Continuing Dental Education

23rd Annual Preceptorship in Dental Implantology
Six Weekend Sessions Starting October 6, 2017

PLEASE SHARE THIS PUBLICATION WITH THE ENTIRE DENTAL OFFICE!

Continuing Dental Education 2017-2018 Fall Courses
August • September • October
November • December • January • February
UT Health San Antonio School of Dentistry is raising funds that will grow a new endowment supporting research. This endowment will help finance various research projects for students and if beneficial, support other research funded areas. Financial assistance will also be available for travel expenses and registration fees at conferences where the research results will be presented. This endowment will also support the Annual School of Dentistry Science Symposium. Any size donation is welcome.

The endowment is named after William O. Butler, internationally known Continuing Dental Education Director at UT Health San Antonio School of Dentistry. His 27-year career in dental continuing education was focused on programs that were scientific based.

Bill was the Director of Continuing Dental Education and Alumni Affairs from 1994 to 2017. At the time of his retirement, he was the longest continuous director in a dental school in the United States, having served four years at UMKC prior to San Antonio.

William Oliver Butler received his B.S. in 1972 and his M.S. in 1974. Both degrees were awarded by Kansas State University in Manhattan, Kansas. Bill Butler entered the dental field as Director at the University of Missouri - Kansas City School of Dentistry in November 1990. At the time of hiring, Bill was one of the first non-dental degree, non-Ph.D. directors at a major US dental school. In August 1994 Bill accepted the Director’s position for Continuing Dental Education at The University of Texas Health Science Center San Antonio.

Each year the CE office provides more than 250 educational program opportunities, registers over 12,500 participants annually, and has an active database of over 117,000 dental professionals that have chosen San Antonio to provide them with their life long learning experiences. That says a lot for a school that has a little over 4,000 graduates at the time of Bill’s retirement. The CE program was nominated for consideration for the prestigious Gies Award in 2016.

Bill has been very active over the past twenty-seven years serving our dental profession in many capacities:

- Active Member American Dental Education Association (ADEA)
- Served in an active position of two sections, Continuing Dental Education & Development and Alumni Affairs for 23 straight years
- Recipient of the 2013 ADEA Presidential Citation and the 2016 Chair of the ADEA Board of Director’s Citation
- Associate Member American Dental Association (ADA)
- Past CERP committee member (ADA) and served extra year as a Consultant to CERP committee (ADA)
- Past Continuing Education Provider Recognition (CCEPR) Appeal Board Member (ADA)

He has been recognized and honored by several dental organizations:

- Honorary Member International College of Dentist (ICD)
- Honorary Member San Antonio District Dental Society
- Honorary Member Omicron Kappa Upsilon (OKU)
- Honorary Member Academy of Dentistry International (ADI)

I wish to make a donation to the: William O. Butler Research Endowment

A salute to the Kenneth D. Rudd Award Recipients

In 1974 the Office of Continuing Dental Education began fulfilling the Health Science Center mission by offering lifelong learning programs. While the first graduating classes were under the auditorium attending classes we were conducting our first CE courses in the newly built Dental School. Please join us on campus at one of our programs.

All KDR recipients will receive 5% off the full tuition of any Spring course at the Health Science Center January through May 2017.

We are now recognizing two new levels of the Kenneth D. Rudd recipient award categories; Honoring JoAnne T. Hayashi and Rebecca S. Nixon

Dr. Kenneth D. Rudd
Continuing Dental Education Participant Award…

Dr. Kenneth D. Rudd is Professor Emeritus Department of Prosthodontics, and former Associate Dean for Continuing Dental Education at The University of Texas Health Science Center at San Antonio, School of Dentistry. He was an internationally renown prosthodontist and was recognized for his participation in numerous dental organizations. He had dedicated more than 50 years to the field of dentistry. He was working on specifications for dental materials for the American National Standards Institute/ADA. Your patronage to our continuing dental education courses allows us to continue to recognize his outstanding contributions.

The Kenneth D. Rudd Continuing Dental Education participant who have acquired at least 100 continuing dental education hours of courses as an attendee or presenter sponsored by the Office of Continuing Dental Education at The University of Texas Health Science Center at San Antonio, School of Dentistry.

JoAnne T. Hayashi
Continuing Dental Education Participant Award…

JoAnne T. Hayashi, M.A., a native of San Francisco, California, received her Bachelor of Arts degree in Liberal Arts from the University of California at Berkeley in 1960 and Master of Arts degree in Education from Stanford University, Palo Alto, California in 1961. While at Stanford, she was a member of Pi Lambda Theta, Upsilon Chapter, Honor Society for Women in Education. Prior to joining the Office of CDE, JoAnne assisted in coordinating a continuing education program funded by a grant under the direction of Continuing Education Services at the Health Science Center in 1979. The multi-disciplinary program, A Challenge: Delivering Health Care to the Mexican-American Population in Border Communities, was presented in locations at McAllen, Del Rio, and Laredo, Texas.

In 1980, Ms. Hayashi joined the Office of Continuing Dental Education at the School of Dentistry, reporting to Dr. Kenneth D. Rudd, Associate Dean for Continuing Dental Education until his retirement in 1993. Subsequently, Mr. William O. Butler followed as Director of Continuing Dental Education. In 1985, she was one of the recipients of the Employee Excellence in Service Award presented by The University of Texas Health Science Center at San Antonio.

She retired in January 2006 after 27 years of service as Conference Coordinator, and has spending more time with her six grandchildren who reside in Austin, Texas; Carlsbad, California; and Lakeland, Florida and has been working on a list of ever growing projects, activities, and hobbies.

The JoAnne T. Hayashi Continuing Dental Education participant who have acquired at least 500-749 continuing dental education hours of courses as an attendee or presenter sponsored by the Office of Continuing Dental Education at The University of Texas Health Science Center at San Antonio, School of Dentistry. As a recipient of the JTH Award, the participant will be eligible to receive 8% off the full tuition of any Spring course January through the end of May.

If you feel we have miscalculated your hours, please contact our office so we can research your past attendance records.

Rebecca S. Nixon
Continuing Dental Education Participant Award…

Rebecca S. Nixon, was hired in the Office of Continuing Dental Education in October 26, 1981 as an Administrative Clerk in the Office of the Dental Dean.

A loyal and hard working employee, Becky has remained in the Office of Continuing Education, despite other offers both internally and externally to entice her away. It has always been obvious that she had chosen a career in lifelong learning. Becky worked long hours, was willing to accept and learn new responsibilities, always was willing to be the “volunteer”, and accepted any challenge that was thrown her way. Her career path moved her through the various promotion steps to her current position. Through out her entire career, she has remained committed to making a difference for members of our office, dental school staff and students, and the dental professionals worldwide. Becky has had a vital role in introducing over 84,000 dental professionals, more than 600 internationally known speakers, and over 3,700 alumni to our Dental School.

Becky was promoted to Office Manager in May of 2007 after having served as Administrative Assistant II to the Director since the First of September 1997.

Ms. Nixon’s promotion to Office Manager was largely due to her increased responsibilities and willingness to provide oversight to the Dental School Alumni Association. On September 1, 2002 the Office of Continuing Dental Education was charged with the responsibility of managing the affairs of the Alumni Association. With Becky being the key contact to the alumni of our School of Dentistry.

Becky’s oversight was best described “extremely successful for the Alumni Association” as we continued to maintain our budget goals, establish reserves, and for the first time made plans to use our resources to support the School of Dentistry efforts to meet budget reductions and also enable us to remain solvent in the future. Becky was instrumental in helping establish our strategy and her efforts have worked extremely well; as we have been able to recover all our costs, and stabilize our monthly cash flow.

After 36 years of loyal service to the Office of Continuing Education and the Health Science Center, Becky retired on August 31, 2017. At the time of her retirement Ms. Nixon was recognized as the longest continually employed CE professional at a Dental School nationally.

The Rebecca S. Nixon Continuing Dental Education participant who have acquired at least 750-1000 continuing dental education hours of courses as an attendee or presenter sponsored by the Office of Continuing Dental Education at The University of Texas Health Science Center at San Antonio, School of Dentistry. As a recipient of the RSN Award, the participant will be eligible to receive 10% off the full tuition of any Spring course January through the end of May.

If you feel we have miscalculated your hours, please contact our office so we can research your past attendance records.

Walt Disney once said
“You can dream, create, design and build the most wonderful place in the world…
But it requires people to make the dream a reality”

The above five individuals worked together over a thirty year period and helped Dr. Hollers bring his dream to a reality.

They have passed the torch of responsibility to the new generation of dental professionals.
We now must continue to further build upon their dream.

I wish to make a donation to the: James P. Hollers Memorial Lectureship Endowment
on behalf of these pioneers for dental education

☐ Dr. James Bauerle ☐ Dr. Claude Nabers ☐ Dr. James Hollers ☐ Dr. Billy Rigsby ☐ Dr. Kenneth Rudd
☐ “James P. Hollers book project”

JAMES E. BAUERLE, D.D.S., M.S., was born September 24, 1923, in Hamilton Pool, Texas. He received his D.D.S. from St. Louis University School of Dentistry in 1946. Bauerle specialized in Oral Surgery and received his M.S. in Oral Surgery from the University of Pittsburgh School of Dentistry in 1950. He was appointed by Governor Preston Smith in January, 1973, to serve as a Regent of The University of Texas System for a six-year term. James E. Bauerle, D.D.S. passed on February 6, 2007.

CLAUDE NABERS, D.D.S. was the first Distinguished Lecturer at The James P. Hollers Memorial Lectureship on November 2, 1984. The program was held in the Auditorium at The University of Texas Health Science Center at San Antonio. His dental career began in 1946 when he graduated from the University of Texas School of Dentistry, Houston and later received his MSD at the Northwestern University Dental School in 1949. He has played an integral part in the development of The University of Texas Health Science Center at San Antonio. Dr. Nabers was a member of its Development Board from 1989 to 1994.

JAMES P. HOLLERS, D.D.S. graduated from Tulane College with his dental degree in 1924, and soon re-located to San Antonio, Texas. He became the driving force to establish a major health science center presence for South Texas. One of the turning point events in the long history of San Antonio took place on June 5, 1969 in front of the Alamo under the blazing south Texas sun. Preston Smith, Governor of Texas, signed the legislative bill that authorized the construction of the Dental School in San Antonio as well as the Nursing School and The University of Texas at San Antonio. Proudly looking on, just over Governor Smith’s shoulder, was Dr. Jim Hollers, who on that day saw his twenty year campaign to bring not only a Dental School, but also an entire Medical Center Complex to San Antonio, transformed from dream to reality.

Without a doubt, the history of Medical Education in South Texas and what we now know as the South Texas Medical Center is intertwined with the history of Dr. Jim Hollers. If it’s true that every great enterprise requires the right person, in the right place, at the right time ... then Dr. Jim Hollers was the right person, in the right place, at the right time for San Antonio.

BILLY E. RIGSBY, D.D.S. was born November 7, 1930, in San Augustine, Texas. Dr. Rigsby attended The University of Texas Dental School in Houston, where he graduated with honors in 1958. He was given the opportunity to join four other Dentists to start The University of Texas Dental School in San Antonio, Texas where he served as Associate Dean for Clinical Affairs. He played a major role in the design of the dental school. Billy Edward Rigsby, D.D.S. passed on June 11, 2005.

KENNETH D. RUDD, D.D.S. was born on February 10, 1916 in Marion, Kansas. Dr. Rudd received his DDS degree in 1943 from the University of Missouri School of Dentistry at Kansas City. Dr. Rudd was hired by the University of Texas Health Science Center in San Antonio in 1974, as a tenured full professor in the Department of Prosthodontics and later became Associate Dean of Continuing Education until his retirement in 1994. Kenneth Dielman Rudd, D.D.S. passed on June 14, 2013.

Help our students become...

Another Star for Texas

Consider making a donation to "Distinguished Faculty and Service Award"

Other areas we need your help “Welcome to the Profession”, “The Senior Awards Breakfast”, and “The Family Reception at Graduation”
OBJECTIVES

- Discuss specific restorative planning principles for partially dentate and edentulous patients
- Identify causes of dental implant failures
- Explain restorative thinking in preventing implant failures
- Experience a detailed hands-on session with restorative components
- Leave the course knowing basic implant restorative principles and ready to get started!

PRESENTER

NORMA OLVERA, D.D.S., M.S., obtained her dental degree from The University of Texas Health Science Center at San Antonio in 1987. She completed her post-graduate training in prosthodontics and received her certification and Master of Science in prosthodontics. She is currently an assistant professor in the Department of Comprehensive Dentistry at the University of Texas Health Science Center at San Antonio.

Dr. Olvera has been in full-time private practice as a prosthodontist in Houston, Texas for the past 20 years. She has extensive experience in the area of oral rehabilitation involving all facets of reconstructive dentistry with and without dental implants.

TIME

Check-in: TBD, 8:00 AM
Program: Friday, 9:00 AM - 5:00 PM

LOCATION

UT Health San Antonio, School of Dentistry

TUITION

Dentist: $270.00
Allied Dental Personnel: $170.00

CREDIT (Course Code: 160222B)
AGD Code: 890  Hours: 7

The School of Dentistry thanks Nobel Biocare for its unrestricted educational grants in support of this continuing education series.

OVERVIEW

The lecture will cover comprehensive restorative planning in implant dentistry. The presenter will discuss restorative options to implant success (What has worked/What has not!) and cover clinical case presentations. In addition, the speaker will discuss how to enhance confidence restoring dental implants, as well as, providing better service to our patients.

OVERVIEW

Untreated dental caries and dental trauma can have devastating, and even life-threatening, consequences. Over 50% of pediatric facial swellings are from odontogenic origin. This course will review:

- Background info on pediatric facial swellings
- Clinical assessment of pediatric facial swellings, including: classification, challenges, and five significant ‘Red Flags’
- Clinical management of pediatric facial swellings, including: treatment philosophy, key treatment principles, non-surgical management, surgical management

OBJECTIVES

Upon completion of this course, participants will be able to:

- Recognize the consequences and potential complications of facial swellings in children
- Discuss the classification system for facial swellings based on origin, location and severity
- Recognize the most common non-odontogenic causes of pediatric facial swellings
- Recognize the most common facial spaces involved in pediatric odontogenic infections
- Understand the systematic approach used to assess children presenting with facial swellings
- Identify the 5 significant ‘Red Flags’ frequently associated with pediatric facial swellings
- What drives the decision for hospital admission
- Discuss the core principles of non-surgical (pharmacologic) treatment
- Discuss the core principles of surgical treatment

PRESENTER

JEFFREY C. MABRY, DDS, MS

From the USAF in October, 2006. During his last USAF tour, he served as the Chairman, Pediatric Dentistry, 59th Dental Squadron, 59th Aeromedical Dental Group, Lackland AFB, TX. He served as Chief Military Consultant to the USAF Surgeon General for Pediatric Dentistry. Dr. Mabry serves as a Professor at UT Health San Antonio, Department of Developmental Dentistry and is the Director of the Dental Center at the Children’s Hospital of San Antonio.

TIME

Check-in & Lunch: TBD, 11:30 AM
Program: Thursday, 12:00 PM-1:00 PM

LOCATION

UT Health San Antonio, School of Dentistry

TUITION includes Luncheon and Lecture
Individual: $49.50

CREDIT (Course Code: A)
AGD Code: 257  Hours: 1

LUNCH INCLUDED

Plan to arrive at 11:30 AM. This will give you time to eat before the presentation starts at 12:00 PM. Should you be delayed, you can eat during the presentation.
Texas Brief AM

The Dynamics of Anterior Teeth: Form, Function, and Esthetics

JACK I. SHIRLEY, D.D.S.

OVERVIEW

The clinician is spending more time taking care of anterior teeth. If the dentist is not bleaching them, he or she is covering them with beautiful porcelain. It is time to take a close look at what makes front teeth look beautiful and function correctly. Let’s see if form does follow function. In this course, Dr. Shirley will look at the anatomy of anterior teeth, the esthetics of anterior teeth, how to prepare anterior teeth for crowns and veneers, how to temporize anterior veneers and crowns, and how anterior tooth function.

OBJECTIVES

• Review the anatomy of anterior teeth
• Understand totally how anterior teeth are supposed to function
• Take a close look at what makes front teeth esthetically pleasing
• Preparation of anterior teeth -- crowns and veneers
• Simple methods of temporization
• A quick review of impression technique

PRESENTER

JACK I. SHIRLEY, D.D.S., received his DDS degree from The University of Texas Health Science Center at San Antonio in 1979. He has maintained a private practice in San Antonio, Texas for over twenty years. Dr. Shirley has been associated with the Pankey Institute in Key Biscayne, Florida for eighteen years. He has served as Associate Faculty for thirteen years and is President of the Board of Trustees and a member of the Board of Directors. Dr. Shirley has been selected to represent the Pankey Institute through its speakers Bureau and can be heard through the national at numerous dental meetings speaking about Pankey philosophy, techniques, and the effectiveness of comprehensive care dentistry. He has a passion for dental education and a strong desire to help dentists reach their full potential.

TIME

Check-in: TBD, 8:00 AM
Program: Friday, 9:00 AM-12:00 PM

LOCATION

UT Health San Antonio, School of Dentistry

Earn clinical hours toward your annual CDE requirements and enjoy the excitement of college football. Sign up now to hear lectures on pertinent dental topics presented by prominent speakers followed by tailgate meals before attending the home games. Guests are welcome to attend the meal functions and games.

NEW TICKET AND PARKING PASS POLICY

Because of the high demand of football tickets this year, a policy has been established for ordering extra game tickets on a limited basis. All ticket orders are handled on a first-come, first-served basis. Parking passes are limited, we have only enough to provide 1 per family. If more become available, you will be contacted.

Priority Tickets, Priority Seating, and Priority Parking will be given to Season Subscribers.

• Season Subscribers who order the same number of extra ticket(s) for each game will be given priority.
• The Season Subscriber who orders extra ticket(s), but not the same number of tickets for each game, will not be guaranteed that the guest(s) will be seated together.
• Those who register on an individual basis for the series and ordering extra ticket(s), will not be guaranteed that the guest(s) will be seated next to the individual.

Luncheons for Learning
Mandibular Tissue
Supported Implant-Retained
Onerdentures:
A Satisfactory Solution
PEGGY P. ALEXANDER, DDS, MPH

OVERVIEW
One day a month a speaker discusses a dental topic during lunch. The sessions are informal and the group has an opportunity to interact with the speaker during the short discussion period at the end of the lecture. It requires only about one and one-half hour of your time to learn the latest developments in many areas of dentistry. It also offers the opportunity to become better acquainted with your colleagues and staff since all dental professionals are invited to attend.

OBJECTIVES

• To discuss the rationale for various implant options
• To develop an orderly approach to treatment planning
• To describe preparation techniques required for radiographic and surgical stents
• To clarify various approaches to surgical placement of the implant fixtures
• To demonstrate installation and functional loading of the Locator® abutment.

FORMAT

An implant-retained mandibular overdenture is considered by many to be the gold standard for rehabilitation of the edentulous mandible. This course will describe aspects of treatment planning, surgical preparation and functional loading of the mandibular prosthesis featuring the Locator® retentive system.

LOCATION

Joe C. Thompson Conference Center at The University of Texas at Austin, 28th and Red River (next to LBJ Library) Austin, Texas 78713 (800) 882-8784

**OVERVIEW**

With the aid of multiple slides and cases, presented in an interactive case-based discussion format, this course is intended to improve the practitioner’s ability to obtain and interpret the medical history and plan appropriate treatment modifications to recognize and properly manage common oral conditions.

**OBJECTIVES**

Participant questions are strongly encouraged. Specific topics include, but are not be limited to:

- Allergic reactions
- Autoimmune disorders
- Candidiasis
- Benign oral lesions
- Dry mouth
- HIV/AIDS
- Oral cancer

**OBJECTIVES**

At conclusion, participants should be able to discuss:

- Relevant risks of dental care as it pertains to prosthetic joint infection.
- Have a better understanding of the recently released guidance addressing prosthetic joint infection and dental care.
- Discuss the oral screening and its integral relationship with the comprehensive head and neck examination.

**PRESENTER**

MICHAELL A. HUBER, D.D.S., received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1980. He continued with postgraduate training in Oral Medicine and Maxillofacial Radiology at the National Naval Dental Center, Bethesda, Maryland in 1986 and received a Certificate in Oral Medicine in 1988. Upon his retirement from the United States Navy in 2002, Dr. Huber joined the faculty as an Assistant Professor in the Division of Oral Medicine, Department of Dental Diagnostic Science at The University of Texas Health Science Center at San Antonio, Dental School.

He has been teaching both pre-doctoral and graduate dental students at the Health Science Center, and is an active participant in the Dental School’s Tertiary Care Oral Medicine Clinic. His current research activities include evaluating novel diagnostic techniques for the early detection of oral cancer.

**TIME**

Check-in: TBD, 8:00 AM
Program: Friday, 9:00 AM-12:00 PM

**LOCATION**

UT Health San Antonio, School of Dentistry

**TUITION**

Individual: $125.00

**CREDIT** (Course Code: 161656A) AGD Code: 730 Hours: 3

**SPECIAL FEE OFFER**

Register for the morning program and receive a discount on the afternoon Texas Brief. Lunch is included for the participants attending both sessions.
OBJECTIVES

The course will end your headaches and make your lab contours. The techniques I will be teaching in this course will not work if you are not comfortable with this responsibility. After this course you will want to be the person in charge of producing and providing the surgical guide.

Many surgeons are now making provisionals for the implant for optimum esthetic results. Providing the surgical guide will want to be the person in charge of producing and making the surgical guide but many of us are uncomfortable with this responsibility. After this course you will want to be the person in charge of producing and providing the surgical guide.

OBJECTIVES

- Responsibilities of the restorative dentist when doing anterior implants
- How to determine where the free gingival margin will end up
- How to let the surgeon know where the place the implant for optimum esthetic results
- Why contours of the provisional are so important
- How to transfer all the information accurately to the lab technician

PRESENTERS

JACK I. SHIRLEY, D.D.S., received his DDS degree from The University of Texas Health Science Center at San Antonio in 1979. He has maintained a private practice in San Antonio, Texas for over twenty years. In addition to his practice, Dr. Shirley has been associated with The Pankey Institute for Advanced Dental Education in Key Biscayne, Florida for eighteen years. During much of this time, he has served on the Institute’s Visiting Faculty, Board of Trustees. Currently he is the President of the LD Pankey Dental Foundation, Inc., the nonprofit oversight Board of the Pankey Institute.

ELEONORE D. PAUNOVICH, D.D.S., M.S.C., received her DDS from Indiana University School of Dentistry. Dr. Paunovich holds a position of Associate Clinical Professor in the Department of Comprehensive Dentistry at The University of Texas Health Science Center at San Antonio where she serves as coordinator of the clinical geriatric program at the Oral Medicine and Senior Care Clinic.

TIME

CREED (Course Code: 161662A)
AGD Code: 551/555/731/148
Hours: 8

(210) 567-3177
http://smile.uthscsa.edu
Overview Effective September 1, 2008 Rule 100-20. Practitioners may choose to have up to four (4) hours of risk management-related coursework included in risk management, record keeping, and ethics courses and the allowance for a study hour has been increased to (6) hours. A course is designed to assist the dental practitioner in minimizing their chances of a lawsuit or Dental Board investigation through the use of effective risk management techniques.

Objectives
- Learn the top three reasons dental offices are at risk for lawsuits.
- Understand how the use of risk management techniques can decrease the risk of a lawsuit.
- Be able to identify issues in your own practice which will reduce the risk of a Dental Board investigation.
- Identify the essential components which must be in every dental record to allow you to comply with Dental Board requirements.
- Learn the steps which must be taken to increase your chance of a favorable outcome in a Dental Board investigation.
- Understand the legal implications which can reduce your future from investigations by other State and Federal agencies.

Presenters
Edward P. "Joe" Waller, Jr., D.D.S., received his dental degree from St. Louis University School of Dentistry in 1969 and his law degree from St. Mary’s University School of Law in 1990. He is an attorney with the law firm of Brin & Brin in San Antonio, Texas. His practice is focused on the defense of hospitals, physicians, and dentists in medical and dental malpractice lawsuits. Dr. Waller also frequently represents dentists in investigations and hearings through the use of effective risk management techniques.

Sept 22 Texas Brief PM
Lecture Course
Annual Fall OSHA Training Course: The In’s and Out’s of Germ Warfare
MICHAEL A. HUBER, D.D.S.

Overview
Infections present a significant hazard in the dental environment. Although protection of the patient is an obvious priority, oral healthcare personnel are also vulnerable to exposure. The intent of this course is to set forth an Infection Control/Exposure Control Protocol to minimize the transmission of infections in the clinical process (for the protection of patients, oral health care personnel alike) via direct contact, including blood, saliva, and other secretions; via indirect contact with contaminated instruments, operatory equipment, and environmental surfaces; and via the contamination's, such as droplet spatter and aerosols of infectious body fluids.

Objectives
Participants in this course will be introduced to evidence-based information that will facilitate compliance with 29 CFR Part 1910, Subpart P, Occupational Exposure to Bloodborne Pathogens. A Final Rule (Federal Register 56(235): 64004-182, 1991) and the implementation of recommendations made by other federal, state, and local agencies and professional organizations.

In addition to fulfilling your annual OSHA requirements for infection control upon completion of this course, oral healthcare personnel should be able to:
- Understand the rationale for the need for an Infection Control/Exposure Control Protocol.
- Develop and implement a practical Infection Control/Exposure Control Protocol appropriate for a particular oral health care setting.
- Education and training: Standard precautions; Vaccinations; Personal protective equipment; Work practice and engineering controls; Environmental hygiene control; Post exposure evaluation and follow-up; Medical record: medical conditions and environmental releases;

Presenters
Edward P. "Joe" Waller, Jr., D.D.S., received his D.D.S. degree from the National University of Mexico City, Mexico City, Mexico in 1993. He then received her postgraduate training as a Preceptor in Pediatric Dentistry at UT Health San Antonio in 1999. This was followed by an Internship in Pediatric Dentistry at the University of Puerto Rico, San Juan, Puerto Rico obtaining her Certificate in Pediatric Dentistry in June, 2004. Dr. Conrreras completed her training as a Fellow in June, 2005 at The Children’s Hospital & University of Colorado Health Science Center in Denver, Colorado. She now serves as an Assistant Professor in the Department of Pediatric Dentistry at UT Health San Antonio.

MARIA-JOSE CERVANTES MENDEZ
D.D.S., M.S., obtained her dental degree from Intercontinental University at Mexico City. Sept 22 Lecture Course
Pediatric Dentistry Update for the General Practitioner

Overview and Objectives
This one-day course will serve as a comprehensive review of clinical pediatric dentistry. Course participants will interact with the faculty in an open-forum seminar on a variety of pediatric dentistry topics, including the following:
- Examination, Diagnosis, Treatment Planning
- Infant Examination and Anticipatory Guidance
- Restorative Dentistry for the Pediatric Patient
- Pulp Therapy for the Primary Dentition
- Space Maintenance
- Non-Pharmacologic Behavior Management
- Nitrous Oxide Analgesia for the Child Patient
- Local Anesthetic Dosage Regimens for Pediatric Patients

Presenters

Lecture/Participation Course

Restorative Planning Course in Implant Dentistry
NORMA OLVERA, D.D.S., M.S.

OVERVIEW
The lecture will cover comprehensive restorative planning in implant dentistry. The presenter will discuss restorative options to implant success that has worked/What has not!) and cover clinical case presentations. In addition, the speaker will discuss how to enhance confidence restoring dental implants, as well as, providing better service to our patients.

OBJECTIVES
• Discuss specific restorative planning principles for partially dentate and edentulous patients
• Identify causes of dental implant failures
• Explain restorative thinking in selecting implant failures
• Experience a detailed hands-on session with restorative components
• Leave the course knowing the implant restorative principles and ready to get started!

PRESENTER
NORMA OLVERA, D.D.S., M.S., obtained her dental degree from The University of Texas Health Science Center at San Antonio in 1996. She completed her post-graduate training in prosthodontics and received her certification and Master of Science in prosthodontics. She is currently an assistant professor in the Department of Comprehensive Dentistry at the University of Texas Health Science Center at San Antonio.

Dr. Olvera had a full-time private practice as a prosthodontist in Houston, Texas for the past 20 years. She has extensive experience in all facets of restorative dentistry with and without dental implants.

Certification Course for Dentists
NITROUS OXIDE CONSCIOUS SEDATION
Hands-On Training Course
ERNEST E. VALDEZ, D.D.S.

OVERVIEW
The course will provide information to meet the Nitrous Oxide/oxygen inhalation conscious sedation. This is a required course for dentists on the rules and regulations for the Texas State Board of Dental Examiners to qualify for an sedation/anesthesia permit.

OBJECTIVES
At the end of the didactic and clinical sessions, the participant will be able to:
• Define conscious sedation and be aware of the benefits for the patient and dentist.
• Understand the psychophysiology of pain, anxiety, and sedation.
• Understand the physiology of respiration and of N2O-O2 inhalation.
• Know the advantages, disadvantages, indications, and contraindications to the use of N2O in normal and medically compromised patients.
• Understand the techniques used to administer N2O and monitor patients while they receive it.
• Recognize the complications that may arise as a result of N2O administration, and understand the prevention, early detection, and treatment of these complications.
• Learn the hazards associated with the use of N2O and accepted methods used to reduce exposure to an acceptable level.
• Recognize special problems associated with the use of N2O in children and know the proper technique for administering it to them.
• Discuss nitrous oxide equipment, including tanks, regulators, manifolds and machines.
• Understand guidelines for installation and use as issued by the National Fire Protection Association and the American Dental Association.
• Recognize the similarities of N2O sedation and hypnosis, be familiar with the basic concepts of hypnosis and its usefulness as an adjunct to N2O sedation.

PRESENTER
ERNEST E. VALDEZ, D.D.S., earned his DDS degree from The University of Texas Health Science Center at San Antonio in 1993. He is currently in private practice.

Lecture Course
Have You Been Sued Yet?
New Challenges in Risk Management and Record Keeping
ROBERT M. ANDERTON, D.D.S., JD, LLM
JAMES W. ORR, D.D.S.

OVERVIEW
This course will include an in-depth discussion of actual lawsuit cases. This NEW course is approved by the Texas State Board of Dental Examiners for technical and/or scientific course credits and can be used toward relicensure.

OBJECTIVES
At the conclusion of the course, participants will learn:
• Jurisprudence and ethics review
• Types of lawsuits affecting dentistry
• Potential sources of all dental lawsuits
• What are the odds of being sued
• New challenges increasing the risk of being sued
• What to do if you are sued
• Texas State Board disciplinary actions
• What to do if you are charged with violations
• Keeping dental records that meet TSBDE requirements and provide malpractice defense
• What the future holds

PRESENTERS
ROBERT M. ANDERTON, D.D.S., JD, LLM, received dental degree from Baylor College of Dentistry in 1961 and JD degree from Southern Methodist University School of Law. He is a fellow of the AGD, ACLM, ICD, and ACD. Dr. Anderton is a Former President of the Texas Dental Association and the ADA

JAMES W. ORR, D.D.S., obtained his degree from The University of Texas Health Science Center at Houston Dental Branch in 1968. He served on the Texas State Board of Dental Examiners, the Texas State Board of Radiation Control and as Director of the Texas Medicaid Program.

TIME

Register before July 28, 2017 to receive a 15% discount.
Register before August 29, 2017 to receive a 12% discount.

The Dental School thanks PerioSeal for its unrestricted educational grant in support of this continuing education program.
OVERVIEW
Periodontal diseases are chronic, infectious, and inflammatory diseases resulting from exposure of the periodontium to dental plaque, a complex bacterial biofilm that accumulates on the teeth. With periodontal disease the epithelial tissue, connective tissue and bone is damaged and the teeth and dental implants may be lost. To understand long-term survival of dental implants, the clinician must have a clear understanding of the epithelial tissue, connective tissue and bone relationships to the dental implant surfaces. Evidence suggests that periodontitis and peri-implantitis may be the same and may contribute to the development or progression of local tissue breakdown and other diseases or conditions. In light of the high prevalence of the periodontal disease, these associations may be important for the maintenance of dental implants. Patients and health care providers must be informed that periodontal intervention may prevent the onset of hard and soft tissue breakdown or progression of various systemic diseases.

The purpose of this presentation is to provide evidence based information to evaluate the relationships of the hard and soft tissues of connection to dental implants and to determine if these tissues are subject to periodontal breakdown. To understand the mechanism by which periodontal infections may contribute to the destruction of periodontal tissues or the loss of dental implants.

OBJECTIVES
• Understand the hard and soft tissue relationships to dental implants.
• To understand the pathways of periodontal breakdown about dental implants.
• Identify hard and soft tissue conditions that may contribute to periodontal breakdown about dental implants.
• Determine the time and sequence for treatment and prevention of failing dental implants.
• To properly to inform the patient of the potential periodontal disease and systemic concerns of dental implants.
• Determine the proper maintenance of dental implants by the patient and the dental hygienist.

PRESENTERS
DAVID M. GROGAN, D.D.S., M.S.D., received his DDS degree from the University of Texas Health Science Center at Houston in 1985. In June of 1986, he completed a one year General Practice Residency at The University of Texas Health Science Center at San Antonio. Upon completion of the residency, Dr. Luce joined Comprehensive Dentistry at The University of Texas Health Science Center at San Antonio.

ERNEST B. LUCE, D.D.S., received his DDS degree from the University of Texas Health Science Center at Houston in 1985. The Dentist’s Pledge

I, as a member of the dental profession, shall keep this pledge and these stipulations.

I understand and accept that my primary responsibility is to my patients, and I shall dedicate myself to render, to the best of my ability, the highest standard of oral health care and to maintain a relationship of respect and confidence. Therefore, let all come to me safe in the knowledge that their total health and well-being are my first considerations.

I shall accept the responsibility that, as a professional, my competence rests on continuing the attainment of knowledge and skill in the arts and sciences of dentistry.

I acknowledge my obligation to support and sustain the honor and integrity of the profession and to conduct myself in all endeavors such that I shall merit the respect of my patients, colleagues and my community. I further commit myself to the betterment of my community for the benefit of all of society.

I shall faithfully observe the Principles of Ethics and Code of Professional Conduct set forth by the profession.

All this I pledge with pride in my commitment to the profession and the public it serves.

Author Unknown
23rd Annual Preceptorship in Dental Implantology

PRECEPTORSHIP INFORMATION
This Preceptorship honors our co-founders Roland M. Meffert, D.D.S. and Robert J. Cronin, Jr., D.D.S., M.S., and consists of an annual review and updated curriculum that is clinically focused while incorporating the latest research from the clinical basic sciences. This will provide the participant with an understanding of the rationale and scientific basis for the clinical practice of implantology. The participants will meet for six weekend sessions which will include didactic sessions and some hands-on training experiences in an interactive learning environment.

PRECEPTORSHIP OBJECTIVES
The participant will learn:

• The rationale and scientific basis for the successful clinical practice of implantology.
• The current concepts, principles, and clinical methodology used effectively in practice.
• The proper evaluation, diagnosis, and selection of patients for implant placement and restoration.
• To develop and understand specific implant, surgical and prosthetic skills, and the different modalities available.
• To manage the more difficult clinical situations, such as patients with advanced maxillary or mandibular atrophy.
• To develop and understand specific implant, surgical and prosthetic skills, and the different modalities available.
• To manage the more difficult clinical situations, such as patients with advanced maxillary or mandibular atrophy.
• The practice management aspects of dental implantology: records, insurance, informed consent, medical-legal and marketing considerations.

DIDACTIC SESSIONS
• History and future of dental implantology.
• Three-day classroom/cadaver laboratory exercises.
• Biomechanical and biomaterial aspects of dental implantology.
• Physiology of bone with emphasis on cellular, molecular healing, bone maturation of bone in function and selection of implants with different designs and surfaces relating to bone density and planned implant function.
• Anatomy of the maxilla, mandible and TMJ in terms of available bone and anatomy as related to stress distribution.
• Anatomical structures (muscles, nerves, arteries) as they relate to implant placement.
• Philosophies of implant retention and stabilization.
• Essential treatment planning facets, including patient selection, past dental and medical history, essential diagnostic guides (casts, templates, etc.), documentation, appointment sequencing with laboratory, surgeon, restorative dentist.
• Essentials of joint treatment planning, and recall principles.
• Surgical and prosthetic considerations including incision design, fixture and abutment selection, occlusal considerations, and force transmission.
• Peri-implantitis and its effect on the dental implant from the infective and traumatic aspects.
• Post-restoration responsibilities of staff personnel, hygienist, surgeon and restorative dentist on a recall basis.
• Demonstration of instruments, techniques for post-implant placement, restoration hygiene.
• Principles in troubleshooting, rescue, and retrieval procedures.
• The prosthodontic aspects of diagnosis and treatment planning as well as the clinical communication of this information to the surgeon.
• Procedures for developing optimum esthetics and the biomechanical loading aspects of implant restorations.
• Component systems will be categorized with specific indications for their use.
• The importance of optimal laboratory support and clinical communication skills to facilitate positive interaction with the dental technician.
• Indications and techniques relating to insertion of implants in single tooth and fresh extraction site situations.
• Hard and soft tissue grafting, guided soft, hard tissue regeneration in both pre and post-implant placement, including sinus lift procedures.
• Repair of the ailing, failing implant with new regenerative procedures and materials.
• An overview of informed consent documentation and medical-legal review.
• The principles of practice management, marketing, and insurance considerations.
• An opportunity for your dental hygienist to complete a certification course in dental implant hygiene.

PARTICIPATION SESSIONS
• The Preceptorship will feature hands-on and interactive sessions.
• Co-Directors will conduct a two hour diagnostic and treatment planning segment featuring the preceptors’ patient cases at each of the weekend sessions.
• Implant anatomy laboratory will give the preceptors the opportunities to familiarize themselves in implant anatomy through dissection and to actually place implants in cadaver models.
• Hands-on exercises will familiarize the preceptors with the surgical and restorative aspects of dental implant systems and prosthetic laboratory techniques.

Luncheons for Learning

A Novel, Comprehensive Approach to TMJD and Headache Management
CHRISTOPHER J. PERRY, D.M.D.

FORMAT
One day a month a speaker discusses a dental topic during lunch. The sessions are informal and the group has an opportunity to interact with the speaker during the short discussion period at the end of the lecture. It requires only about one and one-half hour of your time to learn the latest developments in many areas of dentistry. It also offers the opportunity to become better acquainted with your colleagues and staff since all dental professionals are invited to attend.

OVERVIEW
Temporomandibular disorder is a complex condition with many etiologies, symptoms, and treatment modalities. There is no “one size fits all” treatment for patients. There are many “band aids” to manage TMJD, but few of them get to the bottom of the disease. Dr. Perry has developed a comprehensive approach to evaluation, management and ultimate treatment of most TMJD conditions, focusing on muscle rehabilitation prior to definitive dental correction and joint stabilization.

This course will focus on an understanding of the TMJ, causative agents of TMJD, and a systematic protocol for diagnosis and treatment.

OBJECTIVES
- An understanding of the anatomy and function of the TMJ.
- An understanding of normal occlusion function.
- An understanding of the natural and iatrogenic etiologies of Temporomandibular disorder.
- An understanding of the “Perry 3D Protocol” of TMJD therapy.

PRESENTER
CHRISTOPHER J. PERRY, M.S., D.M.D., FAGD, obtained his dental degree from The University of Medicine and Dentistry of New Jersey in 1999. Dr. Perry is the Immediate-Past President of the San Antonio Academy of General Dentistry. Since completing a two year residency in Advanced Genera Dentistry at UTHSCSA he has been an assistant clinical Professor in the department of General Dentistry. Dr. Perry has lectured internationally on topics from practice management to CEREC and restorative dentistry. As President of Perry Dental Health Consulting, he has consulted with practices around Texas and in the NorthEast.

TIME
Check-in & Lunch: TBD, 11:30 AM
Program: Thursday, 12:00 PM-1:00 PM

LOCATION
UT Health San Antonio, School of Dentistry

Includes Luncheon and Lecture
Individual: $49.50

CREDIT
(Course Code: 160482A)
AGD Code: 257
Hours: 1

LUNCH INCLUDED
Plan to arrive at 11:30 AM. This will give you time to eat before the presentation starts at 12:00 PM. Should you be delayed, you can eat during the presentation.

Brush up on Pediatric Dentistry

Now you can choose the time and place to take the courses you need and want.

- Developed by Texas Department of State Health Services and Texas Health and Human Services Commission
- Available and FREE to any dentist or dental hygienist
- Online 24/7 access
- Short, time-saving courses

We offer more than 40 CE courses approved by 9 accrediting bodies. These include dental content:

- Breastfeeding
- Children with Diabetes
- Children with Asthma
- Case Management
- Texas Health Steps: Overview
- Management of Overweight and Obesity in Children and Adolescents

Dentist and dental hygienist can earn double CE credit for these courses:

- First Dental Home - 1.25 hours
- Oral Health Examination by Dental Professionals - 1.5 hours

OCTOBER 7

Longhorn Football Dental Study Club
Pediatric Dentistry for the General Dentist
JEFREY C. MABRY, D.D.S., M.S.

OVERVIEW
Today’s parents frequently access the internet to gather information on all aspects of pediatric medicine and dentistry. This course is designed to provide a general review of pediatric dentistry, focusing on the parents most frequently asked questions. The lecture will start with pre-natal and newborn concerns. Next, we will discuss common eruption problems, orthodontic concerns, pediatric oral pathology, trauma, dental infections, and prevention issues. Finally, we will cover those topics in the media that often stimulate questions from our well-informed parents.

OBJECTIVES
- Recognize the most common newborn dental anomalies and advise the parents accordingly
- Discuss the systemic conditions that are associated with the delayed eruption of teeth and premature loss of primary teeth
- Diagnose and treat the most common intraoral soft tissue lesions
- Recognize the most common causes of cervical lymphadenopathies in children
- Discuss the causes of intrinsic and extrinsic tooth stains
- Diagnose and treat the common types of trauma to the primary teeth, surrounding soft/hard tissues
- Diagnose and manage dental infections
- The latest prevention strategies for young children
- Discuss “what’s new” in pediatric dentistry

PRESENTER
JEFFREY C. MABRY, DDS, MS retired from the USAF in October, 2006. During his last USAF tour, he served as the Chairman, Pediatric Dentistry, 59th Dental Squadron, 59th Aeromedical Dental Group, Lackland AFB, TX. He served as the Chief Military Consultant to the USAF Surgeon General for Pediatric Dentistry. Dr. Mabry serves as a Professor at the UT Health San Antonio, Department of Developmental Dentistry and is the Director of the Dental Center at the Children’s Hospital of San Antonio.

TIME
Check-in: Saturday, five hours prior to kick-off
Game: UT vs. Kansas State University
Royal Texas-Memorial Stadium (kick-off time TBA)

LOCATION

Lecture Course for the Entire Dental Team Management of 
Dental Trauma in the Pediatric Patient  
LINA M. CARDENAS, D.D.S., M.S., Ph.D.

OVERVIEW  
Dental trauma is part of the General and Pediatric Dentistry practice. Current research has led to a better understanding of the healing mechanisms that translate into better clinical protocols for the management of trauma. The course will start with an introduction to trauma and the evaluation of the patient with trauma. Then, a review of the classification, diagnosis and treatment of traumatic lesions is presented. Finally, several clinical cases will be presented and discussed.

A review of the current guidelines (from the American Academy of Endodontics, the International Association of Dental Traumatology and the American Academy of Pediatric Dentistry) for the management of dental trauma in the primary and permanent dentition will be presented. Easy-to-use decision analysis and protocols for the emergency treatment as well as follow-up and referral needs will also be discussed.

OBJECTIVES  
Present a systematic way of gathering trauma history. Review the classification of traumatic dental injuries. Discuss the diagnosis, emergency treatment and follow-up in primary tooth trauma according to type of injury. Discuss the diagnosis, emergency treatment and follow-up in permanent tooth trauma according to type of injury. Present clinical cases of primary and permanent tooth trauma.

PRESENTER  
LINA M. CARDENAS, D.D.S., M.S., Ph.D., obtained her first dental degree from CES University on Columbia in 1992. She received her second dental degree at the University of Texas Health Science Center at San Antonio, graduating Magna Cum Laude. She traveled to Nagasaki University and received a combined degree in Pediatric Dentistry with a PhD in Dental Science. Following that, she completed a combined three year specialty training in Pediatric Dentistry with a Master of Science at the University of North Carolina at Chapel Hill, one of the most respected programs in the United States. She is a Board Certified Pediatric Dentist.

TIME

Lecture Course Update on Common Medical Conditions and Lesions 
Encountered in the Contemporary Dental Practice  
MICHAEL A. HUBER, D.D.S.

OVERVIEW  
Demographic trends clearly demonstrate that as the average life-expectancy continues to grow in America, so does the burden of chronic illness. Thus, the contemporary dental practitioner is encountering an ever-increasing number of patients with a multitude of medical conditions and associated oral lesions which affect both the patient’s oral health and management. In addition, many dental patients see their dentist more regularly and frequently than they do their primary medical manager. This places the dental practitioner in the unique position of often being the first to observe the signs and symptoms of a serious systemic condition. This course will provide a review of some of the common medical conditions and associated oral lesions the dental practitioner is likely to encounter in his or her practice. In addition, the historical and clinical clues of commonly encountered undiagnosed systemic conditions will be provided.

OBJECTIVES  
This course is intended to improve the practitioner’s ability to obtain and interpret the medical history and correlate these findings with the clinical examination to:  
• Establish an appropriate diagnosis  
• Plan appropriate treatment modifications to safely manage the medically compromised patient

Specific topics discussed will include, but not be limited to:  
• Allergic reactions  
• Autoimmune disorders  
• Candidiasis  
• Cardiovascular disease  
• Dermatologic disease  
• Dry mouth  
• Hepatitis  
• HIV/AIDS  
• Indications for antimicrobial prophylaxis  
• Oral cancer  
• Sexually transmitted diseases

PRESENTER  
MICHAEL A. HUBER, D.D.S., received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1980. He continued with postgraduate training in Oral Medicine and Maxillofacial Radiology at the National Naval Dental Center, Bethesda, Maryland in 1988 and received a Certificate in Oral Medicine 1988. Upon his retirement from the United States Navy in 2002, Dr. Huber joined the faculty as an Assistant Professor in the Division of Oral Medicine, Department of Dental Diagnostic Science at The University of Texas Health Science Center at San Antonio, Dental School.

Lecture/Hands-On Course Gingival and Connective Tissue Grafting  
JAMES S. KOHNER, D.D.S.

OVERVIEW  
This course discusses and evaluates the use of two different soft tissue grafts. It includes detailed indications, contra-indications and multiple case examples of Free Gingival and Connective Tissue Grafts. The surgical exercises use pig jaws to allow participants the opportunity of harvesting, placing and suturing both types of grafts. Gingival Grafts are excellent for creating zones of attached gingiva where neither root coverage nor esthetics are factors. They provide a predictable way to stop recession from progressing. Connective Tissue Grafts are very useful for total root coverage in cases of severe recession, especially in the maxilla where esthetics is important.

This workshop is for the dentist who wants to offer soft tissue grafting to their patients or to someone who just wants to learn more about enhancing esthetic restorative results. Two video demonstrations of surgical techniques are included.

A workbook detailing the procedures is included.

OBJECTIVES  
At the conclusion, participants should be able to:  
• Learn diagnostic criteria for graft selection  
• Understand indications for each type of graft  
• Understand limitations of each type of graft  
• Step-by-step harvesting, placing and suturing  
• Step-by-step use of specialized instruments

PRESENTER  
JAMES S. KOHNER, D.D.S., received his dental degree from The Ohio State University, and Case Western Reserve University Dental School, and obtained his certification in Periodontics from the Boston University School of Graduate Dentistry. He currently lives in Scottsdale, Arizona. Dr. Kohner is an experienced teacher who has presented courses on Soft Tissue Grafting to a wide range of audiences, including many state associations all over the US and in 8 foreign countries, and has presented at the American Academy of Periodontology meetings for many years. He has been teaching for the Perio Institute since 2003.

TIME  
Check-in: TBD, 8:00 AM  
Program: Friday, 9:00 AM – 5:00 PM

AGD Code: 492/499  
Hours: 7

The Dental School thanks Perio Institute, for its unrestricted educational grants in support of this continuing education series.
At the conclusion, participants should be able to:

**OBJECTIVES**

- Extension is one of the most commonly required procedures, or those who just want to know more
- Dentists who want to do some or most of their own crown extensions, or those who want to know more about the subject, will be helped by this course.
- Crown extension is one of the most commonly required procedures in restorative dentistry, and is often under utilized.

A workbook detailing the procedures is included.

**OBJECTIVES**

At the conclusion, participants should be able to:

- Make predictable impressions every time
- Learn how crowns come loose and how to prevent it
- Save chair time and be more profitable
- Understand causes of red gum tissue around crowns
- Diagnose esthetic crown lengthening
- Understand the Gummy Smile
- Coordinate surgery with restorative procedures

**OCTOBER 14**

Lecture/Hands-On Course

**Hands-on Crown Lengthening Workshop**

JAMES S. KOHNER, D.D.S.

**OVERVIEW**

This course provides a maximum “hands-on” experience covering the various principles and clinical procedures needed for crown lengthening. We cover indications, contraindications, and methods of managing surrounding bone.

Topics include: how to handle hard and soft tissues; proper surgical techniques; preservation of esthetics in the final tissue contours; and relocation of all structures that comprise the biologic width, namely: sulcus, junctional epithelium, connective tissue fibers, and bone.

The “hands-on” experiences include flap surgery with pig jaws, plus bone surgery on anatomically correct plaster models. It is coupled with a detailed slide presentation, as well as two video demonstrations of surgical techniques.

Dentists who want to do some or most of their own crown extensions, or those who just want to know more about the subject, will be helped by this course. Crown extension is one of the most commonly required procedures in restorative dentistry, and is often under utilized.

**PRESENTATION**

**OCTOBER 14**

Lecture Course

**Dental Sleep Medicine: Snoring and Obstructive Sleep Apnea**

RICHARD B. DRAKE, D.D.S.

**OVERVIEW**

This course will discuss the new TSBDE new ruling 108.12, concerning the dental treatment of sleep disorders. Are you sick and tired of being sick and tired? Fatigue is the number one complaint heard by health professionals across the globe. Fifty to seventy million Americans suffer from sleep related problem. Sleep related breathing disorders, such as snoring and obstructive sleep apnea, are at the top of the list. One in four of these patients have been diagnosed. As dentists, we are in a prime position to be the first to recognize this disorder and to help steer patients in the right direction to get diagnosed. We also have the ability to treat many of these patients ourselves, thus improving their quality of life as well as possibly saving their life!

**OBJECTIVES**

**Background:**
- Understand normal breathing and airway anatomy and the problems and variants that lead to snoring and obstructive sleep apnea
- Learn the health risks associated with sleep disordered breathing
- Learn the basics of sleep

**Signs and Symptoms:**
- Learn the effects of sub-optimal sleep on health and quality of life.
- Recognize those symptoms and behaviors that may indicate sleep disordered breathing.

**Diagnosing:**
- Understand current and proposed diagnostic methods and the role of dentists in the team approach.

**Treatment:**
- Review the current treatment modalities for snoring and for mild, moderate and severe OSA.
- Explore the role that dentists can play in the management of sleep disordered breathing.

**Follow Up:**
- Understand the side effects of oral appliance therapy and how to manage them.

**PRESENTATION**

RICHARD B. DRAKE, D.D.S., received his D.D.S. degree from The University of Texas Health Science Center at San Antonio, Dental School in 1989. He maintained a private practice devoted solely to the treatment of snoring and obstructive sleep apnea. He is the founder and President of the Sleep and Snoring Institute, a private practice devoted solely to the treatment of snoring and sleep apnea. Dr. Drake is a Diplomate of the American Board of Dental Sleep Medicine. He serves on the Board of Directors with the American Academy of Dental Sleep Medicine, and is the founder of the Dental School thanks Perio Institute for its unrestricted educational grants in support of this continuing education series.

Texas Brief AM
Lecture Course
Part I-A Spanish Class for the Dental Office
Vamos al Dentista
(Let’s Go to the Dentist)
Introduction to Spanish
MYLENE MACKEY, M.S., B.S.

OVERVIEW
Although there are many excellent Spanish books and courses available, this course is designed specifically for members of the dental team. A brief, but intensive introduction for beginners on the everyday application of basic Spanish grammar, pronunciation, and vocabulary will be presented. In addition, Mrs. Mackey will review simple phrases, which can be commonly used by the dental team. The material will be based upon the text, Vamos al Dentista, designed to be used in a dental office.

OBJECTIVES
• A beginner’s course of the Spanish language for members of the dental team. This course is a prerequisite for Part II.

PRESENTER
MYLENE MACKEY, M.S., B.S., received her Masters degree in mental health counseling from St. Mary’s University, previously earning her Bachelors in theater and psychology from Texas A&M. Mrs. Mackey currently works as a Licensed Practicing Counselor. She has taught Spanish for many years including offering private lessons to businesses and individuals. Mrs. Mackey enjoys translating documents, traveling to Mexico, yoga, reading and drawing.

TIME
Check-in: TBD, 8:00 AM
Program: Friday, 9:00 AM-12:00 PM

LOCATION
UT Health San Antonio, School of Dentistry

TUITION
Includes text, Vamos al Dentista
Individual: $125.00

CREDIT (Course Code: 161686A)
AGD Code: 770 Hours: 4

SPECIAL FEE OFFER
Register for the morning program and receive a 30% discount on the afternoon Texas Brief. Lunch is included for the participants attending both sessions.

ORDER NOW!

Vamos al Dentista
(Let’s Go to the Dentist)

English to Spanish Translations of commonly used terms and phrases in the dental office

Birgit Junfin Glass, DDS, MS, Ivan Rodriguez, DMD
Norma Partida, DDS, & Daniel G Arredondo, DDS

All authors are from The University of Texas Health Science Center at San Antonio

For those on the dental team who wish to communicate with their Spanish speaking patients

The books are $17.00 each (shipping is included up to 10 books). Any order after 10 books will receive a 25% Discount plus shipping cost. Please contact Continuing Dental Education for questions on discount.

For questions or to order by phone, please call the Office of Continuing Dental Education at The University of Texas Health Science Center at San Antonio, (210) 567-3177.
EDWARD P. "JOE" WALLER, D.D.S., J.D.

OVERVIEW
Effective September 1, 2008 Rule 104.1, licensees may choose to have up to four (4) hours of risk management-related coursework (includes risk management, record keeping, and/or ethics courses and the allowance for self-study hours has been increased to (6) hours. This course is designed to assist the dental practitioner in minimizing their chances of a lawsuit or Dental Board investigation through the use of effective risk management techniques.

OBJECTIVES
• Learn the top three reasons dental offices are at risk for lawsuits.
• Understand how the utilization of risk management techniques can dramatically decrease the risk of a lawsuit.
• Be able to identify issues in your own practice which will reduce the risk of a Dental Board investigation.
• Identify the essential elements which must be in every dental record to allow you to comply with Dental Board Rules.
• Learn the steps which must be taken to increase your chances of a favorable outcome in a Dental Board investigation.
• Understand the documentation issues which can reduce your exposure from investigations by other State and Federal agencies.

PRESENTER
EDWARD P. "JOE" WALLER, JR., D.D.S., J.D., received his dental degree from St. Louis University School of Dentistry in 1969 and his law degree from St. Mary's University School of Law in 1990. He is an attorney with the law firm of Brin & Brin in San Antonio. His practice is focused on the defense of hospitals, physicians, and dentists in medical and dental malpractice lawsuits. Dr. Waller also frequently represents dentists in investigations and hearings before the State Board of Dental Examiners.

TIME
Check-in: Saturday, five hours prior to kick-off Game: UT vs. Oklahoma State University Royal Texas-Memorial Stadium (kick-off time TBA)

OCTOBER 27

Lecture Course for the General Dentist and the Dental Team

Oral Surgery for the General Dentist

GREGORY K. SPACKMAN, D.D.S., M.B.A.

OVERVIEW
This course will review a variety of topics pertinent to outpatient oral surgery which are relevant to the dentist. This course will be applicable to the various aspects of management in addition to the various aspects of patient evaluation, record keeping, and risk assessment. 

M.B.A.

OBJECTIVES
The participant will learn about:

• Patient evaluation
• Record keeping
• Risk management
• Local anesthesia
• Armament
• Preoperative evaluation for extractions
• Flap design
• Routine and difficult extractions
• Third molar evaluation and extraction
• Biopsy technique
• Minor preprosthetic surgery
• Complications
• Emergencies

PRESENTATION
Dr. Spackman earned his M.B.A. degree from the University of Washington in 1987.

Dr. Spackman is currently an Associate Professor in the Department of Oral and Maxillofacial Surgery at the University of Texas Health Science Center at San Antonio Dental School.

Dr. Spackman serves as the Predoctoral Director in the Department of Oral and Maxillofacial Surgery at the Dental School where he is also active in the Clinical Faculty Practice and serves on the Faculty Practice Advisory Board.

TIME
Check-in: TBD, 8:00 AM
Program: Friday, 9:00 AM – 5:00 PM

LOCATION
UT Health San Antonio, School of Dentistry

TUITION
Dentist: $210.00
Allied Dental Personnel: $170.00

CREDIT
Course Code: 161689A
AGD Code: 310 Hours: 7

IMPORTANT COURSE INFORMATION:
Participants must bring to the course a splint they provide their patients. The splint needs to be fabricated to either the participants’ maxillary or mandibular arch. The splint may be fabricated from acrylic, soft thermoplastic material, or any intermediate material (Flexible, Bruxize, hard/soft laminated material, etc.). NTI appliances are not recommended and should not be brought. Participants must also bring a long shank acrylic bur and a long shank #6 or #8 round bur. If he or she brings a splint made from soft thermoplastic mouthguard material, the participant must also bring the cast it was molded over.

Speaker has a course on December 2, 2017
"RESTORATIVE MATERIALS: WHAT, WHERE, WHEN & HOW"

The 32nd Annual
James P. Hollers
Memorial Lectureship

“Update on Current Standards of Care, Medical Emergencies, and Special Topics in Oral and Maxillofacial Surgery”

Update on Medical Emergencies-2017 Standards of Care
- Ventilation simplicity
- Use of AED

Special Topics in Oral and Maxillofacial Surgery
- Overuse of Opioids in Dentistry for the treatment of post surgical pain
- Current standards-when to use antibiotics in conjunction with dental infections and procedures
- Socket preservation-indications
- Define peri-implantitis
- Describe the treatment approach of peri-implant lesions

JAMES Q. SWIFT, DDS, is a Professor in the Division of Oral and Maxillofacial Surgery at the University of Minnesota School of Dentistry. He is a graduate of Cornell College, Mt. Vernon, IA, the University of Iowa College of Dentistry and completed a General Practice Residency at Oklahoma Children’s Memorial Hospital. Dr. Swift completed his oral and maxillofacial surgery residency training program at the University of Oklahoma Health Sciences Center. He began his academic career as an assistant professor at the University of Oklahoma Health Sciences Center, in the College of Dentistry. He had teaching responsibilities with the dental students and the oral and maxillofacial surgery residents. He served on two cleft palate/craniofacial teams.

Additional game tickets can be purchased at $TBD.00 each. Pre-game meals can be purchased for guests at $15.00 per person. We have a limited number of parking passes that are on a first come first serve basis. Please register early.
OVERVIEW
The Texas State Board of Dental Examiners (TSBDE) requires level 2 and level 3 permit holders to complete approved continuing education every 2 years to maintain their sedation permit. This must take the form of ACLS, PALS or an approved sedation review course. Individuals who complete the entire course will receive a certificate that can be submitted to the TSBDE to document completion of the approved moderate sedation review course. Level 2 and 3 permit holders must also complete every 2 years an additional 8 hours of medical emergency or sedation related CE separate from the ACLS, PALS or this approved course.

OBJECTIVES
- Review the Texas rules and regulations regarding the administration of moderate enteral and moderate parenteral sedation.
- Update the dentist on patient evaluation for the administration of moderate sedation.
- Update the dentist on monitoring techniques for moderate sedation.
- Update the dentist on the management of sedation emergencies and common medical emergencies.
- Review basic EKG interpretation.
- Review armamentarium techniques useful in the administration of moderate sedation.
- Review risk management in moderate conscious sedation.

PRESENTER
ERNEST B. LUCE, D.D.S., received his DDS degree from the University of Texas Health Science Center at Houston in 1985. In 1986, he completed a one year General Practice Residency at The University of Texas Health Science Center at San Antonio. Upon completion, Dr. Luce joined the Department of Comprehensive Dentistry at The UT Health Science Center at San Antonio, Currently, he is a Clinical Associate Professor at the Health Science Center, and he also maintains a part-time private practice in general dentistry in San Antonio.

His teaching duties include didactic presentations as well as clinical supervision of graduate general dentistry residents. Dr. Luce served as Head of the Graduate Division of the Department of General Dentistry and Program Director for the General Practice Residency at UT Health Science Center at San Antonio from 1993 to 1999.

Lecture Course
 Oral Cancer: From Diagnosis to Management
MICHAEL A. HUBER, D.D.S.

OVERVIEW
Successful management of the oral cancer patient requires a multidisciplinary effort, in which the dental professional plays a critical role. An estimated 29,000 new cases of oral and pharyngeal will be diagnosed this year, many as a consequence of an oral screening provided by a dentist. Research over the past decade has produced several advances improving the profession’s ability to diagnose, treat, and manage the short and long-term consequences of oral cancer. Ultimately, however, successful cancer therapy often incurs life-long impairments, which may adversely affect the patient’s quality of life. As many of the impairments directly affect the oral cavity, the dentist will be frequently called upon to manage many of these impairments such as mucositis, xerostomia, increased caries and disfigurement. This course will provide a review of the most contemporary approaches to manage the oral cancer patient, from diagnosis to management.

OBJECTIVES
- The participants will learn about:
  - Epidemiologic overview
  - Cancer prevention
  - Diagnostic/Screening modalities
  - Contemporary treatment strategies
  - During-treatment care
  - After-treatment care

PRESENTER
MICHAEL A. HUBER, D.D.S., received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1980. He continued with postgraduate training in Oral Medicine and Maxillofacial Radiology at the National Naval Dental Center, Bethesda, Maryland in 1986 and received a Certificate in Oral Medicine in 1988. Upon his retirement from the United States Navy in 2002, Dr. Huber joined the faculty as an Assistant Professor in the Division of Oral Medicine, Department of Comprehensive Dentistry at The University of Texas Health Science Center at San Antonio, Dental School.

Lecture/Participation Course
Contemporary Trends in Pediatric Dentistry
STEVEN P. HACKMYER, D.D.S.

OVERVIEW
Treatment of the pediatric patient is involves more than approaching them as miniature adults. This course is divided into two parts; lecture and hands-on. The hands-on portion will cover a number of topics that are associated with every day comprehensive treatment of the pediatric patient.

The topics this course will cover are; Pediatric Pulpal Therapy, Behavior management, prevention of the dental home, anticipatory guidance, fluoride, sealants, diet, nutrition, caries risk assessment and management of dental trauma to both the primary and permanent dentition will be discussed. The new current standards of dental trauma addressing, classification, diagnosis and treatment modalities will be discussed. As part of the entire presentation, examples of various types of the treatment and treatment planning will be utilized as part of the different topics covered. The hands on part will cover current pediatric restorations for primary teeth. Integral in this will be a focus on aesthetic anterior and posterior restorations.

OBJECTIVES
- Review current basics of clinical everyday pediatric dentistry.
- Provide the participants with better understanding to be able to provide quality comprehensive care for their pediatric patients.
- An update of current concepts and procedures that can be utilized as part of their everyday pediatric patient care.

PRESENTER
STEVEN P. HACKMYER, D.D.S., earned his dental degree from New York University College of Dentistry, Doctor Hackmyer also earned his dental degree from New York University College of Dentistry. After that Dr. Hackmyer completed a residency in Pediatric Dentistry at Brookdale Hospital University Medical Center in Brooklyn, New York.

Lecture/Participation Course
Contemporary Trends in Pediatric Dentistry
STEVEN P. HACKMYER, D.D.S.

OVERVIEW
Treatment of the pediatric patient is involves more than approaching them as miniature adults. This course is divided into two parts; lecture and hands-on. The hands-on portion will cover a number of topics that are associated with every day comprehensive treatment of the pediatric patient.

The topics this course will cover are; Pediatric Pulpal Therapy, Behavior management, prevention of the dental home, anticipatory guidance, fluoride, sealants, diet, nutrition, caries risk assessment and management of dental trauma to both the primary and permanent dentition will be discussed. The new current standards of dental trauma addressing, classification, diagnosis and treatment modalities will be discussed. As part of the entire presentation, examples of various types of the treatment and treatment planning will be utilized as part of the different topics covered. The hands on part will cover current pediatric restorations for primary teeth. Integral in this will be a focus on aesthetic anterior and posterior restorations.

OBJECTIVES
- Review current basics of clinical everyday pediatric dentistry.
- Provide the participants with better understanding to be able to provide quality comprehensive care for their pediatric patients.
- An update of current concepts and procedures that can be utilized as part of their everyday pediatric patient care.

PRESENTER
STEVEN P. HACKMYER, D.D.S., earned his dental degree from New York University College of Dentistry, Doctor Hackmyer also earned his dental degree from New York University College of Dentistry. After that Dr. Hackmyer completed a residency in Pediatric Dentistry at Brookdale Hospital University Medical Center in Brooklyn, New York.

TIME
Check-in: TBD, 8:00 AM
Program: Friday, 9:00 AM - 5:00 PM

LOCATION
UT Health San Antonio, School of Dentistry

TUITION
Dentist: $220.00

Texas Brief AM  
Lecture Course  
LAST CHANCE!  
“Lawsuits, Dental Board Investigations, and Other Bad Things That Can Happen to a Dental Practice!”  
How to Avoid These Setbacks in Your Dental Office.  
EDWARD P. “JOE” WALLER, D.D.S., J.D.  
OVERVIEW  
Effective September 1, 2008 Rule 104.1, licensees may choose to have up to four (4) hours of risk management-related coursework (includes risk management, record keeping, and/or ethics coursework) and the allowance for self-study hours has been increased to (6) hours. This course is designed to assist the dental practitioner in minimizing their chances of a lawsuit or Dental Board investigation through the use of effective risk management techniques.  
OBJECTIVES  
• Learn the top three reasons dental offices are at risk for lawsuits.  
• Understand how the utilization of risk management techniques can dramatically decrease the risk of a lawsuit.  
• Be able to identify issues in your own practice which will reduce the risk of a Dental Board investigation.  
• Identify the essential elements which must be in every dental record to allow you to comply with Dental Board Rules.  
• Learn the steps which must be taken to increase your chances of a favorable outcome in a Dental Board investigation.  
• Understand the documentation issues which can reduce your exposure from investigations by other State and Federal agencies.  
PRESENTER  
EDWARD P. “JOE” WALLER, JR., D.D.S., J.D., received his dental degree from St. Louis University School of Dentistry in 1969 and his law degree from St. Mary’s University School of Law in 1990. He is an attorney with the law firm of Brin & Brin in San Antonio, Texas. His practice is focused on the defense of hospitals, physicians, and dentists in medical and dental malpractice lawsuits. Dr. Waller also frequently represents dentists in investigations and hearings before the State Board of Dental Examiners.  
TIME  
Check-in: TBD, 8:00 AM  
Program: Friday, 9:00 AM-12:00 PM  
LOCATION

SPECIAL FEE OFFER  
Register for the morning program and receive a discount on the afternoon Texas Brief. Lunch is included for the participants attending both sessions.
**DECEMBER 1-2**

**Participation/Certification Course for Dentists and Dental Hygienists**

**A Standard Proficiency Certification Course in Laser Dentistry**

ROBERT A. CONVISSAR, D.D.S., B.S.

Candidates who successfully complete this course and its prerequisites will receive a Certificate of Standard Proficiency in Laser Dentistry recognized by the Academy of Laser Dentistry.

**OVERVIEW**

The severe wear patient has multiple etiologies. We want to know and understand the cause of the wear and how to tailor our restorative efforts to the patient’s needs.

Initial examination of a new patient occasionally reveals a severely worn dentition characterized by extensive wear and loss of tooth structure. Function and esthetics are compromised, and the prognosis for one or several teeth may be jeopardized if the problem is not corrected. The complex nature of this condition, and its multifactorial etiology, often overwhelms the restorative dentist in treating such widespread tooth destruction.

Loss of tooth structure may be a result of mechanical wear (attrition, abrasion) or chemical attack (erosion). We will review the various etiologies and the risks associated with each when we try to reconstruct the patient. A brief review of dental occlusion will be included as a point of orientation.

We will review the new materials on the market for restoring these patients. The use of zirconia or lithium disilicate will reviewed. We will discuss material properties and how best to use them for the dental wear patient. Concentration will be on the full mouth reconstruction of these cases.

This program is a clinically oriented program reviewing over 30 years of cases and follow up documented by Dr. Hansen.

**OBJECTIVES**

Following this unit of instruction, the practitioner should be able to:

- Describe the etiologies for the worn dentition.
- Identify the types of tooth wear.
- Describe how to perform an accurate diagnostic mounting to evaluate wear.
- Explain the use of the diagnostic mounting in diagnosis and treatment planning.
- Understand the proper sequence for restoring extensive tooth wear.
- Understand the various new materials used to restore difficult cases.

**LOCATION**

UT Health San Antonio, School of Dentistry

**DECEMBER 2**

**Lecture Course**

CHARLES W. WAKEFIELD, D.D.S.

**OVERVIEW**

This program will review current restorative materials and the rationale for selection and clinical use of the most appropriate material in varying clinical situations. The confusion between marketing and evidence-based dentistry will be made clear. Aspects to be discussed include selection of adhesive systems; microfill, hybrid and nanofilled composites; glass ionomers, resin modified glass ionomers and composites as liners, luting agents and restoratives; information and direct pulp capping with calcium hydroxide or adhesive agents; esthetic alternatives such as indirect composite, porcelain inlays/onlays/crowns and their clinical techniques. The application of color in dentistry, principles of smile design and clinical restoration of cosmetic cases for the general dentist will be described and illustrated in detail.

**OBJECTIVES**

- Amalgam – Types, new developments regarding mercury
- Cast gold – Is this still the best?
- Adhesive systems – Is the latest generation better for all adhesive procedures?
- Glass ionomers – Conventional, reinforced, condensable, luting
- Composites – Why would anyone ever buy these?
- Composites – Which ones should I use for different procedures?
- Esthetic dentistry – Composites, PFM’s or full porcelain – Basics of planning multidisciplinary esthetic cases and principles of Smile Design.
- Use of color in dentistry and application to shade matching.
- Light curing units – High intensity or low? Fast or slow? QTH or LED? Which is best?

**LOCATION**

UT Health San Antonio, School of Dentistry

**TIME**

DEC 15
NEW COURSE

Texas Brief AM
Lecture/Participation Course
for Dental Hygienists
Curved Ultrasonic Insert
How It Works?
JUDY A. ALVARADO, M.Ed., R.D.H.
VIRGINIA G. CARRILLO, R.D.H., M.Ed.

OVERVIEW
New ultrasonic instruments allow slimmer inserts to be operated at a higher power, and curved inserts for better adaptation. A case based format will be utilized to introduce new techniques for improving calculus removal skills with difficult periodontal patients. This course will bring the latest information on ultrasonic instrumentation in a combined classroom and ‘hand-on’ session.

OBJECTIVES
By attending this workshop participants will:
• Review the evolution of ultrasonic instrumentation
• Review the anatomy of the root surface of teeth
• Develop strategies to accomplish non-surgical periodontal instrumentation
• Practice with slim inserts on specially prepared typodont
• Practice with curved inserts on specially prepared typodonts

PRESENTERS
JUDY A. ALVARADO, M.Ed., R.D.H.
holds a full-time faculty position at UT Health San Antonio in the Department of Periodontics. She graduated from UTHSCSA Dental Hygiene Program in 1992. In 2014, she completed her PhD in Education from Concordia University Portland, Oregon.

VIRGINIA G. CARRILLO, R.D.H., M.Ed.
completed her Bachelor of Science from the University of Texas Health Science Center San Antonio in Dental Hygiene in 2004 and earned her Master’s in in Educational Leadership from Concordia University, Portland, Oregon 2014. Carrillo is also a Course Director and a Clinical Instructor at UT Health San Antonio.

POSTPONED

DEC 15
NEW COURSE

Texas Brief PM
Lecture/Participation
Course for Dental Hygienists
On the Cutting Edge: Effective Instrument Sharpening
LYNN A. SMILEY R.D.H., M.Ed.

OVERVIEW
This course is built for all practitioners that want to learn how to effectively sharpen scaling instruments for use in clinical practice. Despite the many gadgets that have come out over the years to assist with instrument sharpening most clinicians still rely on their trusty hand stones to accomplish the task. This course focuses on sharpening utilizing hand stones and will emphasize maintaining the integrity of instruments during sharpening that will increase the longevity of your instruments clinical use. We will also review infection control and personal protective equipment protocols that should be in place for instrument sharpening. The hands-on workshop will allow participants to participate in presenter guided practice with instrument sharpening.

OBJECTIVES
At the end of this course, attendees will be able to:
• Properly identify characteristics of universal/ area specific scaling instrument design.
• Identify when instruments require sharpening.
• Understand the benefits of maintaining instrument sharpness and the risks of working with dull instruments.
• Identify common sharpening errors and how to avoid them.
• List infection control and personal protective equipment needed for instrument sharpening.
• Successfully sharpening instruments while maintaining the integrity of the instruments design.

PRESENTER
LYNN A. SMILEY, R.D.H., M.Ed., is a clinical instructor in the Division of Dental Hygiene, Department of Periodontics at the University of Texas Health Science Center at San Antonio. She has 25 years of experience as a clinical dental hygienist. She is currently the director for Introduction to Clinical Theory, Preclinical Dental Hygiene, Clinic I and Clinic II Seminar.

Participants will receive a packet of study materials. The TSBDE-Approved Course for Certification Nitrous Oxide Monitoring Certification Course for Dental Hygienists and Dental Assistants

MARY E. JACKS, R.D.H, M.S.

OVERVIEW
Dental hygienists and dental assistants, who are not currently certified to monitor nitrous oxide/oxygen inhalation conscious sedation, must now attend an approved certification course. In accordance with Rule 114.4, this course has been approved by the Texas State board of Dental Examiners (TSBDE). Upon registration for the course, participants will receive a packet of study materials. The course will consist of:

- Class, laboratory, and test session (8 hours)
- Participants must pass a written examination with a 70%
- To meet the individual needs of each student, remediation and re-testing will be determined on a case-by-case basis.
- Participants may retake the examination up to 2 times ($10 each exam). If the participant does not successfully pass after the 3rd try, the course must be retaken.

Successful completion of this course will permit certification for five (5) years.

To engage the participants' learning, innovative teaching techniques will be used. Games, audience response, and role-playing demonstrations of clinical emergencies associated with nitrous oxide-oxygen conscious sedation are some of the learning strategies that will be used. Upon completion of the course the student should be competent to pass an examination covering the following:

OBJECTIVES
- Brief history of Nitrous Oxide-Oxygen Conscious Sedation (NO-OCS)
- The legal provisions (Texas Jurisprudence) for Dental Auxiliaries to monitor NO-OCS
- Dental anatomy and physiology related to NO-OCS
- Common drugs that react to the exposure of NO-OCS
- The operation of equipment used to monitor Nitrous Oxide, as well as the safety features and infection control of equipment
- Responsibilities in monitoring patients under NO-OCS
- Recognition and management of medical emergencies associated with Nitrous Oxide

PRESENTER
MARY E. JACKS, R.D.H, M.S., is an Adjunct Assistant Professor in the Division of Dental Hygiene, Department of Periodontics at the University of Texas Health Science Center at San Antonio. Ms Jacks has over 25 year’s clinical and educational experience.

TIME
Check-in: TBD, 7:30 AM
Program: Saturday, 9:00 AM-5:00 PM
LOCATION
UT Health San Antonio, School of Dentistry
TUITION
Allied Dental Personnel: $365.00
KDR Recipient: $347.00
JTH Recipient: $335.00
RSN Recipient: $328.00
CREDIT (Course Code: 161817A)
AGD Code: 260/497 Hours: 8

NEW COURSE

First session begins in February!

Course Director
David E. Snyder, D.D.S., entered the University of Washington Dental School in 1950, just at the beginning of the Korean War. After graduation in 1954 he served in the Navy Dental Corps for three years, two of which were spent on the USS Nereus, a submarine tender home ported in San Diego, California. After his discharge, he opened a practice in San Diego.

Accounts of “old dentistry” from his father, teachings of dental schools of the 1950’s, and tricks learned from Dr. James P. Vernetti encouraged Dr. Snyder to teach dental students several alternative techniques. Some of them, such as the intra-osseous local anesthetic injections taught by Dr. Vernetti in the 1960’s, became popular in our Texas school decades later.

LUNCH INCLUDED
Plan to arrive at 11:30 AM. This will give you time to eat before the presentation starts at 12:00 PM. Should you be delayed, you can eat during the presentation.

The David E. Snyder Luncheons for Learning Series 2018
Course Code: 161826A

If you have any suggestions for topics please call us at 210-363-8623

http://smile.uthscsa.edu
Upon completion of the course, participants will:

OBJECTIVES
- practice situations.

The trachea will be discussed, demonstrated and practiced. Administration on pig feet and cricothyrotomy on pig techniques including use of several airway devices, as in each class in order to ensure plenty of time for each person to practice on the manikin.

Activities will include basic and advanced ventilation techniques including use of several airway devices, as well as the use of many emergency drugs, including sedation reversal drugs. In addition, intravenous drug administration on pig feet and cricothyrotomy on pig trachea will be discussed, demonstrated and practiced. Cardiac defibrillation will be part of several of the practice situations.

OBJECTIVES
- Upon completion of the course, participants will:
  - Recognize an evolving medical or sedation emergency
  - Understand the use and placement of basic and advanced airway devices
  - Use and administration of emergency medications
  - Understand critical thinking and problem solving in medical/sedation emergencies
  - Develop leadership skills as they apply to emergency management

PRESENTER
- ERNEST B. LUCE, D.D.S., received his DDS degree from the University of Texas Health Science Center at Houston in 1985. In June of 1986, he completed a one year General Practice Residency at The University of Texas Health Science Center at San Antonio. Upon completion of the residency, Dr. Luce joined the Department of Comprehensive Dentistry at The University of Texas Health Science Center at San Antonio. Currently, he is a Clinical Associate Professor at the Health Science Center, and he also maintains a part time private practice in general dentistry in San Antonio.

TIME
- Check-in: TBD, 7:30 AM-8:00 AM
- Program: Friday, 8:00 AM-5:00 PM

LOCATION
- UT Health San Antonio, School of Dentistry

TUITION
- Dentist: $1,200
- KDR Recipient: $1140.00
- JTH Recipient: $1104.00
- RSN Recipient: $1080.00
- Allied Dental Personnel: $190.00

CREDIT (Course Code: 161820A)

- Register for the morning program and receive a 30% discount on the afternoon Texas Brief. Lunch is included for the participants attending both sessions.

Texas Brief AM
Lecture Course
Clinicopathologic Cases of Common Oral Conditions
MICHAEL A. HUBER, D.D.S.

OVERVIEW
- With the aid of multiple slides and cases, presented in an interactive case-based discussion format, this course is intended to improve the practitioner’s ability to obtain and interpret the medical history and plan appropriate treatment modifications to recognize and properly manage common oral conditions.

OBJECTIVES
- Participant questions are strongly encouraged. Specific topics include, but are not be limited to:
  - Allergic reactions
  - Autimmune disorders
  - Candidiasis
  - Benign oral lesions
  - Dry mouth
  - HIV/AIDS
  - Oral cancer

PRESENTER
- MICHAEL A. HUBER, D.D.S., received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1980. He continued with postgraduate training in Oral Medicine and Maxillofacial Radiology at the National Naval Dental Center, Bethesda, Maryland in 1986 and received a Certificate in Oral Medicine in 1988. Upon his retirement from the United States Navy in 2002, Dr. Huber joined the faculty as an Assistant Professor in the Division of Oral Medicine, Department of Dental Diagnostic Science at The University of Texas Health Science Center at San Antonio, Dental School.

He has been teaching both pre-doctoral and graduate dental students at the Health Science Center, and is an active participant in the Dental School’s Tertiary Care Oral Medicine Clinic. His current research activities include evaluating novel diagnostic techniques for the early detection of oral cancer.

TIME
- Check-in: TBD, 9:00 AM
- Program: Friday, 9:00 AM-12:00 PM

LOCATION
- UT Health San Antonio, School of Dentistry

TUITION
- Individual: $125.00
- KDR Recipient: $119.00

- Hours: 3

Update on Antimicrobial Prophylaxis and Oral Cancer Screening in Dental Practice – New Controversies
MICHAEL A. HUBER, D.D.S.

OVERVIEW
- Recent guidance published jointly by the American Dental Association and the American Academy of Orthopedic Surgeons pertaining to the prevention of prosthetic joint infection in the dental setting has been recently introduced. In addition new recommendations from the United States Preventive Services Task Force addressing screening for oral cancer have also been introduced. Both of these new sets of guidelines have generated much debate and consternation in the dental profession. The purpose of this course is to update the practitioner on the pros and cons of both recommendations and offer a perspective on how best to interpret and implement.

OBJECTIVES
- At conclusion, participants should be able to discuss:
  - Relevant risks of dental care as it pertains to prosthetic joint infection.
  - Have a better understanding of the recently released guidance addressing prosthetic joint infection and dental care.
  - Discuss the oral screening and its integral relationship with the comprehensive head and neck examination.

PRESENTER
- MICHAEL A. HUBER, D.D.S., received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1980. He continued with postgraduate training in Oral Medicine and Maxillofacial Radiology at the National Naval Dental Center, Bethesda, Maryland in 1986 and received a Certificate in Oral Medicine in 1988. Upon his retirement from the United States Navy in 2002, Dr. Huber joined the faculty as an Assistant Professor in the Division of Oral Medicine, Department of Dental Diagnostic Science at The University of Texas Health Science Center at San Antonio, Dental School.

He has been teaching both pre-doctoral and graduate dental students at the Health Science Center, and is an active participant in the Dental School’s Tertiary Care Oral Medicine Clinic. His current research activities include evaluating novel diagnostic techniques for the early detection of oral cancer.

(210) 567-3177
http://smile.uthscsa.edu
OBJECTIVES
- Understand the limitations of planar film, the need to embrace CBCT, and the interpretation of CBCT scans.
- Review different methods of surgical guide fabrication from simple in-house methods to laboratory fabricated.
- Describe the advantages of the flapless surgical approach over conventional flap surgery.
- Understand the advantages of the crestal approach to sinus augmentation, necessary armamentarium, surgical protocol and the management of complications based on the medical literature.

PRESENTER
WILLIAM C. RODDY, D.D.S., received his dental degree from the University of Iowa in 1979. He served on active duty in the US Navy from 1979-1999, retiring at the rank of Captain. He currently is the sole proprietor in his General Dentistry practice in Fort Worth. His in-house lab has 3 different milling systems for the fabrication of surgical guides, zirconia bridges, and titanium bars and custom abutments.

TIME
Check-in: TBD, 8:00 AM

AGD Code: 690 Hours: 7

The School of Dentistry thanks Dennis for its unrestricted educational grant in support of this continuing education program.

OVERVIEW
While dental implant services have been the fastest growing segment of the dental industry for many years, the number of dentists placing implants has only increased by modest numbers. One reason for this is that training programs often emphasize complex and technically demanding approaches that require extensive training and costly armamentarium. By using modern minimally invasive techniques, the majority of implant cases can be economically and efficiently treated in the general practice setting with minimal complications and without interrupting the typical daily workflow. This course emphasizes guided surgery, flapless surgery, crestal approach sinus augmentation and the management of complications.

OBJECTIVES
- Learn the pros and cons between intraoral scanners vs. conventional impressions
- Identify the problems associated with color and lighting and how to improve our shade-taking ability
- Trouble shoot impression techniques and materials to get perfect impressions
- Apply the communication tools needed to achieve optimal results between you and the lab
- Understand the basics of occlusion in restoring anterior teeth.
- Know what questions to ask and tools required to achieve excellent anterior esthetics.
- See the differences in restorative products available and how to choose the best for your patient.
- Apply tools to build a more successful practice through image building and marketing.

PRESENTER
ROBERT P. MARBACH, B.A., C.D.T is a Past Board of Directors at the Pankey Institute. He is Founder and owner of Authentic Dental Lab in San Antonio, TX. Mr. Marbach is a Board Certified Dental Technician currently working on his Masters in dental technology and has over 25 years of dental experience. In 1999 Bob received his Technical Certificate of Completion from the Pankey Institute. Mr. Marbach is a past member of the Advisory Board for The Canadian Journal of Dental Technology.

AGD Code: 257

**OVERVIEW**
Demographic trends clearly demonstrate that as the average life-expectancy continues to grow in America, so does the burden of chronic illness. Thus, the contemporary dental practitioner is encountering an ever-increasing number of patients with a multitude of medical conditions and associated oral lesions which affect both the patient’s oral health and management. In addition, many dental patients see their dentist more regularly and frequently than they do their primary medical manager. This places the dental practitioner in the unique position of often being the first to observe the signs and symptoms of a serious systemic condition. This course will provide a review of some of the common medical conditions and associated oral lesions the dental practitioner is likely to encounter in his or her practice. In addition, the historical and clinical clues of commonly encountered undiagnosed systemic conditions will be provided.

**OBJECTIVES**
This course is intended to improve the practitioner’s ability to obtain and interpret the medical history and correlate these findings with the clinical examination to:

- Establish an appropriate diagnosis
- Plan appropriate treatment modifications to safely manage the medically compromised patient.

Specific topics discussed will include, but not be limited to:

- Allergic reactions
- Autoimmune disorders
- Candidiasis
- Cardiovascular disease
- Dermatologic disease
- Dry mouth
- Hepatitis
- HIV/AIDS

**PRESENTER**

**OVERVIEW**
Dental bonding agents and resin luting cements are constantly evolving areas of restorative dentistry. In addition, new products have been introduced in the glass ionomer category. Dentists are faced with a large range of restorative dental materials and are expected to separate advertising from reality. In this presentation, Dr. Khajotia will differentiate among the various categories of bonding agents and resin luting cements from the perspective of critical Materials Science considerations and clinical use, without personal bias or commercial interests. He will also discuss traditional glass ionomers and resin-modified glass ionomers from that perspective.

Dr. Khajotia will review the composition, manipulation and properties of bonding agents, resin luting cements, glass ionomers and resin-modified glass ionomers. He will also provide an overview of current research in his laboratory on the development of an antibacterial bonding system, and on interactions between oral biofilms and dental materials.

**OBJECTIVES**
- Composition, manipulation and properties of bonding agents
- Benefits and limitations of bonding agents
- Developing an antibacterial bonding system
- Composition, manipulation and properties of resin luting cements
- Benefits and limitations of resin luting cements
- Composition, manipulation and properties of glass ionomers and resin-modified glass ionomers
- Benefits and limitations of glass ionomers and resin-modified glass ionomers
- Interactions between dental materials and oral biofilms
- Concepts that dentists need to know about dental materials
NEW LOCATION FOR 2018

SKI & LEARN

ASPEN SNOWMASS

The Westin Snowmass Resort
Aspen, Colorado

FEBRUARY 8-10, 2018

Develop new practice skills and update your professional network, while soaking in the glorious winter sunshine at Aspen Snowmass. This laid-back, ski destination offers winter sport enthusiasts the chance to enjoy world-class, picture perfect snow conditions daily.

Slope-side resort • Easy travel in & out • Thrilling terrain
Ski-village charm • World-class shopping • Family friendly

Program jointly sponsored by:

For updates and details, visit UMN website
smile.umn.edu

To register call UMN
800-533-0324

Please coordinate travel arrangements on your own.
Accomodations should be made directly with:
Westin Snowmass Resort • 100 Elbert Ln • Snowmass Village, CO 81615
Phone: (970) 923-8200 • www.westinsnowmass.com
OBJECTIVES

- Review the anatomy of anterior teeth
- Understand totally how anterior teeth are supposed to function
- Take a close look at what makes front teeth esthetically pleasing
- Preparation of anterior teeth -- crowns and veneers
- Simple methods of temporization
- A quick review of impression technique

PRESENTER

JACK I. SHIRLEY, D.D.S., received his DDS degree from The University of Texas Health Science Center at San Antonio in 1979. He has maintained a private practice in San Antonio, Texas for over twenty years. Dr. Shirley has been associated with the Pankey Institute in Key Biscayne, Florida for eighteen years. He has served as Associate Faculty for thirteen years and is President of the Board of Trustees and a member of the Board of Directors. Dr. Shirley has been selected to represent the Pankey Institute through its Speakers Bureau and can be heard through the national at numerous dental meetings speaking about Pankey philosophy, techniques, and the effectiveness of comprehensive care dentistry. He has a passion for dental education and a strong desire to help dentists reach their full potential.

TIME

Check-in: TBD, 8:00 AM
Program: Friday, 9:00 AM-12:00 PM

SPECIAL FEE OFFER

Register for the morning program and receive a 30% discount on either of the afternoon Texas Briefs. Lunch is included for the participants attending both sessions.
The purpose of this presentation is to provide evidence-based information to evaluate the relationships of the hard and soft tissues of connection to dental implants and to determine if these tissues are subject to periodontal breakdown.

OBJECTIVES

- Understand the hard and soft tissue relationships to dental implants.
- To understand the pathways of periodontal breakdown of dental implants.
- Identify hard and soft tissue conditions that may contribute to periodontal breakdown of dental implants.
- Determine the time and sequence for treatment and prevention of failing dental implants.
- To properly to inform the patient of the potential periodontal disease and systemic concerns of dental implants.
- Determine the proper maintenance of dental implants by the patient and the dental hygienist.

PRESENTER

DONALD P. CALLAN, D.D.S., received his dental degree in 1975 and a Certificate in Periodontics from the University of Missouri at Kansas City in 1978. Dr. Callan maintains a private practice limited to Periodontics with an emphasis on tissue regeneration and implant dentistry in Little Rock, Arkansas. His current hospital appointment includes the Arkansas Children’s Hospital in Little Rock, Arkansas.

TIME

Beyond the Classroom

Online Learning from The Office of Continuing Dental Education at UT Health San Antonio
www.smile.uthscsa.edu
Online Learning Opportunities are Presentations-On-Demand (ePOD)

Video presentations are streamed in your web browser in Quicktime format. If you don’t have the latest version Quicktime software installed in your computer, we provide the link to Apple’s website at http://www.apple.com/quicktime/download

www.smile.uthscsa.edu

CDEmobile and CDEonDemand are free presentations that allow the dental professional to view the content and be able to receive credit. These presentations are high definition, entertaining, state of the art advanced animation technology video presentations which allow users to select and watch/listen to internet/streaming continuing education video content available 24 hours-a-day, 7 days-a-week.

- **CDEmobile**
  CDEmobile provides video content on different dental topics for FREE! The course content are designed to work on iPhone, iPod Touch, iPad and Android-based mobile phones and devices: http://cdemobile.uthscsa.edu

- **CDEonDemand**
  CDE on Demand are 1-hour video presentations which allow users to select and watch/listen to internet/streaming continuing education video content for FREE using your computer (desktop or laptop) available 24 hours-a-day, 7 days-a-week: http://cdeondemand.uthscsa.edu

Video Streaming, Interactive Web Courses, and Testing Center courses allow the dental professional to view content in 1 hour, 1.5 hour and 2 hour segments and receive credit. We also offer continuum courses which may require multiple lectures that meet specific requirements for certifications. These presentations are high definition, entertaining, state of the art advanced animation technology video presentations which allow users to select and watch/listen to internet/streaming CE video content, 24 hours-a-day, 7 days-a-week.

- **Video Streaming**
  These presentations are produced at the Massad Center for Higher Learning, state of the art film studio, or are provided by our Partners in Education after a peer review process based on UTHSCSA standards. http://cdestream.uthscsa.edu

- **Interactive Web Courses**
  You are invited to participate in our interactive didactic courses presented by UT Health Science Center at San Antonio, Continuing Dental Education. This is the modern version of the correspondence courses. http://icourses.uthscsa.edu

- **Testing Center**
  This testing site allows the dental professional to take a short quiz and receive CE credits after viewing or reading dental material that has been made available through the Office of Continuing Dental Education at The UTHSCSA, School of Dentistry. http://testingcenter.uthscsa.edu

### MARCH 2, 2018

#### THREE TOPICS in a SINGLE DAY

**Lecture Courses**

**PRESENTER**

JAMES S. KOHNER, D.D.S., received his dental degree from The Ohio State University, and Case Western Reserve University Dental School, and obtained his certification in Periodontics from the Boston University School of Graduate Dentistry. He currently lives in Scottsdale, Arizona. Dr. Kohner is an experienced teacher who has presented courses on Soft Tissue Grafting to a wide range of audiences, including many state associations all over the US and in 8 foreign countries, and has presented at the American Academy of Periodontology meetings for many years.

**Minimally Invasive Antimicrobial Treatment for Basic to Advanced Periodontal Disease**

Adding chemotherapeutic methods to target the periodontal bacteria will allow for successful management of very advanced cases that might otherwise have been treated only with extraction, to infected cases you might traditionally treat with non-surgical methods. In doing so, results will be improved over classic surgical or SCRP methods which may not kill all bacteria at the diseased sites. These methods will be explained by outlining both in-office procedures, as well as specific anti-microbial procedures for the patient to do at home. When combined, they yield predictable results for previously failing cases and those treated for the first time.

**How Crown Lengthening Will Enhance Your Restorative Results**

This topic covers methods, limitations, and benefits of both esthetic and functional crown lengthening. These principles apply to both posterior and anterior teeth, and both will be covered. Participants will see how crown margin proximity to soft tissue can adversely impact their restorative results, which in turn leads to better understanding of why tissues are red and sore at times. Discussion points include making diagnostic decisions regarding Crown Lengthening from both radiographic and clinical perspectives. It includes a detailed discussion of Biologic Width and how that impacts restorative decisions, including how to improve “Gummy Smile” issues.

**Achieving Predictable Restorative Results with Soft Tissue Grafting**

Learn evidenced-based solutions for the types of soft tissue challenges that you face on a daily basis, such as how to cover those exposed roots and predictably stop, or prevent, recession especially in the esthetic zone. Learn to gain peace of mind in knowing the gingiva stays in place at the margins of newly placed esthetic crowns. In this course, methods are illustrated to solve those problems and enhance your restorative results by using both Free Gingival and Connective Tissue Grafts.

#### TIME

- Check-in: TBD, 8:00 AM
- Program: Friday, 9:00 AM - 5:00 PM

#### TUITION

- Dentalist: $210.00
- KDR: $199.00
- JTH: $193.00
- RSN: $189.00
- Allied Dental Personnel: $160.00

**REGISTRATION FORM**

Please use one form per person-photocopy as needed. Please include both registration worksheet and registration form.

**PREREGERATION**: Preregistration for all courses is necessary. Each participant should pre-register for a course as a course packet will be available at the time of check-in. ADA CERP® Continuing Education Recognition Program

UT Health Science Center at San Antonio is an ADA CERP Recognized Provider
REGISTRATION INFORMATION

Phone Number: (210) 567-3177 • Fax Number: (210) 567-6807 • Web: http://smile.uthscsa.edu

PRE-REGISTRATION: Preregistration for all courses is necessary. It is the responsibility of the participant to preregister for a course as the course packet will be available for them at final check-in. Please call the Office of Continuing Dental Education at (210) 567-3177 to preregister. Preregistration of courses requires a registration form with check made payable to “UTHSCSA” to: UTHSCSA Continuing Dental Education MSC 7930 7703 Floyd Curl Drive San Antonio, Texas 78229-3900

The Office of Continuing Dental Education may find it necessary to implement a reasonable fee increase on noted courses.

The Office of Continuing Dental Education cannot be held responsible for the cost of a nonrefundable airline ticket or flight change in the event of a cancellation of a course cancellations or the rescheduling of the program.

Upon registering in any Continuing Dental Education activity, the participant agrees that the University of Texas Health Science Center at San Antonio and their affiliates, and all personnel associated with the program are not responsible or liable for any injuries or other damages sustained by the attendee in connection with the scheduled activity, and the participant hereby releases each of them from liability for any injury or damage arising directly or indirectly from any such injury or damage.

The registered participant grants permission to the Office of Continuing Dental Education (and its designees and agents) to utilize the participants image, likeness, actions and/or statements in audio, video, or graphic representation, play or other transmission, exhibition, publication, or reproduction made of, about, or at the activity without further authorization or compensation.

Participants may not use video or audio recording devices during the course or scheduled event.

Registering for any Continuing Dental Education activity constitutes acceptance of these terms.

PAYMENT BY CREDIT CARD: MasterCard, Visa, or Discover Card only.

ON-SITE CHECK-IN: Please check details of each course for designated time and location of course or scheduled event. Participants can pick up packets one hour prior to the beginning of the course. Same day walk-in enrollments will be accommodated on a space-available basis.

CONFIRMATION: Your registration confirmation will be mailed from our registrar within 5-7 working days upon receipt of payment. You will also receive a listing of nearby hotels at this time. This will be followed by a final confirmation letter designating the details and location of the course within 10 days of the program date. A map of the campus and parking information is on the Health Science Center website www.uthscsa.edu. Proof of payment and Certificate of Attendance will be issued on day of the course for those who have registered online or on prepaid. Replacements or additional copies of the Certificate of Attendance can be issued, however, participants will be charged an administrative fee. On-site participants who pay on the day of the course will be mailed their Receipt of Payment and Certificate of Attendance.

TUITION DISCOUNT: Recipients of the Kenneth D. Rudd CDE Participant Award may deduct 5 to 10% from the tuition of designated courses. This tuition discount is offered to the participants who have attended at least 100 continuing dental education hours of courses sponsored by the Office of Continuing Dental Education. The University of Texas Health Science Center at San Antonio, School of Dentistry.

ACCOMMODATING PEOPLE WITH SPECIAL NEEDS: If you are a person with special needs and desire special accommodations, please advise us at the time of registering for the course. Requests will be kept confidential. Individuals with speech or hearing impairments can contact the Office of CDE by using TDD Message-Relay Texas. If you have a TDD, 1-800-733-2689. If you do not have a TDD, call 1-800-733-2988.

AFFILIATIONS: The University of Texas Health Science Center at San Antonio, School of Dentistry is a member of the American Dental Education Association.

CONCERNS, COMPLAINTS & SUGGESTIONS: To assure an optimal educational experience, the Office of Continuing Dental Education and the Dental School’s Committee on Continuing Dental Education requests that the participants, faculty and staff to register concerns, complaints or suggestions for formal review and, if appropriate, subsequent action. To warrant a fair and expeditious review, contact the Office of Continuing Dental Education for the appropriate form. Concerns or complaints about a CE provider may be directed to the provider or to the ADA CERP at www.adacorp.org.

GENERAL REFUND POLICY: If you must cancel your registration, please notify the Office of Continuing Dental Education as soon as you determine you are unable to attend so that a refund may be considered. Any cancellation made prior to the start of the program will be subject to an administrative fee assessment of $99.25. Any cancellation made one week or less prior to the course does not qualify for a refund. However, participants may choose to place their tuition minus an administrative and direct cost fee assessment into a holding account for future use. “No Shows” will not qualify for a refund. Continuing Dental Education reserves the right to deny a request for a refund. Refunds are not available by mail, by fax, or by e-mail to initiate the refund process. Please allow four to six weeks for all refunds. Special refund policies may apply at all off-site sites. Contact our office for the specific refund policy regarding any course.

OFF SITE (PARTICIPATION & LECTURE) PROGRAM REFUND POLICY: If you must cancel your registration, please notify the Office of Continuing Dental Education as soon as you determine you are unable to attend so that a refund may be considered. Due to commitments to off-site properties, any cancellations made two months or less prior to the course does not qualify for a refund. However, participants may choose to place their tuition minus an administrative and direct cost fee assessment into a holding account for future use. “No Shows” will not qualify for a refund. Continuing Dental Education reserves the right to deny a request for a refund. Refunds are not available by mail, by fax, or by e-mail to initiate the refund process. Please allow four to six weeks for all refunds. Specific refund policies may apply at all off-site sites. Contact our office for the specific refund policy regarding any course.

CONTINUUM, PARTICIPATION, DENTAL STUDY CLUBS, AND MULTIPLE SERIES REFUND POLICY: If you must cancel your registration, please notify the Office of Continuing Dental Education as soon as you determine you are unable to attend so that a refund may be considered. Due to commitments to these types of programs, any cancellation made prior to the start of the program will be subject to an administrative fee assessment of $198.50 plus any applicable nonrefundable deposits. Any cancellation made one month or less prior to the course does not qualify for a refund. However, participants may choose to place their tuition minus an administrative, applicable non-refundable deposits, and any direct cost fee assessment’s into a holding account for future use. “No Shows” will not qualify for a refund. Continuing Dental Education reserves the right to deny a request for a refund. Refunds are not available by mail, by fax, or by e-mail to initiate the refund process. Please allow four to six weeks for all refunds. Specific refund policies may apply to all on-site sites. Contact our office for the specific refund policy regarding any course.

INTERACTIVE WEB COURSE REFUND POLICY: If you must cancel your registration, please notify the Office of Continuing Dental Education by sending us an e-mail at smile@uthscsa.edu with your User Code and course title. To qualify for a refund, the request must be received prior to the START DATE, will be subject to an administrative and direct cost fee adjustment. No refunds will be issued after the completion of the first chapter, regardless of START DATE.

COURSE CHANGES/CANCELLATION: The Office of Continuing Dental Education reserves the right to: (1) limit registration; (2) refuse admission by refunding the course fee; (3) change the location, time, and content of the course; (4) cancel the course; or (5) change the content, format or faculty and such change will not entitle the registered participant to a refund; (6) cancel any course no less than one week prior to the course date. No course cancellation will be considered. Cancellations made after the START DATE, will be subject to an administrative and direct cost fee adjustment. No refunds will be issued after the completion of the first chapter, regardless of START DATE.

TEXAS BRIEF: Unless enrolling in consecutive Texas brief courses, no lunch is provided.

DOCUMENTATION OF COURSE CREDIT HOURS: A $20.00 administration processing fee will be charged for requests of documentation of continuing dental education course hours. A written request must be accompanied with payment. All participants are provided an official verification of attendance at the time of enrollment. This documentation is prepared by the Texas State Board of Dental Examiners as proof of attendance to the course. Course attendance is finalized at the conclusion of each individual presentation or programs. Any requested audit by state dental boards will require participant authorization to release information.

CREDIT: UTHSCSA School of Dentistry, Continuing Dental Education Program is designed as a recognized provider by the Continuing Education Recognition Program (CERP) conducted under the auspices of the American Dental Association. The formal continuing dental education courses are accepted for Federation of State Dental Boards of America, and are offered in cooperation with the Texas Chapter of AOD.

Dental Technician: Courses are approved for documented credit hours by the National Board for Certification of Medical Laboratory Technicians. The Office of Continuing Dental Education encourages course participants, faculty and staff to register concerns, complaints or suggestions for formal review and, if appropriate, subsequent action. To warrant a fair and expeditious review, contact the Office of Continuing Dental Education for the appropriate form. Concerns or complaints about a CE provider may be directed to the provider or to ADA CERP at www.adacorp.org.

Individuals should consult with their State Boards regarding recognition of courses acceptable for relicensure.

CONFLICT OF INTEREST: As required by the ADA and our Institutional Compliance and Standard of Conduct, all employees of the Office of Continuing Dental Education and CME Program are further required to disclose any financial relationships that may represent a conflict of interest for the planning committee and program. Financial relationships are not considered to be a conflict of interest if they are qualified for speaking engagement or consultant fee. Financial relationships are not considered to be a conflict of interest if they are less than $500. Any financial relationship greater than $500 must be disclosed.

Our speaker(s) has/have no proprietary, financial or other personal interest of any nature or kind in any product, service and/or company that will be discussed or considered during their presentation. If they do this has been noted in the handouts and promotion material.

EMERGENCY CONTACT: Telephone number for the Office of Continuing Dental Education: 210-567-3177. To contact a participant in the event of an emergency and there is no one available in the office, please contact the Alumni Office at 210-567-5090. Offsite emergency numbers will be provided on the registration form. As you determine you are unable to attend so that your refund may be considered. Written notification is required within five business days by mail, fax, or e-mail to initiate the refund process. A written request is required to process any refund or transfer. Contact our office for the specific refund policy regarding any course.

LATE ENTRY TO THE DENTAL SCHOOL: The main doors to the Dental School are locked during the weekends. Please inform our office if you are unable to check in at designated times.

The University of Texas Health Science Center at San Antonio is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual presentations or programs. It implicitly accepts the approval of hours by boards of dentistry.

UTHSCSA designates the number of credit hours for each course individually. UTHSCSA new recognition term will extend from 11/1/2016 through 12/31/2019. Concerns or complaints about a CE provider may be directed to the provider or to ADA CERP at www.adacorp.org.
Come to San Antonio, considered to be one of the four unique cities in the United States, and experience the essence of the Alamo City - its casual Texas flavor accented by the rich heritage of old Mexico.
