NEW ONLINE COURSE

OPIOID CRISIS in AMERICA

Developed to satisfy the Tex. Admin.
Code, Title 22, Part 5, Chap. 111, Rules 111.1 and 111.2.

Available on http://smile.uthscsa.edu

PLEASE SHARE THIS PUBLICATION WITH THE ENTIRE DENTAL OFFICE!
COURSE DESCRIPTION:
A presentation of new information on America’s current opioid Epidemic with an emphasis on the history, pharmacology and prescribing practices of opioid analgesics.

COURSE OBJECTIVES:
To fulfill TSBDE recent regulations Title 22, Part 5, Chapter 111 regarding a practitioners’ privileges to write for controlled substances.

UT Health San Antonio
School of Dentistry
Continuing Dental Education
7703 Floyd Curl Drive
San Antonio, Texas 78229-3900
Welcome to the UT Health San Antonio, Continuing Dental Education Program. We are very excited to be able to provide you with opportunities to expand and enhance your dental skills and to aid you as you maintain compliance with local, state and federal licensing agencies.

We have recruited and engaged speakers from across the country to provide up-to-date and timely courses to help you as you work to hone your dental skills. The dental profession is evolving at an incredibly rapid pace and with a variety of topics such as implants, bone grafts, CAD-CAM restoration, 3D-surgical guides, milled porcelain restoration, orthodontics, cosmetic dental materials, endodontic therapies, and the list goes on.

The other important aspect, is bringing your team up-to-speed. While it is necessary for the dentist to stay apprised of new technologies, it is critical that the dental team be equipped and informed on helping you implement the latest and greatest technologies and procedures.

The next time you consider a course… consider bringing the entire team.

We are blessed to have SAN ANTONIO, TX as a great place for us to host our courses. Our new clinic, CENTER FOR ORAL HEALTH CARE AND RESEARCH (COHR), gives us some fantastic spaces to demonstrate, illustrate and teach our programs. Also, besides the “live” courses, we offer other learning opportunities such as on-line learning, study clubs like our LONGHORN FOOTBALL DENTAL STUDY CLUB that meets before each UT Austin home game, and travel programs such as “Ski & Learn”.

When you look at the entire program, we have over 230 course offerings. Some topics offered multiple times throughout the year and some as an annual event such as the JAMES P. HOLLERS LECTURE. We have made every attempt to build a program that meets the needs of today’s dental professional.

We look forward to being your Dental Continuing Education provider.

24th Annual Preceptorship in Dental Implantology

PRECEPTORSHIP INFORMATION
This Preceptorship honors our co-founders Roland M. Meffert, D.D.S. and Robert J. Cronin, Jr., D.D.S., M.S., and consists of an annual review and updated curriculum that is clinically focused while incorporating the latest research from the clinical basic sciences. This will provide the participant with an understanding of the rationale and scientific basis for the clinical practice of implantology. The participants will meet for six weekend sessions which will include didactic sessions and some hands-on training experiences in an interactive learning environment.

PRECEPTORSHIP OBJECTIVES
The participant will learn:
• The rationale and scientific basis for the successful clinical practice of implantology.
• The current concepts, principles, and clinical methodology used effectively in practice.
• The proper evaluation, diagnosis, and selection of patients for implant placement and restoration.
• To develop and understand specific implant, surgical and prostodontic skills, and the different modalities available.
• To manage the more difficult clinical situations, such as patients with advanced maxillary or mandibular atrophy.
• The practice management aspects of dental implantology: records, insurance, informed consent, medical-legal and marketing considerations.

DIDACTIC SESSIONS
• History and future of dental implantology.
• Three-day classroom/cadaver laboratory exercises.
• Biomechanical and biomaterial aspects of dental implantology.
• Physiology of bone with emphasis on cellular, molecular healing, bone maturation of bone in function and selection of implants with different designs and surfaces relating to bone density and planned Implant function.
• Anatomy of the maxilla, mandible and TMJ in terms of available bone and anatomy as related to stress distribution.
• Anatomical structures (muscles, nerves, arteries) as they relate to implant placement.
• Philosophies of implant retention and stabilization.
• Essential treatment planning facets, including patient selection, past dental and medical history, essential diagnostic guides (casts. templates, etc.), documentation, appointment sequencing with laboratory, surgeon, restorative dentist.
• Essentials of joint treatment planning, and recall principles.
• Surgical and prostodontic considerations including incision design, fixture and abutment selection, occlusal considerations, and force transmission.
• Peri-implantitis and its effect on the dental implant from the infective and traumatic aspects.
• Post-restoration responsibilities of staff personnel, hygienist, surgeon and restorative dentist on a recall basis.
• Demonstration of instruments, techniques for post-implant placement, restoration hygiene.
• Principles in troubleshooting, rescue, and retrieval procedures.
• The prosthodontic aspects of diagnosis and treatment planning as well as the clinical communication of this information to the surgeon.
• Procedures for developing optimum esthetics and the biomechanical loading aspects of implant restorations.
• Component systems will be categorized with specific indications for their use.
• The importance of optimal laboratory support and clinical communication skills to facilitate positive interaction with the dental technician.
• Indications and techniques relating to insertion of implants in single tooth and fresh extraction site situations.
• Hard and soft tissue grafting, guided soft, hard tissue regeneration in both pre and post-implant placement, including sinus lift procedures.
• Repair of the ailing, failing implant with new regenerative procedures and materials.
• An overview of informed consent documentation and medical-legal review.
• The principles of practice management, marketing, and insurance considerations.
• An opportunity for your dental hygienist to complete a certification course in dental implant hygiene.

PARTICIPATION SESSIONS
• The Preceptorship will feature hands-on and interactive sessions.
• Co-Directors will conduct a two hour diagnostic and treatment planning segment featuring the preceptors’ patient cases at each of the weekend sessions.
• Implant anatomy laboratory will give the preceptors the opportunities to familiarize themselves in implant anatomy through dissection and to actually place implants in cadaver models.
• Hands-on exercises will familiarize the preceptors with the surgical and restorative aspects of dental implant systems and prosthetic laboratory techniques.

curriculum and is now the model for programs throughout the world.

PRECEPTORSHIP DIRECTOR
BRIAN L. MEALEY, D.D.S., M.S., received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1983. He attained his specialty certificate in Periodontics from Wilford Hall Air Force Medical Center, Lackland Air Force Base in 1990 and a Master of Science in Periodontics from UTHSCSA, Dental School. He is an Associate Professor and Head of the Specialist Division in the Department of Periodontics at UT Health San Antonio, School of Dentistry.

PRECEPTORSHIP DIRECTOR
STEPHAN J. HANEY, D.D.S., earned his dental degree in 1974 from Baylor College of Dentistry in Dallas. With Air Force sponsorship he obtained specialty certification in Prosthodontics from The University of Southern California in 1979. He taught in Air Force AEGD residencies for 15 years until his retirement in 1998 when he entered private practice in Fort Worth, TX. Assuming a full time teaching position at UTHSCSA in 2007, he transitioned to Director of the Post doctoral Prosthodontics Program in 2011.

Even in today's economy there are many patients that still want implants for tooth replacement. This course has been designed for generalists and specialists who desire an intense study of various aspects of dental implantology.

Early registration will save you money!
SAVE $750.00
Make a non-refundable $500 deposit +$1000 payment before August 6, 2018
(The remaining $6,000 can be paid on a 5 month payment plan)

PRECEPTORSHIP IN DENTAL IMPLANTOLOGY REFUND POLICY
If you must cancel your registration, please notify the Office of Continuing Dental Education as soon as you determine you are unable to attend so that a refund may be considered. Due to commitments to these type of programs, any cancellation made before August 24, 2018 will be subject to an administrative fee assessment of $2,087.50 plus applicable nonrefundable deposits. Any cancellation made after August 24, 2018 does not qualify for a refund. However, participants may choose to place their tuition minus an administrative, applicable nonrefundable deposits, and any direct cost fee assessment’s into a holding account for future use. “No Shows” will not qualify for refunds. Written notification is required within five business days by mail, fax, or e-mail to initiate the refund process. Please allow four to six weeks for all refunds.

CLINICAL CONSIDERATIONS FOR CAD/CAM GUIDED IMPLANT DENTISTRY

OVERVIEW
CAD/CAM guided surgery in implant dentistry can significantly improve the safety and predictability of the outcome of dental implant treatment. However, inadequate understanding and usage of CAD/CAM guided implant surgery system may result in catastrophic surgical failures. This course will review the concept and limitation of currently available CAD/CAM guided implant surgery systems and corresponding possible clinical complication and solution. Specific surgical protocols for CAD/CAM Guided Implant Surgery will be discussed followed by hands-on session.

OBJECTIVES
• The concept of CAD/CAM guided implant surgery
• The required clinical and laboratory procedures for the successful CAD/CAM guided implant surgery such as case selection, impression, CBCT taking, virtual surgical plan, surgical guide design and clinical try in.
• The limitations and possible errors of CAD/CAM guided implant surgery, plus preventive measures.
• Practice the surgical protocol of CAD/CAM Guided Implant Surgery with a model and guides through the hands-on session.

JUNE 8, 2018 (161838A)

CLINICAL CONSIDERATIONS FOR CAD/CAM GUIDED IMPLANT DENTISTRY

April 20, 2018 (Part 1) Clinical Occlusion (161878A) (See page 27 for more info.)
The first part is designed to aid the restorative dentist in providing more comprehensive diagnostic, treatment planning and clinical treatment skills. The emphasis is to introduce the clinical aspects of disorders of the natural dentition and the different concepts of Occlusal Adjustment.

June 29, 2018 (Part 2) Clinical Occlusion: (162011A)
This part will provide important guidelines and practical tips for the management of routine and complex restorative procedures. The emphasis is to introduce the different concepts of Occlusal Bite Plane Splint appliance and be experienced in the immediate fabrication of the stabilization type of Occlusal Bite Plane using a variety of materials.

JULY 27, 2018 (161860A)

CAD/CAM DENTISTRY ESTHETICS & OCCLUSION

OVERVIEW
This course is designed to aid the restorative dentist in providing more comprehensive diagnostic treatment planning and clinical treatment skills. With the continued advances in technology, techniques and materials, the future of dentistry is changing. CAD CAM dentistry is on the cutting edge of advanced restorative care. Although an increasing number of dentists are interested in offering this treatment to their patient, there is not enough information available, especially regarding occlusion.

OBJECTIVES
Participants Will Understand...
• Parafunction and Bruxism
• Occlusal Adjustment
• Parameters
• Virtual Articulation
• Single visit restoration
• Anterior Guidance and Multiple Anterior Unit Techniques
• Materials (CAD/CAM Blocks and Bonding Materials)
• Prep Designs for Veneers, Inlays, Onlays, Crowns and Bridge
• Stain, Glaze, Characterization, and Sintering
• CBCT and CAD CAM
OVERVIEW
Dental hygienists and dental assistants, who are not currently certified to monitor nitrous oxide/oxygen inhalation conscious sedation, must now attend an approved certification course. In accordance with Rule 114.4, this course has been approved by the Texas State board of Dental Examiners (TSBDE). Upon registration for the course, participants will receive a packet of study materials. The course will consist of:
- Class, laboratory, and test session (8 hours)
- Participants must pass a written examination with a 70%
- To meet the individual needs of each student, remediation and re-testing will be determined on a case-by-case basis.
- Participants may retake the examination up to 2 times ($10 each exam). If the participant does not successfully pass after the 3rd try, the course must be retaken.

Successful completion of this course will permit certification for five (5) years.

To engage the participants’ learning, innovative teaching techniques will be used. Games, audience response, and role-playing demonstrations of clinical emergencies associated with nitrous oxide/oxygen conscious sedation are some of the learning strategies that will be used. Upon completion of the course the student should be competent to pass an examination covering the following:

OBJECTIVES
- Brief history of Nitrous Oxide-Oxygen Conscious Sedation (NO-OCS)
- The legal provisions (Texas Jurisprudence) for Dental Auxiliaries to monitor NO-OCS
- Dental anatomy and physiology related to NO-OCS
- Common drugs that react to the exposure of NO-OCS
- The operation of equipment used to monitor Nitrous Oxide, as well as the safety features and infection control of equipment
- Responsibilities in monitoring patients under NO-OCS
- Recognition and management of medical emergencies associated with Nitrous Oxide

PRESENTERS
MARY E. JACKS, R.D.H, M.S., is an Adjunct Assistant Professor in the Division of Dental Hygiene, Department of Periodontics at the University of Texas Health Science Center at San Antonio. Ms Jacks has over 25 years’ clinical and educational experience.

KDR Award Recipients

Kenneth D. Rudd 

Over 100 CDE hours with us gets you...

IMPORTANT COURSE INFORMATION
*Standard Proficiency Certification will be awarded upon successfully completing an online examination administered by the Academy of Laser Dentistry. The candidate must own a laser or have access to a laser, and have taken a previous introductory laser course. The candidate must become a member of the Academy of Laser Dentistry. A free introductory course on lasers is available on the Academy of Laser Dentistry Website at: www.laserdentistry.org
*For more information on the certification process, please visit www.LaserDentistry.org
*To view a list of KDR Award Recipients, visit: http://smile.uthscsa.edu
Upon completion of the course, participants will:

• Practice situations.

Activities will include basic and advanced ventilation techniques including use of several airway devices, as well as the use of many emergency drugs, including sedation reversal drugs. In addition, in-traosseous drug administration on pig feet and cricothyrotomy on pig trachea will be discussed, demonstrated and practiced. Cardiac defibrillation will be part of several of the practice situations.

OBJECTIVES

Upon completion of the course, participants will:

• Recognize an evolving medical or sedation emergency
• Understand the use and placement of basic and advanced airway devices
• Use and administration of emergency medications
• Understand critical thinking and problem solving in medical/ sedation emergencies
• Develop leadership skills as they apply to emergency management

PRESENTER

ERNEST B. LUCE, D.D.S., received his DDS degree from the University of Texas Health Science Center at Houston in 1985. In June of 1986, he completed a one year General Practice Residency at The University of Texas Health Science Center at San Antonio. Upon completion of the residency, Dr. Luce joined the Department of Comprehensive Dentistry at The University of Texas Health Science Center at San Antonio. Currently, he is a Clinical Associate Professor at the Health Science Center, and he also maintains a part time private practice in general dentistry in San Antonio.

A Lecture/Participation Course
Minimally Invasive
Implant Dentistry
WILLIAM C. RODDY, D.D.S.

OVERVIEW
Once reserved for the wealthiest segment of our population, dental implants are becoming mainstream. For patients with missing teeth, root caries, failed endodontics, archaic tissue-born prostheses, persistent dry mouth and reflux, dental implants are often the ideal treatment.

In the early years of dental implants, the surgery was complicated and lengthy. As a result, surgical fees were high, reflecting the specialized training and skills required at the time. Today, knowledge, experience, and technology make most implant placement surgery fast and simple. There is a backlog of unmet dental implant treatment needs which could be addressed if the general dentist provided the surgery at a more affordable price. The need for complicated surgical procedures would likely increase as well, and the higher fees understandably warranted by specialists. The number of dentists placing implants in the US is just too low to serve our patients.

OBJECTIVES
• Understand the standard of care for implant surgery, and a surgical approach to minimize litigation.
• Know the limitations of planar xrays, and the advantages of cone-beam technology.
• Learn different methods of generating surgical guides; from simple in-house to lab-generated.
• Learn flapless guided implant surgery protocol.
• Learn the advantages of crestal approach sinus augmentation, & the treatment of complications.
• Hands-on with models and surgical guides.

Update on Common Medical
Conditions and Lesions
Encountered in the
Contemporary Dental Practice
MICHAEL A. HUBER, D.D.S.

OVERVIEW
Demographic trends clearly demonstrate that as the
average life-expectancy continues to grow in America,
so does the burden of chronic illness. Thus, the
contemporary dental practitioner is encountering an
ever-increasing number of patients with a multitude of
medical conditions and associated oral lesions which
affect both the patient’s oral health and management.
In addition, many dental patients see their dentist more
regularly and frequently than they do their primary
medical manager. This places the dental practitioner in
the unique position of often being the first to observe
the signs and symptoms of a serious systemic
condition. This course will provide a review of some of
the common medical conditions and associated oral
lesions the dental practitioner is likely to encounter in
his or her practice. In addition, the historical and clinical
clues of commonly encountered undiagnosed systemic
conditions will be provided.

OBJECTIVES
This course is intended to improve the practitioner’s
ability to obtain and interpret the medical history and
correlate these findings with the clinical examination to:
• Establish an appropriate diagnosis
• Plan appropriate treatment modifications to
safely manage the medically compromised patient.
Specific topics discussed will include, but not be
limited to:
• Allergic reactions
• Autoimmune disorders
• Candidiasis
• Cardiovascular disease
• Dermatologic disease
• Dry mouth
• Hepatitis
• HIV/AIDS

PRESENTER
MICHAEL A. HUBER, D.D.S., received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1980. He continued with postgraduate training in Oral Medicine and Maxillofacial Radiology at the National Naval Dental Center, Bethesda, Maryland in 1986 and received a Certificate in Oral Medicine in 1988. Upon his retirement from the United States Navy in 2002, Dr. Huber joined the faculty as an Assistant Professor in the Division of Oral Medicine, Department of Dental Diagnostic Science at The University of Texas Health Science Center at San Antonio, Dental School.

An Overview of Dental
Bonding Resin Cements,
Glass Ionomers & Resin-
Modified Glass Ionomers
SHARUKH S. KHAJOTIA, B.D.S., M.S., Ph.D.

This course has been
POSTPONED

OBJECTIVES
• Composition, manipulation and properties of
bonding agents
• Benefits and limitations of bonding agents
• Developing an antibacterial bonding system
• Composition, manipulation and properties of resin
luting cements
• Benefits and limitations of resin luting cements
• Composition, manipulation and properties of glass
ionomers and resin-modified glass ionomers
• Benefits and limitations of glass ionomers and
resin-modified glass ionomers
• Interactions between dental materials and
oral biofilms
• Concepts that dentists need to know
about dental materials

PRESENTER
SHARUKH S. KHAJOTIA, B.D.S., M.S., Ph.D., attained a dental degree from Nair Hospital Dental College, University of Bombay, India in 1988, a Master of Science degree in Dental Biomaterials from Marquette University in 1992, and a Ph.D. in Oral Biology from the Medical College of Georgia in 1997. Currently he is the Assistant Dean for Research as well as Professor and Chair of the Department of Dental Materials in the College of Dentistry at the University of Oklahoma. He also holds appointments in the OU Health Sciences Center Graduate College and the OU School of Chemical, Biological and Materials Engineering.

OBJECTIVES
- Review the anatomy of anterior teeth
- Understand totally how anterior teeth are supposed to function
- Take a close look at what makes front teeth esthetically pleasing
- Preparation of anterior teeth -- crowns and veneers
- Simple methods of temporization
- A quick review of impression technique

PRESENTERS
JACK I. SHIRLEY, D.D.S., received his DDS degree from The University of Texas Health Science Center at San Antonio in 1979. He has maintained a private practice in San Antonio, Texas for over twenty years. Dr. Shirley has been associated with the Pankey Institute in Key Biscayne, Florida for eighteen years. He has served as Associate Faculty for thirteen years and is President of the Board of Trustees and a member of the Board of Directors. Dr. Shirley has been selected to represent the Pankey Institute through its Speakers Bureau and can be heard through the national at numerous dental meetings speaking about Pankey philosophy, techniques, and the effectiveness of comprehensive care dentistry. He has a passion for dental education and a strong desire to help dentists reach their full potential.

TIME
Check-in: TBD, 8:00 AM
Program: Friday, 9:00 AM - 12:00 PM

LOCATION
UT Health San Antonio, School of Dentistry

TUITION
Individual: $125.00

CREDIT (Course Code: 161832A)
AGD Code 250/780 Hours: 3

SPECIAL FEE OFFER
Register for the morning program and receive a 30% discount on either of the afternoon Texas Briefs. Lunch is included for the participants attending both sessions.

OVERVIEW
The clinician is spending more time taking care of anterior teeth. If the dentist is not bleaching them, he or she is covering them with beautiful porcelain. It is time to take a close look at what makes front teeth look beautiful and function correctly. Let’s see if form does follow function. In this course, Dr. Shirley will look at the anatomy of anterior teeth, the esthetics of anterior teeth, how to prepare anterior teeth for crowns and veneers, how to temporize anterior veneers and crowns, and how anterior teeth function.

OBJECTIVES
- How to make sure those big veneer cases are functioning properly.
- Verbal skills that will help you with patient education.
- Splint construction and adjustment.
- How to equilibrate and who to equilibrate.
- CR vs. CO.
- What is adequate anterior guidance?
- The significance of incline interferences.
- How to recognize occlusal disease and what to do about it.
- How to equilibrate and who to equilibrate.
- Spilt construction and adjustment.
- Verbal skills that will help you with patient education.
- How to make sure those big veneer cases are functioning properly.

FEBRUARY 23

Lecture Course for the Entire Dental Team
Practice Growth Through Esthetic Regeneration and Implant Dentistry
DONALD P. CALLAN, BS, BA, D.D.S

OVERVIEW
Implant success is no longer judged by whether the implant integrates or how long the implant remains in the patient’s mouth. The lack of precise duplication of color, contour, and function of the natural dentition for the final implant prosthesis may ultimately result in an implant failure as defined by your patient. The entire implant team must envision the final result appropriate for each patient. Patients expect and deserve the finest restoration available, a safe procedure, and long term results.

This presentation is designed to achieve the criteria of longevity for the dentists and the criteria as set by the implant patient in defining success as esthetics, function, longevity, and a healthy environment. Dr. Callan will also present a dental implant update based on sound biological literature to meet the demands of your patients. Implant selection, placement location, spacing, marketing, surgical stents, immediate load, immediate placement, and surgical placement will also be reviewed.

The purpose of this program is to provide evidence-based information to evaluate grafting materials for periodontal, restorative, and implant dentistry based upon clinical, esthetic, functional, and histological results in humans.

OBJECTIVES
• Understand the goal of implant dentistry.
• Identify the need and indications for implant success.
• Define and avoid implant failure.
• Understand the difference between implant successes and implant survival.
• Select proper implant location to obtain maximum esthetics.
• How to market dental implants to your patients.
• Understand how to prevent implant problems.
• Identify the proper time and sequence of implant placement procedures.
• Defend clinically, functionally, and histologically; the use of the dental implant system being utilized.
• Select proper implants based upon sound biological principles.

PRESENTER
DONALD P. CALLAN, D.D.S., received his dental degree in 1975 and a Certificate in Periodontics from the University of Missouri at Kansas City in 1978. Dr. Callan maintains a private practice limited to Periodontics with an emphasis on tissue regeneration and implant dentistry in Little Rock, Arkansas. His current hospital appointment includes the Arkansas Children Hospital in Little Rock, Arkansas.

TIME
Check-in: TBD, 8:00 AM
Program: Friday, 9:00 AM-5:00 PM

LOCATION
UT Health San Antonio, School of Dentistry

FEBRUARY 24

Lecture Course for the Entire Dental Team
Gingivitis, Periodontitis, Peri-Implantitis: The Connection and Treatment
DONALD P. CALLAN, BS, BA, D.D.S

OVERVIEW
Periodontal diseases are chronic, infectious, and inflammatory diseases resulting from exposure of the periodontium to dental plaque, a complex bacterial biofilm that accumulates on the teeth. With periodontal disease the epithelial tissue, connective tissue and bone is damage and the teeth and dental implants may be lost. To understand long term survival of dental implants, the clinician must have a clear understanding of the epithelial tissue, connective tissue and bone relationships to the dental implant surfaces. Evidence suggests that periodontitis and peri-implantitis may be the same and may contribute to the development of progression of local tissue break down and other diseases or conditions. In light of the high prevalence of the periodontal disease, these associations may be important for the maintenance of dental implants. Patients and health care providers must be informed that periodontal intervention may prevent the onset of hard and soft tissue breakdown or progression of various systemic diseases.

The purpose of this presentation to provide evidence based information to evaluate the relationships of the hard and soft tissues of connection to dental implants and to determine if these tissues are subject to periodontal breakdown.

OBJECTIVES
• Understand the hard and soft tissue relationships to dental implants.
• To understand the pathways of periodontal break down about dental implants.
• Identify hard and soft tissue conditions that may contribute to periodontal breakdown about dental implants.
• Determine the time and sequence for treatment and prevention of failing dental implants.
• To properly to inform the patient of the potential periodontal disease and systemic concerns of dental implants.
• Determine the proper maintenance of dental implants by patient and the dental hygienist.

PRESENTER
DONALD P. CALLAN, D.D.S., received his dental degree in 1975 and a Certificate in Periodontics from the University of Missouri at Kansas City in 1978. A Standard Proficiency Certification Course in Laser Dentistry

Two-Day Lecture/Participation

May 11-12, 2018

IMPORTANT COURSE INFORMATION
*Standard Proficiency Certification will be awarded upon successfully completing an online examination administered by the Academy of Laser Dentistry. The candidate must own a laser or have access to a laser and have taken a free introductory course on lasers that is available on the Academy of Laser Dentistry Website at: www.laserdentistry.org. The candidate must become a member of the Academy of Laser Dentistry. For information go to www.laserdentistry.org

REGISTER
210-567-3177
http://smile.uthscsa.edu
OBJECTIVES

- The Endodontic Triad-the keys to success.
- The Mandibular Block Revisited
- Simplified Rubber Dam Application.
- Crown Down Philosophy & Technique.
- Understanding the Foramen Finder.
- Importance of Irrigation and a look at the newest systems & devices.
- The Glide Path how it relates to cleaning and shaping.
- Nickel Titanium Rotary File, metallurgy and use.
- Advantages of the Twisted File.
- A step by step, Instrumentation Technique.
- Sealing the Canal System with 3D condensation using SuperEndo-β (Beta) technology.
- Endo gastritis: its causes and cures.

PRESENTER

NOAH CHIVIAN, F.A.C.D., F.I.C.D., D.D.S., earned his dental degree from the University of Pennsylvania School of Dentistry in 1959 and later completed his graduate endodontics program at Temple University’s School of Dentistry. He was a Research Teaching Fellow in Endodontics and received his certification in Endodontics from Temple University. He continued his postgraduate training in Oral Medicine and Maxillofacial Radiology at the National Naval Dental Center, Bethesda, Maryland in 1986 and received a Certificate in Oral Medicine in 1988.

TIME

Check-in: TBD, 8:00 AM
Program: Friday, 9:00 AM – 5:00 PM

LOCATION

UT Health San Antonio, School of Dentistry

TUITION

Dentist: $220.00
KDR Recipient: $198.00
Allied Dental Personnel: $190.00

CREDIT (Course Code: 161847A)
AGD Code: 070
Hours: 7

SPECIAL FEE OFFER

Register for the morning program and receive a discount on the afternoon Texas Brief. Lunch is included for the participants attending both sessions.

MARCH 2
Lecture Course
3 Topics in One Day
JAMES S. KOHNER, D.D.S.

Minimally Invasive Antimicrobial Treatment for Basic to Advanced Periodontal Disease

OVERVIEW
Adding chemotherapeutic methods to target the periodontal bacteria will allow for successful management of very advanced cases that might otherwise have been treated only with extraction, to infected cases you might traditionally treat with non-surgical methods. In doing so, results will be improved over classic surgical or SCRP methods which may not kill all bacteria at the diseased sites. These innovative methods will be explained by outlining both in-office procedures, as well as specific anti-microbial procedures for the patient to do at home. When combined, they yield predictable results for previously failing cases as well as those treated for the first time.

Treatment will be illustrated with clinical photos and radiographs, including clinical applications in dogs that also show excellent results. Cases will be shown and literature quoted to validate the procedures.

LEARNING OBJECTIVES:
1. See why Periodontal Surgery or SCRP may fail.
2. Learn to manage failed and failing cases.
3. Improve diagnostics with bacterial culturing.
4. Role of patient care at home as part of treatment.

How Crown Lengthening Will Enhance Your Restorative Results

OVERVIEW
This topic covers methods, limitations, and benefits of both esthetic and functional crown lengthening. You will have a better understanding of these principles to help patients enjoy better and more predictable results.

These principles apply to both posterior and anterior teeth, and both will be covered. Participants will see how crown margin proximity to soft tissue can adversely impact their restorative results, which in turn leads to better understanding of why tissues are red and sore at times. Discussion points include making diagnostic decisions regarding Crown Lengthening from both radiographic and clinical perspectives. It includes a detailed discussion of Biologic Width and how that impacts restorative decisions, including how to improve “Gummy Smile” issues.

Multiple case examples are shown from both radiographic and clinical perspectives, starting with initial evaluation through the surgery and final completion.

LEARNING OBJECTIVES:
1. How to achieve predictable impressions every time.
2. Biologic Width and its role in predictable results.
3. Learn why crowns come loose and how to prevent it.
4. Causes of red gum tissue around crown margins.
5. Diagnose esthetic and functional crown lengthening.

Achieving Predictable Restorative Results with Soft Tissue Grafting

OVERVIEW
Learn evidenced-based solutions for the types of soft tissue challenges that you face on a daily basis, such as how to cover those exposed roots and predictably stop, or prevent, recession especially in the esthetic zone. Learn to gain peace of mind in knowing the gingiva stays in place at the margins of newly placed esthetic crowns.

In this course, methods are illustrated to solve those problems and enhance your restorative results by using both Free Gingival and Connective Tissue Grafts.

LEARNING OBJECTIVES:
1. Understand diagnostic criteria for each graft.
2. Indications and limitations for each graft.
3. To stop or prevent recession in the esthetic zone.
4. When to graft or not to graft.

PRESENTERS
JAMES S. KOHNER, D.D.S., received his dental degree from The Ohio State University, and Case Western Reserve University Dental School, and obtained his certification in Periodontics from the Boston University School of Graduate Dentistry. He currently lives in Scottsdale, Arizona. Dr. Kohner is an experienced teacher who has presented courses on Soft Tissue Grafting to a wide range of audiences, including many state associations all over the US and in 8 foreign countries, and has presented at the American Academy of Periodontology meetings for many years. He has been teaching for the Perio Institute since 2003.

TIME
Check-in: TBD, 8:00 AM
Program: Friday, 9:00 AM - 5:00 PM

**DENTAL TEAM WEEKEND**

**MARCH 9, 2018**

A Lecture Course

**Dental Team Implant Certification Program**

**EDIE GIBSON, R.D.H., M.S.**

**OVERVIEW**

The field of dental implantology is vast, ever-changing and can be intimidating. As a TEAM member, it is critical to have a comprehensive understanding of implantology, including surgical, restorative and maintenance options, in order to communicate more effectively with your patients. A discussion of implant therapy along with signs, symptoms, and etiology of peri-implant complications, evidence-based maintenance protocols, revolutionary periodontal regenerative options, and how to talk implants with your patients, will be discussed.

**OBJECTIVES**

Upon completion, participants will be able to:

- Develop an appreciation of dental implants as a treatment option for your clients
- Understand the types of implants and surface treatments available in the market today
- Understand dental implant terminology
- How to assess a client for implant therapy
- Differentiate between the latest technology, instruments and products
- Develop customized home care protocols
- Communicate the risks and benefits of implants

**COURSE OUTLINE**

- Classification and Definitions of Dental Implants
- Scientific Basis for Dental Implant Therapy
- Overview of Surgical and Restorative procedures
- Maintenance and Evaluation Procedures
- Communication 101

**PRESENTER**

**EDIE GIBSON, RDH, MS.** is a Registered Dental Hygienist that brings over 30 years of diverse, hands-on clinical and business expertise to the podium. She incorporates real world experiences and humor, making difficult subjects fun, empowering, and thought provoking for the entire TEAM! She believes in a collaborative, patient-centric approach to treatment in order to achieve stellar outcomes.

Edie is a Chief of OMS Services for Jameson Management, Certified Speaker for Straumann, and a Thought Leader/KOL for several dental companies. She is the former Executive Director, Certified Educator, and founding Fellow of the ADIA, as well as co-creator of the Dental Hygiene Implant Certification Program (DHICP). She is a 2013 Sunstar RDH Award of Distinction recipient, a Registered Psychotherapist and a founding Fellow of the ADIA, as well as co-creator of the Dental Hygiene Implant Certification Program (DHICP).

**TIME**

Check-in: TBD, 7:30 AM
Program: Friday, 8:00 AM - 4:00 PM

**LOCATION**

La Quinta Inn & Suites - 4431 Horizon Hill
210-525-8090

**TUITION**

ADIA & PM Member: $210.00
KDR recipient: $199.00
Non-Member: $260.00

**CREDIT** (Course Code: 161850A)

Hours: 7

**SPECIAL INFORMATION**

Upon completion of this program, the participant will be eligible for membership status of the Association of Dental Implant Auxiliaries (ADIA). Register for the Dental Team Implant Certification Program and Essential Skills for the Dental Implant Team, and receive a discount on the March 5, 2016 course.

**MARCH 10, 2018**

A Lecture Course

**Essential Skills for the Dental Implant Team**

**JOY MILLIS, CSP**

**OVERVIEW**

Management and communication skills go hand-in-hand with the clinical skills necessary to provide implant dentistry. Marketing the service, answering questions, maintaining patient records, coordinating treatment, quoting fees, making financial arrangements and risk management will be discussed. Handout materials provided will assist in the rapid implementation of skills learned and systems discussed during this program.

**OBJECTIVES**

At the conclusion of this program, participants should be able to:

- Increase the likelihood that patients will act on treatment recommendations.
- Improve the quality of the practice/patient relationship.
- Reduce the risk to the patients and the practice by developing a system of continual care and communication.
- Quote and collect appropriate fees for quality care.
- Take insurance out of the doctor/patient relationship

**PRESENTER**

**JOY MILLIS, CSP,** is a successful entrepreneur. Her business development firm Joy of Communication, equips and motivates professionals to implement quality-based marketing and communication skills. She has earned the prestigious Certified Speaking professional (CSP) designation from the National Speakers Association. Ms. Millis also serves on the visiting faculty of The Medical College of Georgia, Howard University, The University of Miami and The University of Texas Health Science Center where she teaches management excellence for implant dentistry.

**TIME**

Check-in: TBD, 8:00 AM
Program: Saturday, 8:30 AM - 4:30 PM

**LOCATION**

UT Health San Antonio, School of Dentistry

**TUITION**

Dentist: $210.00
KDR recipient: $199.00
Allied Dental Personnel: $160.00
Special Discount Fee: $144.00
Additional Office Member Fee: $144.00 - $25.00 = $119.00

(Must register for the Implant Certification course on March 9, 2018 to receive discount.)

**CREDIT** (Course Code: 161852A)

AGD Code: 550
Hours: 7

In order to receive this special offer, all office members must register for both courses. The first office member will pay $144.00 and for each additional staff member they will pay $119.00.

1st staff member pays $144.00
Additional staff members pay $144.00 - $25.00 = $119.00

**OVERVIEW**

Although there are many excellent Spanish books and courses available, this course is designed specifically for members of the dental team. A brief, but intensive introduction for beginners on the everyday application of basic Spanish grammar, pronunciation, and vocabulary will be presented. In addition, Mrs. Mackey will review simple phrases, which can be commonly used by the dental team. The material will be based upon the text, *Vamos al Dentista*, designed to be used in a dental office.

**OBJECTIVES**

- This course will be a comprehensive review of the Spanish language most commonly used in the dental office. The participants should already be somewhat familiar with the language.

**PRESENTER**

**MYLENE MACKEY, M.S., B.S.**

received the Masters degree in mental health counseling from St. Mary's University, previously earning her Bachelors in theater and psychology form Texas A&M. Mrs. Mackey currently works as a Licensed Practicing Counselor. She has taught Spanish for many years including offering private lessons to businesses and individuals. Mrs. Mackey enjoys translating documents, traveling to Mexico, yoga, reading and drawing.

**TIME**

Check-in: TBD, 8:00 AM

Program: Friday, 9:00 AM-12:00 PM

---

**OVERVIEW**

This course will discuss the new TSBDE new ruling 108.12, concerning the dental treatment of sleep disorders. Are you sick and tired of being sick and tired? Fatigue is the number one complaint heard by health professionals across the globe. Fifty to seventy million Americans suffer from upper respiratory problem. Sleep related breathing disorders, such as snoring and obstructive sleep apnea, are at the top of this list. Less than 10% of these patients have been diagnosed. As dentists, we are in a prime position to be the first to recognize this disorder and to help steer patients in the right direction to get diagnosed.

**OBJECTIVES**

Background:

- Understand normal breathing and airway anatomy and the problems and variants that lead to snoring and obstructive sleep apnea.

Signs and Symptoms:

- Learn the effects of sub-optimal sleep on health and quality of life.

Diagnosing:

- Understand current and proposed diagnostic methods and the role of dentists in the team approach.

Treatment:

- Review the current treatment modalities for snoring and for mild, moderate and severe OSA.

Follow Up:

- Understand the side effects of oral appliance therapy and how to manage them.

**PRESENTER**

**RICHARD B. DRAKE, D.D.S.,** received his D.D.S. from UTHSCSA School of Dentistry in 1989. He maintained a private practice in general dentistry from 1990 to 2001. He is the founder of Dental Sleep Medicine Associates of San Antonio, a private practice devoted solely to the treatment of snoring and sleep apnea. He is a Diplomat of the American Board of Dental Sleep Medicine, as well as chairing the Reimbursement Committee.

---

**MARCH 23**

Lecture Course

**Alternative Medications and Their Impact on Patient Care**

ELEONORE D. PAUNOVICH, D.D.S.

**OVERVIEW**

This course consists of a morning presentation and an afternoon of clinical activities. The morning presentation will first discuss initial patient evaluation and a recommended treatment protocol for integrating and utilizing multidisciplinary TMD therapies. This sequence will then be applied to 14 documented cases in which the patient’s symptoms and clinical evaluation results will be presented, and potential diagnoses and treatments will be discussed. Several of these cases are of patients who present with symptoms similar to TMD, but other diagnoses are determined, i.e., acute pulpalgia, sinusitis, etc. Participants will be taught to identify these disorders from TMD through history and clinical evaluation.

The afternoon clinical activities will involve working with a fellow participant, in which the masticatory and cervical musculature will be palpated, various jaw positions will be reviewed, and various splints brought to the course will be adjusted. The course parallels Dr. Wright’s recently published TMD textbook.

**OBJECTIVES**

- Leave the course knowing basic implant restorative principles and ready to get started!
- Experience a detailed hands on session with restorative components
- Identify causes of dental implant failures
- Discuss specific restorative planning principles for partially dentate and edentulous patients
- Practice mandibular manipulation techniques.
- Understand which allied health professionals they would be most beneficial.
- Practice mandibular manipulation techniques.
- Adjust a splint that a fellow participant brings to the course.

**PRESENTER**

EDWARD F. WRIGHT, D.D.S., M.S., is a professor at the University of Texas Health Science Center–San Antonio. He completed a 1-year general dentistry residency, a 2-year TMJ and Craniofacial Pain Fellowship, and a 2-year TMD research fellowship. He is the Course Director for the dental school’s TMD Course, Occlusion and TMD Course, and Dental Anatomy and Occlusion Course. Dr. Wright is the primary author of over 50 publications, author of the textbook “Manual of Temporomandibular Disorders” (in its 3rd edition), and Diplomate of the American Board of Orofacial Pain.

**TIME**

Check-in: TBD, 8:00 AM
Program: Saturday, 9:00 AM - 5:00 PM

Lecture/Participation Course

**TMD Diagnoses and Treatments for General Practitioners**

EDWARD F. WRIGHT, D.D.S., M.S.

**OVERVIEW**

This course will cover comprehensive restorative planning in implant dentistry. The presenter will discuss restorative options to implant success (What has worked/What has not!) and cover clinical case presentations. In addition, the speaker will discuss how to enhance confidence restoring dental implants, as well as, providing better service to our patients.

**OBJECTIVES**

- Discuss specific restorative planning principles for partially dentate and edentulous patients
- Identify causes of dental implant failures
- Explain restorative thinking in preventing implant failures
- Experience a detailed hands on session with restorative components
- Leave the course knowing basic implant restorative principles and ready to get started!

**PRESENTER**

NORMA OLVERA, D.D.S., M.S., obtained her dental degree from The University of Texas Health Science Center at San Antonio in 1987. She completed her post-graduate training in prosthodontics and received her certification and Master of Science in prosthodontics. She’s currently an assistant professor in the Department of Comprehensive Dentistry at the University of Texas Health Science Center at San Antonio.

Dr. Olvera has been in full-time private practice as a prosthodontist in Houston, Texas for the past 20 years. She has extensive experience in the area of oral rehabilitation involving all facets of reconstructive and restorative dentistry with and without dental implants.

TSBDE-Approved Course for Certification
Minimal Enteral
(Oral) Sedation and
Emergency Procedures
ERNEST B. LUCE, D.D.S.
ERNEST E. VALDEZ, D.D.S.

OVERVIEW
Successful completion of this course will provide the necessary training for a dentist to apply to the Texas State Board of Dental Examiners for a permit to administer minimal enteral (oral) sedation (level 1 permit). The course is a 16 hour curriculum of lecture with simulated patient scenarios and multiple case discussions.

OBJECTIVES
- Understand current TSBDE rules and regulations regarding minimal sedation.
- To outline the pharmacology of commonly utilized oral sedatives and techniques.
- Weigh advantages and disadvantages of various oral medications.
- Discuss medical considerations for sedation.
- Address pediatric considerations.
- Provide a comprehensive review of patient evaluation including medical history and vital signs.

PRESENTERS
ERNEST B. LUCE, D.D.S., received his DDS degree from the University of Texas Health Science Center at Houston in 1985. In June of 1986, he completed a one year General Practice Residency at The University of Texas Health Science Center at San Antonio. Upon completion of the residency, Dr. Luce joined Comprehensive Dentistry at UTHealth San Antonio.

ERNEST E. VALDEZ, D.D.S., received his DDS degree from The University of Texas Health Science Center at San Antonio, School of Dentistry in 1993. He pursued a two year General Practice Residency at UTHSCSA which he completed in 2001. Dr. Valdez has served as co-investigator of numerous research projects. He has published articles in the Journal of Oral & Maxillofacial Surgery, British Journal of Oral & Maxillofacial Surgery, and the Journal of Periodontal Research.

Certification Course for Dentists
Nitrous Oxide Conscious Sedation
Hands-On Training Course

ERNEST E. VALDEZ, D.D.S.

OVERVIEW
The course will provide information to meet the Nitrous Oxide/oxygen inhalation conscious sedation. This is a required course for dentists on the rules and regulations for the Texas State Board of Dental Examiners to qualify for an sedation/anesthesia permit.

OBJECTIVES
The participant will be able to:
• Define conscious sedation and be aware of the benefits for the patient and dentist.
• Understand the physiology of respiration and of N2O-O2 inhalation.
• Know the advantages, disadvantages, indications, and contraindications to the use of N2O in normal and medically compromised patients.
• Understand the techniques used to administer N2O and monitor patients while they receive it.
• Recognize the complications that may arise as a result of N2O administration, and understand the prevention, early detection, and treatment of these complications.
• Learn the hazards associated with the use of N2O and accepted methods used to reduce exposure to an acceptable level in the dental office.
• Recognize special problems associated with the use of N2O in children and know the proper technique for administering it to them.
• Discuss nitrous oxide equipment, including tanks, regulators, manifolds and machines.
• Understand guidelines for installation and use as issued by the National Fire Protection Association and the American Dental Association.
• Recognize the similarities of N2O sedation and hypnosis, be familiar with the basic concepts of hypnosis and its usefulness as an adjunct to N2O sedation.
• Gain an understanding for the application of nitrous oxide conscious sedation to the non-cooperative patient.
• Understand the physiology of respiration and of N2O-O2 inhalation.

PRESENTER
ERNEST E. VALDEZ, D.D.S., received his DDS degree from The University of Texas Health Science Center at San Antonio, School of Dentistry in 1993. He pursued a two year General Practice Residency at UTHSCSA which he completed in 2001. Dr. Valdez has served as co-investigator of numerous research projects. He has published articles in the Journal of Oral & Maxillofacial Surgery, British Journal of Oral & Maxillofacial Surgery, and the Journal of Periodontal Research.

TIME
Check-in: TBD 8:00 AM
Program: Friday, 9:00 AM–5:00 PM

LOCATION
UT Health San Antonio, School of Dentistry

TUITION
Dentist: $312.00
KDR Recipient: $280.00
Allied Dental Personnel: $210.00

CREDIT

Lecture Course/Examination
Texas State Board of Dental Examiners Required Dental Assistant’s Registration Course and Examination
PEGGY HERNANDEZ, R.D.A., C.D.A.

OVERVIEW
As of September 1, 2006 the Texas State Board of Dental Examiners require Dental Assistants attend a prep course and pass an examination on Jurisprudence, Infection Control, and Radiology, which will be administered at the end of the presentation. This course is intended to provide sufficient information in the following areas.

OBJECTIVES
Jurisprudence:
• Purpose of the Texas Dental Practice Act
• State Board Rules
• Purpose and structure of the State Board of Dental Examiners
• Provisions for licensure
• Regulations for Dental Auxiliaries
• Professional Conduct
• Minimum Standard of Care Infection Control
• CDC Infection Control Guidelines
• Infection Control Rules of the Texas State Board of Dental Examiners
• Hand hygiene
• Alcohol based hand rubs
• Sterilization techniques
• Sterilization vs. disinfection
• Spore testing
• Instrument processing
• Instrument wrapping
• Surface disinfection
• Medical waste
• Dental unit waterline disinfection Radiology
• Radiographic principles and theory
• Normal Anatomy
• Technique and processing error recognition for intraoral and panoramic radiographs
• Radiation biology
• Protection
• Risk assessment
• Aseptic techniques for dental radiology
• Quality assurance principles and procure

PRESENTER
PEGGY HERNANDEZ, R.D.A., C.D.A. is a Director of Dental Assistant Program at Kaplan College in San Antonio, Texas.

TIME
Check-in: TBD, 7:30 AM
Program: Saturday, 8:00 AM – 5:00 PM

LOCATION
UT Health San Antonio, School of Dentistry

APRIL 12-14

Academic Outreach in Carlsbad, CA
Lecture/Hands-On Course
Fully Simulated Comprehensive Implant Placement Course

OVERVIEW
This course is designed for dentists who have a significant surgical background and a basic knowledge of implant dentistry. It is a comprehensive, hands-on experience in implant dentistry. The program will combine multiple surgical and prosthetic procedures to help enhance the participant’s knowledge in both the restorative and surgical aspects of implant dentistry. It will be geared toward dentists who already have a solid didactic and pre-clinical background in implant dentistry.

This impressive facility is focused on training with its sophisticated labs, audiovisual equipment and lecture facilities with the most advanced and realistic patient treatment mannequins in the world.

OBJECTIVES
At the conclusion of the course, participants will be able to understand and develop:
• Basic restorative and surgical treatment planning skills, rationale, and scientific basis for using implant therapy to restore oral function, health and esthetics.
• Surgical skills in soft tissue management and implant placement for single, multiple-unit & full arch cases.
• Treatment planning, scientific rationale and surgical treatment skills in minor bone grafting techniques such as ridge augmentation and ridge preservation techniques
• Techniques in extraction and immediate implant placement
• Gain experience with the latest implant surgery and prosthetic implant instrumentation.
• Impression techniques
• Restorative techniques using advanced mannequin models for single unit, multiple unit, and fully endentulous scenarios with various overdenture attachments.
• Using various treatment options for managing complex prosthodontic needs

PRESENTERS
SIDNEY L. BOURGEOIS, JR., D.D.S., obtained his degree from Louisiana State University School of Dentistry in May 1991. In August 2006, Dr. Bourgeois resigned his Commission in the United States Navy and joined the faculty at The University of Texas Health Sciences Center in San Antonio as a Clinical Assistant Professor.

MICHAEL P. MILLS, D.M.D., M.S., received his degree from the University of Alabama School of Dentistry in 1970. Did a year of General Practice Residency at Eglin USAF Regional Hospital in Florida. Dr. Mills is a Clinical Associate Professor with teaching responsibilities in the Postdoctoral Division of the Department of Periodontics.

IVY S. SCHWARTZ, D.D.S., M.S.Ed., earned her DDS degree from The University of Texas Health Science Center at San Antonio in 1982. She received a certificate in Prosthodontics in 1984 and is a Diplomate of the American Board of Prosthodontics. Dr. Schwartz is familiar with a wide variety of implant restorations as well as surgical aspects of implant dentistry.

RONALD G. VERRETT, D.D.S., M.S., attained both his dental and M.S. degrees from The University of Texas Health Science Center at San Antonio, School of Dentistry in 1979 and 1987. Continuing his postgraduate training with the U.S. Air Force, he completed a General Practice Residency at Barksdale Air Force Base, Louisiana in 1980 followed by a Prosthodontic Residency at Wilford Hall USAF Medical Center at Lackland Air Force Base, Texas in 1987.

TIME
Check-in: Wednesday, 8:30 PM – 9:15 PM (PST)
Program: Thursday, 8:00 AM – 5:00 PM (PST)
Friday, 8:00 AM – 6:00 PM (PST)
Saturday, 8:00 AM – 1:00 PM (PST)

A NEW OUTREACH LOCATION

We are happy to announce that we will be partnering with the Academy for Academic Leadership in Atlanta, GA

Launched in 2005, AAL is a collaborative of scholars, educational specialists, and consultants providing services that help leaders in businesses, nonprofits, and academia pursue excellence, the application of knowledge, the discovery of ideas, and the quest of lifelong learning.

N. Karl Haden Ph.D.
President & CEO

AAL focuses on leadership development, teaching and learning, humanistic healthcare and consulting services
aalgroup.org

The lifelong learning activity has been planned and implemented in accordance with the standards of the ADA Continuing Education Recognition Program (ADA CERP) through joint efforts between UTHSCSA D.S. and AAL.

APRIL 13

Lecture Course
The Dental Wear Patient, Diagnosis and Treatment
PAUL A. HANSEN, D.D.S.

OVERVIEW
The severe wear patient has multiple etiologies. We want to know and understand the cause of the wear and how to tailor our restorative efforts to the patient’s needs.

Initial examination of a new patient occasionally reveals a severely worn dentition characterized by extensive wear and loss of tooth structure. Function and esthetics are compromised, and the prognosis for one or several teeth may be jeopardized if the problem is not corrected. The complex nature of this condition, and its multifactorial etiology, often overwhelms the restorative dentist in treating such widespread tooth destruction.

Loss of tooth structure may be a result of mechanical wear (attrition, abrasion) or chemical attack (erosion). We will review the various etiologies and the risks associated with each when we try to reconstruct the patient. A brief review of dental occlusion will be included as a point of orientation.

We will review the new materials on the market for restoring these patients. The use of zirconia or lithium disilicate will be reviewed. We will discuss material properties and how best to use them for the dental wear patient. Concentration on full mouth reconstruction cases.

This program is a clinically orientated program reviewing over 30 years of cases and follow up documented by Dr. Hansen.

OBJECTIVES
Following this unit of instruction, the practitioner should be able to:
• Describe the etiologies for the worn dentition.
• Identify the types of tooth wear.
• Describe how to perform an accurate diagnostic mount to evaluate wear.
• Explain the use of the diagnostic mounting in diagnosis and treatment planning.
• Understand the proper sequence for restoring extensive wear cases.
• Understand the various new materials used to restore difficult cases.

PAUL A. HANSEN, D.D.S., obtained his dental degree from the University of Nebraska Medical Center College of Dentistry in 1975. He completed a one-year Prosthodontic residency at the University of Texas Health Science Center in San Antonio, Texas (UTHSC-SA) and a two-year Prosthodontic at Wilford Hall Medical Center. Currently he is Associate Professor at the U of N College of Dentistry Director of Prosthodontics.

APRIL 13

Lecture Course
Review Course in Minimal Enteral (Oral) Sedation
( Level 1 Sedation)
ERNEST B. LUCE, D.D.S.

OVERVIEW
This course is designed to satisfy the Texas Dental Board requirement for continuing education in minimal enteral sedation (required every 2 years for level 1 minimal sedation permit holders). This course does not qualify a dentist to apply for a new minimal sedation permit. Individuals who complete the course will receive a certificate, which can be submitted to the TSBDE as documentation of continuing education in minimal sedation.

OBJECTIVES
At the end of this course, the participant will have a renewed understanding of the many elements of the safe administration of enteral conscious sedation including:
• Spectrum of sedation and the limits of enteral sedation.
• Patient evaluation and appropriate patient selection with an emphasis on recognizing patients at high risk of complications.
• Pharmacology of sedative agents including drug interactions and appropriate selection for patients with differing medical conditions.
• Appropriate use, limitations of and interpretation of monitors.
• Management of urgencies and emergencies especially as they pertain to minimal sedation.
• Rules and Regulations of the TSBDE on the administration of minimal enteral sedation

ERNEST B. LUCE, D.D.S., received his DDS degree from the University of Texas Health Science Center at Houston in 1985. In June of 1986, he completed a one year General Practice Residency at The University of Texas Health Science Center at Houston. Upon completion of the residency, Dr. Luce joined the Department of Comprehensive Dentistry at The University of Texas Health Science Center at San Antonio. Currently he is a Clinical Associate Professor at the Health Science Center, and he also maintains a part time private practice in general dentistry in San Antonio.

APRIL 14

Lecture/Participation Course  
**Contemporary Trends in Pediatric Dentistry**  
STEVEN P. HACKMYER, D.D.S.

**OVERVIEW**  
Treatment of the pediatric patient involves more than approaching them as miniature adults. This course is divided into two parts, lecture and hands on. The hands on portion will cover a number of topics that are associated with everyday comprehensive treatment of the pediatric patient.

The topics this course will cover are: Primary Pulpal Therapy, Behavior management, prevention, the dental home, anticipatory guidance, fluoride, sealants, diet, nutrition, carries risk assessment and management of dental trauma to both the primary and permanent dentition will be discussed. The new current standards of dental trauma addressing, classification, diagnosis and treatment modalities will be discussed. As part of the entire presentation, examples of various types of trauma will be utilized as part of the different topics covered. The hands on part will cover current pediatric restorations for primary teeth. Integral in this will be a focus on esthetic anterior and posterior restorations.

**OBJECTIVES**  
- Review current basics of essential areas of clinical everyday pediatric dentistry.  
- Provide the participant with a better understanding to enable them to provide quality comprehensive care for their pediatric patients.  
- An update of current concepts and procedures that can be utilized as part of their everyday pediatric patient care.

**PRESENTER**  
STEVEN P. HACKMYER, D.D.S., earned his dental degree from New York University College of Dentistry. After that, he completed a residency in Pedodontics (Pediatric Dentistry) at Brookdale Hospital University Medical Center in Brooklyn, NY.

**TIME**  
Check-in: TBD, 8:00 AM  
Program: Saturday, 9:00 AM-5:00 PM

APRIL 20, 2018

**A TWO PART PARTICIPATION STUDY GROUP**

**(PART 1)-CLINICAL OCCLUSION**

**OVERVIEW**  
The goal of the Clinical Course is to relate the concepts and principles of occlusion learned in the past to the treatment of the normal patient as well as the patient with damaged dentition. The purpose of this course is two-fold. First, the course is a continuation of basic occlusion concepts and their relationship to general dentistry. Second, the course will introduce disorders of the natural dentition. The role of occlusion in the diagnosis and treatment of these disorders will be explained. Techniques include occlusal splint appliance and pre-restorative occlusal adjustment will be presented.

**OVERVIEW FOR PART I**  
The first part of the course is designed to aid the restorative dentist in providing more comprehensive diagnostic, treatment planning and clinical treatment skills. The major emphasis of this part of the course is to introduce the clinical aspects of disorders of the natural dentition and introduce the different concepts of Occlusal Adjustment.

**OBJECTIVES FOR PART I**  
At the completion of the course, the participant will be able to understand:
- Recognize occlusal problems  
- Communicate why occlusal adjustment is necessary  
- How to modify the occlusion  
- The principles of occlusion, muscle function, and TMD  
- When functional analysis is and is not necessary  
- Why and how to use the facebow  
- Materials and techniques for bite registration in restorative dentistry  
- How to determine which Centric position to use for anterior esthetic procedures  
- How to make accurate Centric Relation records, mountings and adjustments

**PRESENTER**  
JACOB G. PARK, D.D.S., is a Professor of Dentistry/ Clinical in the Department of Comprehensive Dentistry at UT Health San Antonio School of Dentistry. Dr. Park holds fellowship with the Academy of Dentistry International, the International Congress of Oral Implantologists and the International College of Dentists. He is the Past President of the American Equilibration Society. Dr. Park serves as a chairman of Subcommittee 9 CAD CAM in Dentistry of the Standards Committee on Dental Products of the ADA.

Experience the essence of the Alamo City—its casual Texas flavor accented by the rich heritage of old Mexico.

Our Continuing Dental Education course coincides with Fiesta San Antonio—a time when the city is bursting with color and laughter. This is an annual event when San Antonians and visitors come together to enjoy and participate in Fiesta activities galore with three parades and “Night in Old San Antonio” which takes place in La Villita, a 250 years-old restored Spanish Village located near the world famous Riverwalk.

This program will be held at the Menger Hotel, a few feet from the Alamo, the Menger is a member of the Historic Hotels of America. Walk the same halls and stay in the same rooms that once sheltered guests such as Theodore Roosevelt, Sidney Lanier, Gutzon Borglum, Captain Richard King, Oscar Wilde, William Sidney Porter (O. Henry), and Carrie Nation. Continue to be guests of William and Mary Menger and enjoy many of the Victorian treasures of their estate. The Menger remains a public hotel as intended when built just 23 years after the fall of the Alamo. At the conclusion of the meeting, walk across the street to the reserved bleachers at the Alamo Plaza to enjoy the parade.

The History of the Battle of Flowers Parade

The idea for the first Battle of Flowers Parade was conceived early in 1891 by a congressman’s wife who had seen a similar parade in Spain. She suggested to her friends that a flower parade should be held in San Antonio each year on April in memory of the fallen heroes at the Alamo and to commemorate the victory at the Battle of San Jacinto, April 21, 1836, where Texas had gained its independence from Mexico. These ladies formed the Battle of Flowers Parade committee, enlisted the support of fellow community leaders and the planning began. The first parade had an actual “flower battle” with half of the fresh-flower-covered carriages, floats and bicycles going in one direction and the other half going in the opposite direction, tossing fresh flowers at each other as they passed.

By 1895 the parade had developed into a week long celebration. The first Queen was chosen in 1896, Miss Ida Archer of Austin. In 1901 the parade included its first horseless vehicle. By 1916 the parade had grown so much that the floats could no longer be decorated with fresh flowers and artificial flowers were used. In 1973 the tradition of association members wearing yellow hats on parade day began and in 1976 association members started wearing yellow dresses. Today it includes some 40 flower-covered floats, dozens of military, college and high school bands, cavalcades, horse-drawn carriages, antique cars and giant, helium balloons. The Battle of Flowers Parade has been held every year since its beginning except during war times and originated what we now call Fiesta® San Antonio.

Each participant will be our guest to the Battle of Flowers parade immediately following the course. Join us in our reserved bleacher section under the shade trees in the Alamo Plaza. Additional tickets can be purchased for $20.00 for family and friends. Tickets are limited, please register early. If you register before April 6, 2018 you will be our guest for our online OSHA course.

Instructions will be e-mailed.
**MAY 11-12**

**Participation/Certification Course for Dentists and Dental Hygienists**

**A Standard Proficiency Certification Course in Laser Dentistry**

**ROBERT A. CONVISSAR, D.D.S., B.S.**

Candidates who successfully complete this course and the voluntary test will receive a Certificate of Standard Proficiency in Dental Lasers recognized by the Academy of Laser Dentistry.

The Academy of Laser Dentistry new Standard Proficiency Certification rules as of Dec 1, 2016: The ALD Certification test will now be a written test in a proctored environment immediately after the course. This test is NOT mandatory. Attendees who want to take the test will be notified in the classroom. It will be administered by a CDE staff member who will also collect the answer sheets. The answer sheets will then be mailed to the ALD headquarters.

**OVERVIEW**

Has the hoopla surrounding the introduction of lasers to dentistry been more smoke than substance? Since 1990, the USFDA has approved the use of 7 different wavelengths creating a world of difference in how the lasers operate, and their usefulness in the oral cavity.

The second day will provide each participant hands-on experience with the various wavelengths, performing surgical procedures on in-vitro models. Real time videos of routine laser procedures will be part of the discussion of specific instrument settings and techniques for laser surgical procedures.

**OBJECTIVES**

At the conclusion of the course, the participant will be familiar with the various wavelengths, their effects on oral tissues, and their uses for specific oral diseases and pathologies found in everyday practice.

**PRESENTER**

ROBERT A. CONVISSAR, D.D.S., B.S.

obtained his degree from New York University College of Dentistry in 1980. He is a pioneer in the field of laser dentistry and one of the first dentists to incorporate lasers into general practice. He has extensive experience with CO2, Nd:YAG, Diode and Erbium wavelengths.

**TIME**

Check-in: TBD, 7:30 AM
Program: Friday, 8:00 AM - 5:00 PM
Saturday, 8:00 AM - 12:00 PM

**LOCATION**

UT Health San Antonio, School of Dentistry

**TUITION**

Dentist: $595.00
KDR Recipient: $535.00
AGD Code: 260/497
Additional Staff: $285.00
Member: $285.00

The Dental School thanks LightScalpel & Cytomark Dental for its unrestricted educational grant in support of this CDE program.

**IMPORTANT COURSE INFORMATION**

The candidate must own a laser or have access to a laser, and have taken a previous introductory laser course. The candidate must become a member of the Academy of Laser Dentistry. A free introductory course on lasers is available on the Academy of Laser Dentistry Website at: www.laserdentistry.org

For more information on the Certification process, please visit www.LaserDentistry.org. Attendees should refer to the specific legal guidelines for laser use in the state which they are licensed.

---

**MAY 18**

**Lecture Course For The Entire Dental Team**

**“Grand Slam” Restorative Dentistry**

**DAVID M. BONNER, D.D.S., M.A.G.D.**

**OVERVIEW**

Today’s dentists have more opportunities than ever before to successfully practice esthetic dentistry – providing needed dentistry beautifully. Dr. Bonner has the gift of sorting through the vast array of new materials and techniques to help dentists simplify the complexities of doing excellent restorative dentistry. This presentation empowers dentists and their teams with the use of modern materials and techniques to predictably provide patients with beautiful long lasting restorations. The numerous clinical and business “pearls” presented enhance the ease, joy, and dental team approach to clinical dentistry. This is a course for the entire dental team.

**OBJECTIVES**

The participant will learn about:

- Creating Life-like Direct Anterior Restorations, including Class IV, direct veneers, and diastema closure
- Porcelain veneers “simplified” from smile design, preparation, beautiful temporization, ease in bonding, to rapid clean-up
- Principles of Full-Mouth Reconstruction
- Eliminating the Problem of Post-op Sensitivity
- Creating Excellent Posterior Esthetic Restorations
- Great posterior contacts through new and improved matrix systems
- Update on the Latest Techniques & Materials in Adhesion Dentistry
- Eliminate the “generation” confusion about bonding agents
- Impressions – How to get them perfect every time
- Clinical Pearls that enhance the Ease & Predictability of Practice
- Business Systems that Enhance Clinical Practice & Profitability
- How a MBA approaches Dental Fees
- Strategic and Financial Planning

**PRESENTER**

DAVID M. BONNER, D.D.S., M.A.G.D., M.A.B.A., F.I.C.D., F.I.C.O.I., received his dental degree from The University of Texas Health Science Center at San Antonio Dental School in 1980. He earned his MBA in Health Care Management from Texas Tech University. His private practice is focused on esthetic dentistry. He is also an adjunct clinical professor at the UTHSCSA dental school.

**TIME**

Check-in: TBD, 8:00 AM
Program: Friday, 9:00 AM - 5:00 PM

**LOCATION**

UT Health San Antonio, School of Dentistry

**TUITION**

Dentist: $220.00
KDR Recipient: $198.00
Additional Staff: $198.00
Member: $198.00

**CREDIT** (Course Code: 161883A)

AGD Code: 730

---

**MAY 18**

**Lecture Course**

**Oral Cancer: From Diagnosis to Management**

**OVERVIEW**

Successful management of the oral cancer patient requires a multidisciplinary effort, in which the dental professional plays a critical role. An estimated 29,000 new cases of oral and pharyngeal will be diagnosed this year, many as a consequence of an oral screening provided by a dentist. Research over the past decade has produced several advances improving the professionalism's ability to diagnose, treat, and manage the short- and long-term consequences of oral cancer. Ultimately, however, successful cancer therapy often incurs life-long impairments, which may adversely affect the patient’s quality of life. As many of the impairments directly affect the oral cavity, the dentist will be frequently called upon to manage many of these impairments such as mucositis, xerostomia, increased caries, and disfigurement. This course will provide a review of the most contemporary approaches to manage the oral cancer patient, from diagnosis to management.

**OBJECTIVES**

- The participants will learn about:
  - Epidemiologic overview
  - Cancer prevention
  - Diagnostic/Screening modalities
  - Contemporary treatment strategies
  - During-treatment care
  - After-treatment care

**PRESENTER**

MICHAEL A. HUBER, D.D.S., D.D.S., D.M.D., received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1980. He continued with postgraduate training in Oral Medicine and Maxillofacial Radiology at the National Naval Dental Center, Bethesda, Maryland in 1986 and received a Certificate in Oral Medicine in 1986. Upon his retirement from the United States Navy in 2002, Dr. Huber joined the faculty as an Assistant Professor in the Division of Oral Medicine, Department of Comprehensive Dentistry at The University of Texas Health Science Center at San Antonio, Dental School.

**TIME**

Lecture Course for the General Dentist and the Dental Team

Oral Surgery for the General Dentist

GREGORY K. SPACKMAN, D.D.S., M.B.A.

OVERVIEW

This course will review a variety of topics pertinent to outpatient oral surgery which are relevant to the dentist and the dental team. Dr. Spackman will discuss topics on patient evaluation, record keeping, and risk management in addition to the various aspects of surgical techniques and procedures.

OBJECTIVES

The participant will learn about:

- Patient evaluation
- Record keeping
- Risk management
- Local anesthesia
- Armament
- Preoperative evaluation for extractions
- Flap design
- Routine and difficult extractions
- Third molar evaluation and surgery
- Biopsy technique
- Minor preprosthetic surgery
- Complications
- Emergencies

PRESENTER

GREGORY K. SPACKMAN, D.D.S., M.B.A., received his dental degree from the University of Nebraska College of Dentistry in 1977, subsequently continuing his training in Oral and Maxillofacial Surgery at the Mayo Graduate School of Medicine at the Mayo Clinic where he was awarded a Certificate in 1980. Dr. Spackman earned his MBA degree from Washington University in 1987. He is currently an Associate Professor in the Department of Oral and Maxillofacial Surgery at The University of Texas Health Science Center at San Antonio, School of Dentistry. Dr. Spackman serves as the Predoctoral Director in the Department of Oral and Maxillofacial Surgery at the Dental School. He is also active in the Clinical Faculty Practice and serves on the Faculty Practice Advisory Board.

Bring the Dental Team and let them learn new ideas to bring into your practice

Our Speakers are experienced in their choice of topics. Lectures are approved for CE hours

Visit our vendors in the Exhibit Hall. Learn about their products and services that can improve your profession

http://smile.uthscsa.edu
OUR 2018 DISTINGUISHED SPEAKER

ROBERT A. LOWE, D.D.S. received his Doctor of Dental Surgery degree from Loyola University School of Dentistry in 1982, where he graduated magna cum laude and second in his class. After graduating, he completed a one-year residency program at Edward Hines Veterans Administration Hospital. He received postgraduate training in different areas of dental care, including restorative and rehabilitative dentistry, cosmetic dentistry, endodontics, prosthodontics, periodontics, oral surgery, and sedation dentistry, completing a rotation in surgical anesthesia. He served for 10 years in a full and part time capacity as an Associate Clinical Professor of Restorative and Rehabilitative Dentistry at Loyola.

Dr. Lowe went into private practice in Chicago after completing his residency, at which time he began to pursue another passion: clinical teaching. While running his own practice, Dr. Lowe served as a part-time lecturer of restorative and rehabilitative dentistry at Loyola University School of Dentistry. In 2000, he relocated to Charlotte.

Dr. Lowe’s dedication to educating the dental professionals of the future has led to a number of honors, and he continues to be in demand for professional dental care lectures given his expertise and insight. Dr. Lowe has lectured at all of the major dental meetings in the United States, including the American Dental Association Annual Meeting, the American Academy of Cosmetic Dentistry, and the American Society of Dental Aesthetics. In 2005, he was nominated to receive Diplomate status on the American Board of Aesthetic Dentistry. This is an honor shared by fewer than 50 dentists in the entire United States.

Throughout his career, Dr. Lowe has also written hundreds of articles on dental care and dental health topics, many of which have appearance in highly-regarded professional dental publications. He has published a monthly column in Dental Products Report and was a contributing author to the recent textbook Aesthetic Restorative Dentistry – Principals and Practice. He consistently appears on Dentistry Today’s annual list of “Top 100 Clinicians In Dentistry.”

VENDORS

Show off your products and/or services to multi-generations of dental professionals.

Hollers is a wonderful event to get your brand noticed.

Call to reserve a booth: 210-567-3177
Beyond the Classroom

**Online Learning** from The Office of Continuing Dental Education at UT Health San Antonio
http://smile.uthscsa.edu
Online Learning Opportunities are Presentations-On-Demand (ePOD)

Video presentations are streamed in your web browser in Quicktime format. If you don’t have the latest version Quicktime software installed in your computer, we provide the link to Apple’s website at http://www.apple.com/quicktime/download

http://smile.uthscsa.edu

**CDEmobile and CDEonDemand** are free presentations that allow the dental professional to view the content and be able to receive credit. These presentations are high definition, entertaining, state of the art advanced animation technology video presentations which allow users to select and watch/listen to internet/streaming continuing education video content available 24 hours-a-day, 7 days-a-week.

- **CDEmobile**
  CDEmobile provides video content on different dental topics for **FREE**! The course content are designed to work on **iPhone, iPod Touch, iPad** and **Android-based mobile phones and devices**: http://cdemobile.uthscsa.edu

- **CDEonDemand**
  CDE on Demand are 1-hour video presentations which allow users to select and watch/listen to internet/streaming continuing education video content for **FREE** using your computer (desktop or laptop) available 24 hours-a-day, 7 days-a-week: http://cdeondemand.uthscsa.edu

**Video Streaming, Interactive Web Courses, and Testing Center** courses allow the dental professional to view content in 1 hour, 1.5 hour and 2 hour segments and receive credit. We also offer continuum courses which may require multiple lectures that meet specific requirements for certifications. These presentations are high definition, entertaining, state of the art advanced animation technology video presentations which allow users to select and watch/listen to internet/streaming CE video content, 24 hours-a-day, 7 days-a-week.

- **Video Streaming**
  These presentations are produced at the Massad Center for Higher Learning, state of the art film studio, or are provided by our Partners in Education after a peer review process based on UTHSCSA standards. http://cdestream.uthscsa.edu

- **Interactive Web Courses**
  You are invited to participate in our interactive didactic courses presented by UT Health Science Center at San Antonio, Continuing Dental Education. This is the modern version of the correspondence courses. http://icourses.uthscsa.edu

- **Testing Center**
  This testing site allows the dental professional to take a short quiz and receive CE credits after viewing or reading dental material that has been made available through the Office of Continuing Dental Education at The UTHSCSA, School of Dentistry. http://testingcenter.uthscsa.edu
## Online Learning Opportunities

### ANESTHESIA AND PAIN CONTROL
- Combination - Inhalation Enteral (Oral)
- Minimal Sedation Level 1 (Texas Certification Continuum Course 12 sections)
- Minimal Enteral (Oral) Sedation (Level 1) Permit Renewal Course (Texas Certification Continuum Course 7 sections)
- Nitrous Oxide Conscious Sedation: For Dentists (Texas Certification Continuum Course/9 hours of didactic)
- Monitoring the Administration of Nitrous Oxide: For Dental Hygienists and Assistants (Texas Certification Continuum Course 9 hours of didactic)
- Triazolam (Halcion) Sedation as an Alternative to IV Sedation (1 section)

### DENTAL ASSISTING
- Dental Assistant Registration Course and Examination (Texas Certification Continuum Course/8 hours of didactic)

### DENTAL DIGITAL RADIOGRAPHY
- Using 3D Imaging: The New Standard of Care (1 section)

- Evidence-Based Practice Skills and Tools for Practitioners (1 section)
- Keep Up-to-Date with Biomedical Info

### IMPLANTOLOGY
- Buccal Plate Preservation: A Predictable Solution to Anterior Aesthetic Management (1 section)
- Implants, Tissue Control, and Laboratory Communication (1 section)
- The Precision Prosthesis: Attachments Used In Removable Prosthetics (1 section)
- Implants for Patients with Diabetes...What to do? (1 section)
- Mini Implants: An Alternative Treatment Option (1 section)
- Extraction Site Grafting for Future Implants (1 section)
- Using Technology in Implant Dentistry (1 section)
- Potpourri of Common Problems in Implant Surgery (1 section)
- Dental Implant and Alternative Options featuring Informed Consent for your Patients (1 hour of Continuing Education)
- Mandibular Tissue Supported Implant-Retained Overdentures (1 section)
- Graftless Solutions for Implant Placement (1 section)

### INFECTION CONTROL AND DENTAL WASTE MANAGEMENT
- Antibacterial Chemotherapy in Dentistry (2 sections)
- OSHA 2014 update (Certification Continuum Course/3 sections)

### MEDICAL EMERGENCIES IN THE DENTAL OFFICE
- Emergency Medicine (2 sections)
- Emergency Medicine in Dentistry 3 (4 hours of CE per section)

### NUTRITION
- Guidelines on Teaching Patients How Diet Affects Oral Health (1 section)

### OCCLUSION
- Intraroral Appliance Alternatives (1 section)
- Occlusion Made Simple (1 section)
- Is Occlusion Dead or Just Sleeping It Off? (1 section)

### OPERATIVE DENTISTRY
- The Precision Prosthesis Attachments used in Removable Prosthetics (1 section)
- Complex Prosthetics in General Practice, “What to do, How to do it and When” (3 sections)

### ORAL AND MAXILLOFACIAL SURGERY
- Wisdom Teeth Diagnosis and Management (1 section)
- Oral Surgery 101: Basics in Oral Surgery (3 sections)

### ORAL CANCER
- Oral Cancer: Update on Risk Factors, Adjunctive Diagnostic Aids, and Management Strategies & Complications (3 sections)
- Review of Common Oral Lesions (3 sections)
- Update on Oral Cancer Adjuncts and the Future (1 section)
- The Patient on Anticoagulant Therapy, What’s New? (1 section)

### ORAL MEDICINE
- The Right (and Wrong) Way to Treat Pain (2 sections)
- Oropharyngeal Candidiasis Diagnosis and Treatment (1 section)
- Oropharyngeal Candidiasis Diagnosis and Treatment (1 section)
- Salivary Gland Dysfunction Diagnosis and Treatment (1 section)
- Solar (Actinic) Cheilosis Diagnosis and Treatment (1 section)

### ORAL PATHOLOGY
- Oropharyngeal Candidiasis Diagnosis and Treatment (1 section)
- Oropharyngeal Candidiasis Diagnosis and Treatment (1 section)
- Salivary Gland Dysfunction Diagnosis and Treatment (1 section)
- Solar (Actinic) Cheilosis Diagnosis and Treatment (1 section)
Online Learning Opportunities

ORAL/SYSTEMIC DISEASE LINKS
- The Patient with Endocrine Disorders (2 sections)
- Hypertension: Risk Stratification and Patient Management in the Oral Health Care Setting (2 sections)
- Teaching Oral Disease Prevention and Health Promotion (1 section)

---

**PRE-REGISTRATION:** Pre-registration for all courses is necessary. It is beneficial for participants to preregister for a course as the course package will be available for them at final check-in. Please call the Office of Continuing Dental Education at (210) 567-3177 to preregister for a course or mail the registration form with check made payable to “UTHSCSA” to:  
UTHSCSA School of Dentistry  
Continuing Dental Education  
MSC 7930  
7703 Floyd Curl Drive  
San Antonio, Texas 78229-3900

The Office of Continuing Dental Education may find it necessary to implement a reasonable fee increase on noted courses.

The Office of Continuing Dental Education cannot be held responsible for the theft of a non-refundable air ticket or flight change in the event of a course cancellation or the rescheduling of the program.

Upon registering in any Continuing Dental Education activity, the participant agrees that the University of Texas Health Science Center at San Antonio and their affiliates, and all personnel associated with the program are not responsible or liable for any injuries or other damages sustained by the attendee in connection with the scheduled activity, and the participant hereby releases each of them from any claims against them arising directly or indirectly from any such injury or damage.

The registered participant grants permission to the Office of Continuing Dental Education (and its designees and agents) to utilize the participant image, likeness, actions and/or statements in any live or recorded audio, video, or photographic display or exhibition, publication, or reproduction made of, about, or at, the activity without further authorization or compensation.

Participants may not use video or audio recording devices during the course or scheduled event.

Registering for any Continuing Dental Education activity constitutes acceptance of these terms.

**PAYMENT BY CREDIT CARD:** MasterCard, Visa, or Discover Card only.

**ON-SITE CHECK-IN:** Please check details of each course for designated time and location of course check-in. Participants can pick up packets one hour prior to the beginning of the course. Same day walk-in enrollments will be accommodated on a space-available basis.

**CONFIRMATION:** Your registration confirmation will be mailed from our office to the registered participant within 10 days of the program date. You will also receive a listing of nearby hotels at this time.

This will be followed by a final confirmation letter designating the details and location of the course within 10 days of the program date. A map of the campus and parking information is on the Health Science Center website www.uthscsa.edu. Proof of payment will be required at the course location. Please have on hand the course to those participants who have preregistered and prepaid. Replacements or additional copies of the Certificate of Attendance will not be issued. Participants will be charged an administrative fee of $20.00. Participants who pay on the day of the course will be mailed their Receipt of Payment and Certificate of Attendance.

**TUITION DISCOUNT:** “Recipients of the Kenneth D. Rudd CDE Participant Award may deduct 5 to 10% from the tuition of designated courses sponsored by the Office of Continuing Dental Education, The University of Texas Health Science Center at San Antonio, School of Dental Hygiene.”

**ACCOMMODATING PEOPLE WITH SPECIAL NEEDS:** If you are a person with special needs and desire special accommodations, please advise us at the time of registering for the course. Requests will be kept confidential. Individuals with speech and language impairments can contact the Office of CDE by using TDD Message-Relay Texas. If you have a TDD, 1-800-735-2989. If you do not have a TDD, call 1-800-735-2988.

**AFFILIATIONS:** The University of Texas Health Science Center at San Antonio, School of Dental Hygiene is a member of the American Dental Education Association.

**CONCERNS, COMPLAINTS & SUGGESTIONS:** In the event of course dissatisfaction, the Office of Continuing Dental Education and the Dental School’s Committee on Institutional Compliance and Standard of Conduct, all employees of the Office of Continuing Dental Education, and the Dental School are locked during the weekends. Please inform our office if you are unable to check in at designated times.

**EMERGENCY CONTACT:** Telephone number for the Office of Continuing Dental Education: 210-567-3177. To contact a participant in the event of an emergency, and there is not an available physician, please call the University Police at (210) 567-2800. Offsite location numbers will be provided with final confirmation letter.

**LOCATION:** UTHSCSA School of Dentistry is located at Medical Drive and Floyd Curl Drive. The main entrance to the complex is at Floyd Curl Drive (opposite Methodist Hospital). This entrance is open all hours, weekends and after hours.

**COMPLIMENTARY PARKING:** For those of you who will be driving to campus, the security officer at the main gate will instruct you where to park. You will be given a validated ticket at check in that you will need to exit the lot at the end of the course. Ticket validation occurs only once during registration. If you decide to leave and come back we are unable to validate any additional tickets and you will be responsible for payment at the gate.

**LATE ENTRY TO THE DENTAL SCHOOL:** The main doors to the Dental School are locked during the weekends. Please inform our office if you are unable to check in at designated times.
