products and services that can improve your profession.

http://smile.uthscsa.edu
Dr. Robert A. Lowe graduated magna cum laude from Loyola University School of Dentistry in 1982 and was a Clinical Professor in Restorative Dentistry until its closure in 1993. He maintains a private practice in Charlotte, lectures internationally, and publishes on aesthetic and restorative dentistry. In 2004, he received the Gordon Christensen Outstanding Lecturers Award, and in 2005, Diplomat status on the American Board of Esthetic Dentistry.

“Practical Excellence In Restorative Dentistry: Integrating Modern Technologies With Proven Results”

OVERVIEW
In this technique filled seminar, new technologies and techniques will be discussed along with how implementation of these technologies can help you create consistent quality and the “bottom line” of your practice. A discussion regarding the latest dental materials and delivery modalities will help in treatment planning even the most difficult functional and aesthetically challenging cases.

OBJECTIVES - Each participant will learn:
1. How to use some of the latest composite and bioactive restorative materials to save time and create excellent clinical results.
2. How to refine techniques to create “perfect” master impressions and have successful cementation of all types of aesthetic restorations.
3. Unique options to ceramic for indirect aesthetic restorations in anterior region.
4. How to “orthodontically” prepare teeth systematically to correct the clinical crown orientation to correct tooth misalignment when patients decide conventional orthodontics is not for them.

VENDORS
Show off your products and/or services to a multi-generation of dental professionals.

Hollers is a wonderful event to get your brand noticed.

Call to reserve a booth: 210-567-3177
Lecture Course for the Entire Dental Team

Fundamentals and Advances in Resin Composites, Adhesive Systems and Cements

SHARUKH S. KHAJOTIA, B.D.S., M.S., PH.D

OVERVIEW
Resin composites, bonding agents and dental cements are constantly evolving areas of restorative dentistry. Dentists are faced with a vast array of restorative dental biomaterials, and are expected to separate advertising from reality. In this presentation, Dr. Khajotia will differentiate among the various categories of resin composites, adhesive systems and resin luting cements from the perspective of critical Materials Science considerations and clinical use, without personal bias or commercial interests. During this presentation, Dr. Khajotia will review the composition, manipulation and properties of various types of resin composites including nano-hybrid, nano-filled, flowable and bulk-filled categories. Dr. Khajotia will then provide attendees with a unique insight into current research in his laboratory on the development of an antibacterial bonding system. He will also discuss interactions between oral biofilms and polymer-based dental biomaterials based on his research efforts. Tools will be provided to assist participants with reviewing and selecting restorative biomaterials.

OBJECTIVES
- Composition and properties of resin composite
- Benefits and limitations of resin composites
- Innovations in polymer chemistry
- Properties of bonding agents
- Benefits and limitations of bonding agents
- Developing an antibacterial adhesive system
- Composition of resin luting cements
- Benefits and limitations of resin luting cements
- Interactions between oral biofilms and polymer-based dental biomaterials
- Concepts about dental biomaterials
- Tools for the review of dental biomaterials

PRESENTER
SHARUKH S. KHAJOTIA, B.D.S., M.S., PH.D., attained a dental degree from Nair hospital Dental College, university of Bombay, India (1988), a Master of Science degree in Dental Biomaterials from Marquette university (1992), and a Ph.D. in oral Biology from the Medical College of Georgia (1997). He is currently the assistant Dean for research as well as Professor and Chair of the Department of Dental Materials in the College of Dentistry at the University of Oklahoma. He also holds appointments in the OU health Sciences Center Graduate College and the OU School of Chemical, Biological and Materials Engineering.

TIME
Check-in: TBD, 8:00 AM
Program: Friday, 9:00 AM-12:00 PM

LOCATION
UT Health San Antonio, School of Dentistry

TUITION
Individual: $125.00
CREDIT (Course Code: 162033A) AGD Code 250/780 Hours: 3

SPECIAL FEE OFFER
Register for the morning program and receive a 30% discount on either of the afternoon Texas Briefs. Lunch is included for the participants attending both sessions.
Beyond the Classroom

Online Learning from The Office of Continuing Dental Education at UT Health San Antonio
http://smile.uthscsa.edu

(210) 567-3177
ANESTHESIA AND PAIN CONTROL
- Combination - Inhalation Enteral (Oral)
- Minimal Sedation Level 1 (Texas Certification Continuum Course 12 sections)
- Minimal Enteral (Oral) Sedation (Level 1) Permit Renewal Course (Texas Certification Continuum Course 7 sections)
- Nitrous Oxide Conscious Sedation: For Dentists (Texas Certification Continuum Course 9 hours of didactic)
- Monitoring the Administration of Nitrous Oxide: For Dental Hygienists and Assistants (Texas Certification Continuum Course 9 hours of didactic)
- Triazolam (Halcion) Sedation as an Alternative to IV Sedation (1 section)

DENTAL ASSISTING
- Dental Assistant Registration Course and Examination (Texas Certification Continuum Course 8 hours of didactic)

DENTAL DIGITAL RADIOGRAPHY
- Using 3D Imaging: The New Standard of Care (1 section)

DENTAL HYGIENE
- Instrument Sharpening (1 hour of didactic)

DENTAL MATERIALS
- Dental Materials in Modern Dentistry (1 section)

DIAGNOSIS AND TREATMENT PLANNING
- Patient Management…From A Non Clinical Perspective (1 section)
- Team-Driven, Patient Centered, Practice Management (3 sections)

ENDODONTICS
- Perforations: The Endodontic Dilemma
- Anterior Endodontics For The General Practitioner (1 section)
- Instrumentation: The Science and The Art (1 section)
- Options For The Endodontically Compromised Tooth (1 section)
- Obturation: Basis, Objectives, and Techniques (1 section)
- Endodontic Retreatment: Achieving Success the Second Time (2 sections)
- The Essentials of Endodontic Diagnosis (1 section)
- The Endontic Dillema (1 section)
- Cracked Tooth Syndrome (1 section)
- Endodontic Management of Immature Permanent Teeth (1 section)
- Vertical Fractures: Diagnosing Vertical Root Fractures with new and Advanced Imaging Technologies (1 section)

ERGONOMICS
- Seven Ways To Avoid Carpal Tunnel Syndrome (3 sections)
- Ergonomics in Pain Management (including Carpal Tunnel Syndrome) (five chapters)

ESTHETIC AND COSMETIC DENTISTRY
- Achieving Aesthetic Laminate Veneers (1 section)
- Truth about Zirconia: Clinical Assessment Update (1 section)
- Understanding Current All-Ceramic Systems (1 section)

ETHICS AND LAW
- Lawsuits and HIPAA (1 section)
- Legal Considerations for Today’s Practitioner (2 hours of CE)
- Jurisprudence: How to Avoid A Legal Entanglement (Dental Sleep Medicine) (1 section)

Evidence-Based Practice
- Evidence-Based Practice Skills and Tools for Practitioners (1 section)
- Keep Up-to-date with Biomedical Info

IMPLANTOLOGY
- Buccal Plate Preservation: A Predictable Solution to Anterior Aesthetic Management (1 section)
- Implants, Tissue Control, and Laboratory Communication (1 section)
- The Precision Prosthesis: Attachments Used In Removable Prosthetics (1 section)
- Implants for Patients with Diabetes…What to do? (1 section)
- Mini Implants: An Alternative Treatment Option (1 section)
- Extraction Site Grafting for Future Implants (1 section)
- Using Technology in Implant Dentistry (1 section)
- Potpourri of Common Problems in Implant Surgery (1 section)
- Dental Implant and Alternative Options featuring Informed Consent for your Patients (1 hour of Continuing Education)
- Mandibular Tissue Supported Implant-Retained Overdentures (1 section)
- Graftless Solutions for Implant Placement (1 section)

INFECTION CONTROL AND DENTAL WASTE MANAGEMENT
- Antibacterial Chemotherapy in Dentistry (2 sections)
- OSHA 2014 update (Certification Continuum Course 3 sections)

MEDICAL EMERGENCIES IN THE DENTAL OFFICE
- Emergency Medicine (2 sections)
- Emergency Medicine in Dentistry 3 (4 hours of CE per section)

NUTRITION
- Guidelines on Teaching Patients How Diet Affects Oral Health (1 section)

OCCLUSION
- Intraoral Appliance Alternatives (1 section)
- Occlusion Made Simple (1 section)
- Is Occlusion Dead or Just Sleeping It Off? (1 section)

OPERATIVE DENTISTRY
- The Precision Prosthesis Attachments used in Removable Prosthetics (1 section)
- Complex Prosthetics in General Practice, “What to do, How to do it and When” (3 sections)

OPIOID CRISIS
- Developed to satisfy the Tex. Admin. Code, Title 22, Part 5, Chap. 111, Rules 111.1 and 111.2. Regarding a practitioners’ privileges to write for controlled substances.

ORAL AND MAXILLOFACIAL SURGERY
- Wisdom Teeth Diagnosis and Management (1 section)
- Oral Surgery 101: Basics in Oral Surgery (3 sections)

ORAL CANCER
- Oral Cancer: Update on Risk Factors, Adjunctive Diagnostic Aids, and Management Strategies & Complications (3 sections)
- Review of Common Oral Lesions (3 sections)
- Update on Oral Cancer Adjuncts and the Future (1 section)
- The Patient on Anticoagulant Therapy, What’s New? (1 section)

ORAL MEDICINE
- The Right (and Wrong) Way to Treat Pain (2 sections)
- Orolabial Herpetic Infections Diagnosis and Treatment (1 section)
- Oropharyngeal Candidiasis Diagnosis and Treatment (1 section)
- Salivary Gland Dysfunction Diagnosis and Treatment (1 section)
- Solar (Actinic) Cheilosis Diagnosis and Treatment (1 section)

ORAL PATHOLOGY
- Orolabial Herpetic Infections Diagnosis and Treatment (1 section)
- Oropharyngeal Candidiasis Diagnosis and Treatment (1 section)
- Salivary Gland Dysfunction Diagnosis and Treatment (1 section)
- Solar (Actinic) Cheilosis Diagnosis and Treatment (1 section)

ORAL PATHOLOGY
- Orolabial Herpetic Infections Diagnosis and Treatment (1 section)
- Oropharyngeal Candidiasis Diagnosis and Treatment (1 section)
- Salivary Gland Dysfunction Diagnosis and Treatment (1 section)
- Solar (Actinic) Cheilosis Diagnosis and Treatment (1 section)
Online Learning Opportunities

**ORAL/SYSTEMIC DISEASE LINKS**
- The Patient with Endocrine Disorders (2 sections)
- Hypertension: Risk Stratification and Patient Management in the Oral Health Care Setting (2 sections)
- Teaching Oral Disease Prevention and Health Promotion (1 section)

**OROFACIAL PAIN**
- The Right (and Wrong) Way to Treat Pain (2 sections)
  - Facial Pain not caused by teeth (3 sections)

**ORTHODONTICS**
- How to Take Perfect PVS Impressions Every Time (1 section)
- Increasing Role of Orthodontics in Interdisciplinary Treatment (1 section)

**OSHA & INFECTION CONTROL**
- OSHA 2014 update (Certification Continuum Course/3 sections)

**PATIENT CO-MANAGEMENT**
- Patient Management…From A Non Clinical Perspective (1 section)
- Team-Driven, Patient-Centered, Practice Management (3 sections)

**PEDIATRIC DENTISTRY**
- Dental Trauma in Pediatric Dentistry (5 sections)
- Pediatric Dental Trauma (1 section)
- Trauma in the Pediatric Patient (1 section)
- Pediatric Dentistry Refresher (1 section)
- Antibiotic Prophylaxis for Dental Patients at Risk for Infection (1 section)
- Anomalies of the Pediatric Oral Cavity (1 section)
- Diagnosis and Treatment of Pediatric Oral Trauma (3 sections)

**PERIODONTICS**
- Management Of The Extraction Site (1 section)
- Periodontal and Prosthetic Management of Furcated Teeth (1 section)
- Update on Bone Grafting (1 section)
- Update on Bone Substitutes: “What Every Dentist Needs to Know” (1 section)
- Evidence You Need to Know About Periodontal Treatment: “What Works and What Doesn’t” Part 1 & 2 (Part 1 - 1 section)/Part 2 - 1 section)
- Crown Lengthening: A Powerful Tool for Healthier Gums and Better Crowns (1 section)
- The 3Us of Vitamin D Therapy: Mis-Understood, Unappreciated, Underused (1 section)
- Socket Preservation: Indications and Options (1 section)
- Instrument Sharpening (1 hour of didactic)

**PERSONAL DEVELOPMENT**
- Estate Planning (1 section)

**PHARMACOLOGY**
- The Right (and Wrong) Way to Treat Pain (2 sections)

**PHARMACOLOGY AND THERAPEUTICS**
- Jurisprudence: How to Avoid A Legal Entanglement (Dental Sleep Medicine (1 section)
- Legal Considerations for Today’s Practitioner (2 hours of Continuing Education)

**PRACTICE MANAGEMENT/RISK MANAGEMENT**
- The Precision Prosthesis Attachments used in Removable Prosthetics (1 section)
- Contemporary Complete Dentures, “What Every Dentist Should Know” (1 section)
- Mandibular Tissue Supported Implant-Retained Overdentures (1 section)
- Predictable Complete Dentures III/The Platinum DVD Edition (14 hours of Continuing Education)
- Predictable Complete Dentures: Helpful Hints (6 hours of Continuing Education)
- Difficult Dentures Made Easier: An Alternative To Dental Implants (5 hours of Continuing Education)
- Predictable Complete Dentures (5 hours of Continuing Education)
- Edentulous Impression Trays
- Complex Prosthetics in General Practice, “What to do, How to do it and When” (3 sections)
- Understanding Current All-Ceramic Systems (1 section)

**PROSTHODONTICS (REMOVABLE, FIXED, MAXILLOFACIAL)**
- Emergence Profiles In Natural Tooth Contours (1 section)
- How to Achieve Excellent Marginal Fit and Cervical Contour with Crowns (1 section)
- Impressions Made Simple (6 sections)
- Review of Smile Design Parameters (1 section)
- The Precision Prosthesis Attachments used in Removable Prosthetics (1 section)
- Contemporary Complete Dentures, “What Every Dentist Should Know” (1 section)
- Mandibular Tissue Supported Implant-Retained Overdentures (1 section)
- Predictable Complete Dentures III/The Platinum DVD Edition (14 hours of Continuing Education)
- Predictable Complete Dentures: Helpful Hints (6 hours of Continuing Education)
- Difficult Dentures Made Easier: An Alternative To Dental Implants (5 hours of Continuing Education)
- Predictable Complete Dentures (5 hours of Continuing Education)
- Edentulous Impression Trays
- Complex Prosthetics in General Practice, “What to do, How to do it and When” (3 sections)
- Understanding Current All-Ceramic Systems (1 section)

**REHABILITATION**
- The Right (and Wrong) Way to Treat Pain (2 sections)

**SEDATION**
- Combination - Inhalation Enteral (Oral) Minimal Sedation Level 1 (Texas Certification Continuum Course 12 sections)
- Minimal Enteral (Oral) Sedation Level 1 Permit Renewal Course (Texas Certification Continuum Course/7 sections)
- Nitrous Oxide Conscious Sedation: For Dentists (Texas Certification Continuum Course/9 hours of didactic)
- Monitoring the Administration of Nitrous Oxide: For Dental Hygienists and Assistants (Texas Certification Continuum Course/9 hours of didactic)
- Triazolam (Halcion) Sedation as an Alternative to IV Sedation (1 section)
- Local Anesthesia Administration (4 hours of Continuing Dental Education)

**SLEEP MEDICINE**
- Dental Sleep Medicine

**SPECIAL CARE DENTISTRY**
- Treating the Pregnant Dental Patient (1 section)
- Managing the Medically Compromised Patient (4 sections)
- All on 4 Rehabilitation in the Endentulous Arch: Team Approach
- Update on Oral Cancer Diagnostic Aids

**TMJ/TMD AND MPD**
- Evaluating and Treating TMD (3 sections)

OFF SITE (PARTICIPATION & LECTURE) PROGRAM REFUND POLICY: If you must cancel your registration, please notify the Office of Continuing Dental Education as soon as you determine you are unable to attend so that a refund may be considered. Due to commitments to off-site properties, any cancellation made prior to the start of the program will be subject to an administrative fee assessment of $198.50. Any cancellation made two months or less, prior to the course does not qualify for a refund. However, participants may choose to place their tuition minus an administrative and direct cost fee assessment into a holding account for future use. “No Shows” will not qualify for refunds. Written notification is required within five business days by mail, fax, or e-mail to initiate the refund process. Please allow four to six weeks for all refunds. Specific refund policies may apply to all off-site programs. Contact our office for the specific refund policy regarding any course.

REGISTRATION INFORMATION
TelephoneNumber: (210) 567-3177 • Fax Number: (210) 567-6807 • Web: http://smile.uthscsa.edu

PRE-REGISTRATION: Preregistration for all courses is necessary. It is beneficial for participants to preregister for a course as the course packet will be available for them at final check-in.

The Office of Continuing Dental Education cannot be held responsible for the refund or credit of airline tickets or flight change in the event of a course cancellation or the rescheduling of the program.

Upon registering in any Continuing Dental Education activity, the participant agrees that the University of Texas Health Science Center at San Antonio and their affiliates, and all personnel associated with the program are not responsible or liable for any injuries or other damages sustained by the attendee in connection with the scheduled activity, and the participant hereby releases each of them from any claims against them arising directly or indirectly from any such injury or damage.

The registered participant grants permission to the Office of Continuing Dental Education and its designers and agents to utilize the participant's image, likeness, actions and/or statements in any live or recorded audio, video, or photographic display of any programs, exhibit, publication, or reproduction made of, about, or at, the activity without further authorization or compensation. Participants may not use video or audio recording devices during the course or scheduled event.

Registering for any Continuing Dental Education activity constitutes acceptance of these terms.

PAYMENT BY CREDIT CARD: MasterCard, VISA, or Discover Card only.

ON-SITE CHECK-IN: Please check details for each course for designated time and location of course check-in. Participants can pick up packets one hour prior to the beginning of the course. Same day walk-in enrollments will be accommodated on a space-available basis.

CONFIRMATION: Your registration confirmation will be mailed from our office with your special course and desire special seating request, if applicable. You will also receive a listing of nearby hotels at this time. This will be followed by a final confirmation letter designating the details and location of the educational experience, the course and/or company that will be discussed or considered during the program. Confirmation packets are mailed to those participants who have preregistered and prepaid. Replacements or additional copies of the Certificate of Attendance will be sent to participants who have prepaid an administrative fee of $20.00. Participants who pay on the day of the course will be mailed their Receipt of Payment and Certificate of Attendance.

TUITION DISCOUNT: Recipients of the Kenneth D. Ruddle CDE Participant Award may deduct 5% to 10% from the tuition of designated courses. This special tuition discount is offered to the participants who have attended at least 100 continuing dental education courses sponsored by the Office of Continuing Dental Education, The University of Texas Health Science Center at San Antonio, School of Dentistry.

ACCOMMODATING PEOPLE WITH SPECIAL NEEDS: If you are a person with special needs and desire special seating, please advise us at the time of registering for any type of continuing dental education course. ADA CERP does not approve of any course that a refund may be considered. Any cancellation made prior to the start of the program will be subject to an administrative fee assessment of $99.50. Any cancellation made two months or less, prior to the course does not qualify for a refund. However, participants may choose to transfer their tuition and direct cost fee assessment into a holding account for future use. “No Shows” will not qualify for refunds. Written notification by mail, phone, fax or e-mail must be made to initiate the refund process. Please allow four to six weeks for all refunds. Specific refund policies apply to all off-site, continuum, participation, dental study clubs and multiple series refund policy.

OFF SITE (PARTICIPATION & LECTURE) PROGRAM REFUND POLICY: If you cancel your registration, please notify the Office of Continuing Dental Education as soon as you determine you are unable to attend so that a refund may be considered. Due to commitments to off-site properties, any cancellation made prior to the start of the program will be subject to an administrative fee assessment of $198.50 plus any applicable nonrefundable deposits. Any cancellation made one month or less prior to the course does not qualify for a refund. However, participants may choose to place their tuition or administrative fee assessment into a holding account for future use. “No Shows” will not qualify for refunds. Written notification is required within five business days prior to the course and is subject to the initial mail-in method. Please allow four to six weeks for all refunds. Specific refund policies apply to all off-site programs. Contact our office for the specific refund policy regarding any course.

CONTINUUM, PARTICIPATION, DENTAL STUDY CLUBS, AND MULTIPLE SERIES REFUND POLICY: If you must cancel your registration, please notify the Office of Continuing Dental Education as soon as you determine you are unable to attend so that a refund may be considered. Due to commitments to off-site properties, any cancellation made prior to the start of the program will be subject to an administrative fee assessment of $198.50 plus any applicable nonrefundable deposits. Any cancellation made one month or less prior to the course does not qualify for a refund. However, participants may choose to place their tuition or administrative fee assessment into a holding account for future use. “No Shows” will not qualify for refunds. Written notification is required within five business days prior to the course and is subject to the initial mail-in method. Please allow four to six weeks for all refunds. Specific refund policies apply to all off-site programs. Contact our office for the specific refund policy regarding any course.

INTERACTIVE WEB COURSE REFUND POLICY: If you must cancel your registration, please notify the Office of Continuing Dental Education by sending us an e-mail at smile@uthscsa.edu with your User Code and course title before the START DATE indicated so that your refund may be considered. Cancellations made after the START DATE, will be subject to an administrative fee of $150.00. If you need to cancel, written notice must be received within 10 days of the program/day of the course. You will also receive a list of nearby hotels at this time. Written notification is required within five business days prior to the course and is subject to the initial mail-in method. Please allow four to six weeks for all refunds. Specific refund policies apply to all off-site, continuum, and/or company that will be discussed or considered during the program.

The Office of Continuing Dental Education cannot be held responsible for the refund of airline tickets or flight change in the event of a course cancellation or the rescheduling of the program.

As required by the ADA and our Institutional Compliance and Standard of Conduct, all employees of the Office of Continuing Dental Education and CDE Advisory Committee members have indicated that neither they nor any member of their family have a financial arrangement or affiliation with any corporate organization offering continuing dental education grant monies for these continuing dental education courses.

The University of Texas Health Science at San Antonio is an ADA CERP Recognized Provider. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. UTHSCSA designates the number of credit hours for each course indicated. UTHSCSA is a recognized provider and voluntary, but does not submit claims to ADA CERP. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying qualified providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.
