This course is designed to aid the restorative dentist in providing more comprehensive diagnostic treatment planning and clinical treatment skills. With the continued advances in technology, techniques and materials, the future of dentistry is changing. CAD CAM dentistry is on the cutting edge of advanced restorative care. Although an increasing number of dentists are interested in offering this treatment to their patient, there is not enough information available, especially regarding occlusion.

OBJECTIVES
Participants Will Understand...

- Digital Impression Systems
- Complete Chair-side Systems
- Milling Centers
- Case Selection
- Tooth wear (Abrasion, Erosion, NCCL, Attrition)
- Parafunction and Bruxism
- Occlusal Adjustment
- Parafunction and Bruxism
