- Select proper implants based on sound biological principles.

PRESENTATION

DONALD P. CALLAN, D.D.S.

The purpose of this presentation is to provide evidence-based information to evaluate the relationships of the hard and soft tissues of connection to dental implants and to determine if these tissues are subject to periodontal breakdown.

OBJECTIVES

- Understand the hard and soft tissue relationships to dental implants.
- To understand the pathways of periodontal break down about dental implants.
- Identify hard and soft tissue conditions that may contribute to periodontal breakdown about dental implants.
- Determine the time and sequence for treatment and prevention of failing dental implants.
- To properly inform the patient of the potential periodontal disease and systemic concerns of dental implants.
- Determine the proper maintenance of dental implants by the patient and the dental hygienist.

PRESENTATION

DONALD P. CALLAN, D.D.S.

The fourth module will be a hands-on participation section where each participant will learn to deal with misaligned implants in an overdenture application. An innovative chair side attachment technique will be used along with proper attachment maintenance.

OBJECTIVES

- Why attachments?
- Case Design – How to choose the correct attachment for any partial denture or overdenture.
- What causes failures and how to avoid them
- Why is it necessary to segment long bridges?
- Why choose an overdenture?
- Clinical & laboratory fabrication procedures
- Troubleshooting & maintenance
- How to market and price

PRESENTATION

DONALD P. CALLAN, D.D.S.

The School of Dentistry thanks PerioSeal for its educational grant in support of this continuing education program.
